

# **International Symposium on Neutrino Physics and Beyond**

Sunday, 23 September 2012 - Wednesday, 26 September 2012

Shenzhen

## **Book of Abstracts**

# Contents

Registration . . . . .	1
Welcome . . . . .	1
CP violation and leptogenesis . . . . .	1
Registration . . . . .	1
Welcome Remark . . . . .	1
Welcome Remark . . . . .	1
CP violation and leptogenesis . . . . .	1
Physics of neutrino oscillation experiments in the near future . . . . .	1
SU(3) Family Model for Neutrino Masses and Mixing . . . . .	2
Global three-neutrino data analyses: Status and Prospects . . . . .	2
Results from T2K . . . . .	2
The Latest MINOS Results . . . . .	2
Opera . . . . .	2
Results of MiniBooNE Experiment . . . . .	2
The hadroproduction experiment NA61 for present and future projects . . . . .	2
Last results from the Double Chooz experiment . . . . .	3
Observation of Electron-Antineutrino Disappearance at Daya Bay . . . . .	3
The KATRIN neutrino mass experiment . . . . .	3
Reception . . . . .	3
Neutrinoless Double Beta Decay: Neutrinos and beyond . . . . .	3
Recent Results from EXO-200 . . . . .	3
KamLAND-Zen double beta decay experiment . . . . .	4
Status of the CUORE-0 and CUORE experiments . . . . .	4

LUCIFER: scintillating bolometers for the search of double beta decay . . . . .	4
The COBRA Experiment - Search for the neutrinoless double beta decay with CdZnTe detectors . . . . .	4
Neutrino Mass Limits from Cosmology . . . . .	4
Neutrino masses from extensions of the Standard Model . . . . .	4
Geoneutrinos and the composition of the Earth . . . . .	4
Geoneutrinos and the radioactive power of the Earth . . . . .	5
Results and future perspectives of Borexino . . . . .	5
Tour to Dayabay . . . . .	5
Xenon100 . . . . .	5
PANDA X . . . . .	5
CsI(Na) Dark Matter Search Experiment . . . . .	5
The XMASS 800kg Experiment . . . . .	5
Low Energy Neutrino Physics and Dark Matter Searches with sub-keV Germanium Detectors . . . . .	6
Darkside . . . . .	6
Dark matter searches with the CUORE experiment . . . . .	6
Dark Matter searches by DEAP-3600 in SNOLAB . . . . .	6
Cosmic Ray Physics with AMS-02 on the International Space Station . . . . .	6
High Energy Cosmic Radiation Detection Facility Onboard China's Future Space Station . . . . .	6
A Multi-purpose Cosmic Ray Experiment: The LHAASO Project . . . . .	7
The PAMELA experiment for cosmic-ray measurements . . . . .	7
The Tianshan Radio Experiment for Neutrino Detection status and perspectives . . . . .	7
The R&D of Microchannel-Plate-Based Large Area Photomultiplier (MCP-PMT) at IHEP . . . . .	7
Liquid Scintillators for Daya Bay Neutrino Experiment . . . . .	7
Some ideas about a future 1t germanium experiment . . . . .	7
Highly Intense Muon Source for Neutrino and Muon Physics . . . . .	7
Status of LBNE . . . . .	8
DAEdALUS/IsoDAR . . . . .	8
LAGUNA-LBNO: status and plans . . . . .	8

European Strategy . . . . .	8
India-Based neutrino Observatory (INO) Project . . . . .	8
Daya Bay II . . . . .	8
Summary: Prospects of neutrino physics . . . . .	8
Phenomenology of Light Sterile Neutrinos . . . . .	9
Testing radiative neutrino mass models at the LHC . . . . .	9
Highlights of the European Strategy for Particle Physics . . . . .	9

48

## **Registration**

49

## **Welcome**

**Corresponding Author:** hut824@sina.com

50

## **CP violation and leptogenesis**

**Author:** Serguey Petcov<sup>one</sup>

51

## **Registration**

**Neutrino Properties I / 52**

## **Welcome Remark**

**Neutrino Properties I / 53**

## **Welcome Remark**

**Geo & Astronomical Neutrinos / 54**

## **CP violation and leptogenesis**

**Corresponding Author:** petcov@sissa.it

**Neutrino Properties IV / 55**

## **Physics of neutrino oscillation experiments in the near future**

**Corresponding Author:** kaoru.hagiwara@kek.jp

**Neutrino Properties I / 56**

### **SU(3) Family Model for Neutrino Masses and Mixing**

**Neutrino Properties I / 57**

### **Global three-neutrino data analyses: Status and Prospects**

**Corresponding Author:** eligio.lisi@ba.infn.it

**Neutrino Properties III / 58**

### **Results from T2K**

**Corresponding Author:** atsumu@kobe-u.ac.jp

**Neutrino Properties III / 59**

### **The Latest MINOS Results**

**Corresponding Author:** xjqu@stanford.edu

**Neutrino Properties III / 60**

### **Opera**

**Corresponding Author:** antonio.ereditato@cern.ch

**Neutrino Properties III / 61**

### **Results of MiniBooNE Experiment**

**Corresponding Author:** zdjurcic@hep.anl.gov

62

## **The hadroproduction experiment NA61 for present and future projects**

Neutrino Properties IV / 63

## **Last results from the Double Chooz experiment**

Corresponding Author: kerret@in2p3.fr

Neutrino Properties IV / 64

## **Observation of Electron-Antineutrino Disappearance at Daya Bay**

Corresponding Author: zhanl@ihep.ac.cn

Neutrino Properties II / 65

## **The KATRIN neutrino mass experiment**

Corresponding Author: joachim.wolf@kit.edu

66

## **Reception**

Double Beta Decays / 67

## **Neutrinoless Double Beta Decay: Neutrinos and beyond**

Corresponding Author: werner.rodejohann@mpi-hd.mpg.de

Close Session / 68

## **Recent Results from EXO-200**

Corresponding Author: kosok@stanford.edu

**Double Beta Decays / 69**

## **KamLAND-Zen double beta decay experiment**

**Corresponding Author:** koga@awa.tohoku.ac.jp

**Double Beta Decays / 70**

## **Status of the CUORE-0 and CUORE experiments**

**Corresponding Author:** oliviero.cremonesi@mib.infn.it

**Double Beta Decays / 71**

## **LUCIFER: scintillating bolometers for the search of double beta decay**

**Corresponding Author:** marco.vignati@roma1.infn.it

72

## **The COBRA Experiment - Search for the neutrinoless double beta decay with CdZnTe detectors**

**Corresponding Author:** silke.rajek@tu-dortmund.de

**Geo & Astronomical Neutrinos / 73**

## **Neutrino Mass Limits from Cosmology**

**Corresponding Author:** jarah@ihep.ac.cn

**Neutrino Properties II / 74**

## **Neutrino masses from extensions of the Standard Model**

**Corresponding Author:** f.g.cao@massey.ac.nz

**Geo & Astronomical Neutrinos / 75**

## **Geoneutrinos and the composition of the Earth**

**Corresponding Author:** mcdonoug@umd.edu

76

## **Geoneutrinos and the radioactive power of the Earth**

**Corresponding Author:** sdye@hpu.edu

*Geo & Astronomical Neutrinos / 77*

## **Results and future perspectives of Borexino**

**Corresponding Author:** giacchino.ranucci@mi.infn.it

78

## **Tour to Dayabay**

*Dark Matter Searches I / 79*

## **Xenon100**

**Corresponding Author:** nikx@sjtu.edu.cn

*Dark Matter Searches I / 80*

## **PANDA X**

**Corresponding Author:** hyzhao@sjtu.edu.cn

*Dark Matter Searches I / 81*

## **CsI(Na) Dark Matter Search Experiment**

**Corresponding Author:** sunxl@ihep.ac.cn

*Dark Matter Searches I / 82*

## **The XMASS 800kg Experiment**

**Corresponding Author:** jing.liu@ipmu.jp

Dark Matter Searches I / 83

## **Low Energy Neutrino Physics and Dark Matter Searches with sub-keV Germanium Detectors**

**Corresponding Author:** ht Wong@phys.sinica.edu.tw

Dark Matter Searches II / 84

## **Darkside**

**Corresponding Author:** jingke Xu@princeton.edu

Dark Matter Searches II / 85

## **Dark matter searches with the CUORE experiment**

**Corresponding Author:** fabio.bellini@roma1.infn.it

Dark Matter Searches II / 86

## **Dark Matter searches by DEAP-3600 in SNOLAB**

**Corresponding Author:** jtang3@ualberta.ca

Cosmic Ray Physics / 87

## **Cosmic Ray Physics with AMS-02 on the International Space Station**

**Corresponding Author:** roberto.battiston@pg.infn.it

Cosmic Ray Physics / 88

## **High Energy Cosmic Radiation Detection Facility Onboard China's Future Space Station**

**Corresponding Author:** zhangsn@ihep.ac.cn

**Cosmic Ray Physics / 89**

## **A Multi-purpose Cosmic Ray Experiment: The LHAASO Project**

**Corresponding Author:** caozh@ihep.ac.cn

**Cosmic Ray Physics / 90**

## **The PAMELA experiment for cosmic-ray measurements**

**Corresponding Author:** mori@fi.infn.it

**Cosmic Ray Physics / 91**

## **The Tianshan Radio Experiment for Neutrino Detection status and perspectives**

**Corresponding Author:** omartino@in2p3.fr

**Future Projects I / 92**

## **The R&D of Microchannel-Plate-Based Large Area Photomultiplier (MCP-PMT) at IHEP**

**Corresponding Author:** qians@ihep.ac.cn

**Future Projects I / 93**

## **Liquid Scintillators for Daya Bay Neutrino Experiment**

**Corresponding Author:** dingyy@ihep.ac.cn

**Dark Matter Searches II / 94**

## **Some ideas about a future 1t germanium experiment**

**Corresponding Author:** isa@mpp.mpg.de

**Future Projects I / 95**

## **Highly Intense Muon Source for Neutrino and Muon Physics**

**Corresponding Author:** kuno@phys.sci.osaka-u.ac.jp

**Future Projects II / 96**

## **Status of LBNE**

**Corresponding Author:** maury.goodman@anl.gov

**Future Projects II / 97**

## **DAEdALUS/IsoDAR**

**Corresponding Author:** zdjurcic@hep.anl.gov

**Future Projects II / 98**

## **LAGUNA-LBNO: status and plans**

**Corresponding Author:** andre.rubbia@cern.ch

99

## **European Strategy**

**Corresponding Author:** katsan@admin.in2p3.fr

**Future Projects II / 100**

## **India-Based neutrino Observatory (INO) Project**

**Corresponding Author:** nkm@tifr.res.in

**Future Projects I / 101**

## **Daya Bay II**

**Corresponding Author:** caoj@ihep.ac.cn

**Close Session / 102**

## **Summary: Prospects of neutrino physics**

**Corresponding Author:** sgwojcicki@gmail.com

**Neutrino Properties I / 103**

## **Phenomenology of Light Sterile Neutrinos**

**Corresponding Author:** giunti.carlo@gmail.com

**Neutrino Properties IV / 104**

## **Testing radiative neutrino mass models at the LHC**

**Author:** Raymond Volkas<sup>1</sup>

<sup>1</sup> *The University of Melbourne*

**Corresponding Author:** raymondv@unimelb.edu.au

**Geo & Astronomical Neutrinos / 105**

## **Highlights of the European Strategy for Particle Physics**

**Author:** Antonio Masiero<sup>1</sup>

<sup>1</sup> *INFN*
