

Closing Remark

R.Itoh, KEK

- We had much fruitful presentations and discussions on Belle II Trigger and DAQ in this workshop aiming at the transition to mass production phase.
=> Thanks to everyone!
- Basically no major problem is foreseen to go for the production phase.

However.....

Still several issues exist.

- Clock issues: local clock, distribution
- “Duplicated effort”
 - * Clock distribution (TRG \leftrightarrow DAQ) \Rightarrow discussion for agreement
 - * VME CPU effort (TRG \leftrightarrow DAQ) \Rightarrow “CPU group” will be formed.
 - * Hardware tracking (TRG \leftrightarrow PXD)
- TRG readout is not fixed yet.
- The interface between detector readout and Belle2link is not clear to everyone. \rightarrow Need written documents. \Rightarrow B2GM
 - * should be uploaded to Twiki as early as possible “as is” basis
 - + ECL \leftrightarrow Belle2link handshake is still unclear.
- Cooling scheme of readout electronics is still under discussion.
- Data flow issues: DQM, Belle2 library version for HLT, etc

Please be prepared for production!!

by fixing these issues as early as possible.

Let's thank Liu-san and his company
for managing this great workshop!

Excellent place, Excellent coordination,
and Excellent food....!!!!

We would like to express our deepest gratitude to
IHEP Trigger Lab lead by Zhen'An Liu
for their great contribution to Belle II DAQ.

- Very quick development of Belle2link
- New contribution to PXD-DAQ development

They are already “hard core” of Belle II DAQ group.
Belle II DAQ cannot be built without them!

Let's keep this tight collaboration!

Next Workshop. When and Where?

When: keep “annual” meeting? or better to have more frequently?

- We have b2gm's and regular TRG/DAQ meetings
- Keep “annual” basis -> “When? = Jan. 2012”

Where:

Idea 1: Korea again ???

Idea 2: Taiwan ???

Idea 3: Hawaii ???

Idea 4: Novosibirsk (BINP)???

Idea 5: Somewhere in Japan other than KEK ???

Idea 6: KEK ??? => Avoid this!!!!!!

* We have JSPS fund next year for this workshop and can support some of KEK members and people staying in Japan.

Workshop adjourn.

Thank you for joining the meeting.

See you soon in April B2GM
and
Celebrate ground breaking!
