

The 11th Workshop on QCD Phase Transition and Relativistic Heavy-ion Physics

Sunday, 16 August 2015 - Wednesday, 19 August 2015

Book of Abstracts

Contents

STAR Physics Overview & Forward Upgrade	1
Recent Flow Results from RHIC-STAR	1
Heavy Flavor Production in Heavy-ion Collisions	1
Exploring the QCD Phase Diagram for a Signature of the Critical Point	1
HENPIC Talk – Lifetime measurement of hypernucleus at RHIC-STAR	1
Lattice Results on Transport Properties of QGP	1
v2 splitting of particles and antiparticles at RHIC-BES	1
Nuclei production and flow in relativistic heavy ion collisions	1
Deuteron production in heavy-ion collision from coalescence model	2
Yield correlations and pT dependence of charmed hadrons in Pb+Pb collisions at 2.76 TeV	2
A description of pseudo-rapidity distributions in nucleus and particle collisions at high energies	2
Correlations in pp and p+Pb collisions at the LHC energies	2
Parameterization of Deformed Nuclei for Glauber Modeling in Relativistic Heavy Ion Collisions	2
相对论重离子碰撞中 HBT 关联的能量依赖性	2
SPH 演化源 pi 介子关联函数与集体流的涨落	2
Back-to-back correlations of boson-antiboson pairs for hydrodynamic sources	2
Pion interferometry and elliptic flow in the viscous granular source model in relativistic heavy ion collisions	3
Survival of charged rho condensation	3
重味素强子的研究	3
The parton and hadron cascade model, PACIAE	3
Temperature independent shear viscosity to entropy density ratio in AMPT	3

Blast Wave Fits to Elliptic Flow Data at 7.7–2760 GeV	3
The comparison of elliptic flow obtained by various of methods	3
Some insights from systematic study of anisotropic flow?	3
Investigating the scaling of higher order harmonic flows in relativistic heavy ion collisions	4
Holographic Hadrons in dense media	4
From Holography towards real-world nuclear matter	4
致密夸克物质与致密星	4
Quark matter symmetry energy and isospin-dependence of QCD phase structure from NJL model	4
Dual condensates at finite isospin chemical potential	4
相对论重离子碰撞中的同位旋效应及相变	4
Overview from the ALICE experiment	4
Jet measurements with CMS and ALICE at LHC	5
Recent quarkonium measurement at STAR	5
Measurement of Lambda-Lambda correlation function	5
Medium effect on jet fragmentation via shower parton recombination	5
Jets and open heavy flavors in heavy-ion collisions	5
Jets escaping from Quark Soup	5
Transport properties of heavy quarks in dense medium	5
Medium-induced Jet energy loss and flavor conversion in e+A	5
Jet-induced photon radiation via longitudinal and transverse scattering	6
Investigation of the redistribution of lost energy from jets with AMPT model	6
The evolution of fragmentation function at finite temperature	6
Linear Boltzmann Transport for Jet Propagation in the Quark-Gluon Plasma: Medium- induced Gluon Radiations and Medium Recoil	6
Heavy quark potential from a deformed AdS ₅ model	6
高能核-核碰撞中净 K 介子分布	6
Correlations and fluctuations of identified baryons in quark combination models	6
Rapidity bin correlation pattern from a multi-phase transport model	6
Event by event multiplicity fluctuations in the statistical model	7

Correlated Fluctuations near the QCD critical point	7
Quark number fluctuations at finite temperature and finite chemical potential	7
LHC 能区奇异粒子产生的实验研究	7
High $p_T \pi^0$ production in ALICE at LHC	7
Production of Muons from Heavy-Flavour Hadron Decays in Pb–Pb Collisions at with ALICE at the LHC	7
Cold nuclear matter effects on the color singlet J/ψ production in p(d)-Au collisions at energies of RHIC and LHC	7
Upgrade of the ALICE Inner Tracking System	8
Pion 0 -hadron correlation and isolated photon-hadron correlation with EMCal in ALICE	8
Chiral soliton model at finite temperature and density	8
Chiral Magnetic Effect and the Structure of Compact Star	8
Universal behaviour of chiral phase transition in (2+1) flavour QCD	8
(Inverse) Magnetic catalysis and chirality imbalance	8
(Inverse) Magnetic Catalysis in Bose-Einstein Condensation	8
Phase transitions and thermal properties of QCD via the Dyson-Schwinger equation approach	8
Flow in p+A Collisions from Parton Cascade	9
Chiral kinetic theory for quark matter	9
Longitudinal fluctuations and event plane de-correlation at RHIC and LHC	9
Symmetry Energy in Quark Matter	9
Effect of Pion Bose-Einstein Condensation on Interferometry Measurements in Ultra-Relativistic Heavy Ion Collisions	9
Gluon Condensate at High Temperature	9
iTPC upgrade at RHIC-STAR	9
A Fixed Target Program for STAR	9
Nuclear equation of state at high densities and the CEE	10

Plenary Session I / 44

STAR Physics Overview & Forward Upgrade

Plenary Session I / 45

Recent Flow Results from RHIC-STAR

Plenary Session I / 46

Heavy Flavor Production in Heavy-ion Collisions

Plenary Session I / 47

Exploring the QCD Phase Diagram for a Signature of the Critical Point

Plenary Session II / 48

HENPIC Talk – Lifetime measurement of hypernucleus at RHIC-STAR

Plenary Session II / 49

Lattice Results on Transport Properties of QGP

Plenary Session II / 50

v_2 splitting of particles and antiparticles at RHIC-BES

Parallel Session / 51

Nuclei production and flow in relativistic heavy ion collisions

Parallel Session / 52

Deuteron production in heavy-ion collision from coalescence model

Parallel Session / 53

Yield correlations and pT dependence of charmed hadrons in Pb+Pb collisions at 2.76 TeV

Parallel Session / 54

A description of pseudo-rapidity distributions in nucleus and particle collisions at high energies

Parallel Session / 55

Correlations in pp and p+Pb collisions at the LHC energies

Parallel Session / 56

Parameterization of Deformed Nuclei for Glauber Modeling in Relativistic Heavy Ion Collisions

Parallel Session / 57

相对论重离子碰撞中 HBT 关联的能量依赖性

Parallel Session / 58

SPH 演化源 pi 介子关联函数与集体流的涨落

Parallel Session / 59

Back-to-back correlations of boson-antiboson pairs for hydrodynamic sources

Parallel Session / 60

Pion interferometry and elliptic flow in the viscous granular source model in relativistic heavy ion collisions

Parallel Session / 61

Survival of charged rho condensation

Parallel Session / 62

重味素强子的研究

Parallel Session / 63

The parton and hadron cascade model, PACIAE

Parallel Session / 64

Temperature independent shear viscosity to entropy density ratio in AMPT

Parallel Session / 65

Blast Wave Fits to Elliptic Flow Data at 7.7–2760 GeV

Parallel Session / 66

The comparison of elliptic flow obtained by various of methods

Parallel Session / 67

Some insights from systematic study of anisotropic flow?

Parallel Session / 68

Investigating the scaling of higher order harmonic flows in relativistic heavy ion collisions

Parallel Session / 69

Holographic Hadrons in dense media

Parallel Session / 70

From Holography towards real-world nuclear matter

Parallel Session / 71

致密夸克物质与致密星

Parallel Session / 72

Quark matter symmetry energy and isospin-dependence of QCD phase structure from NJL model

Parallel Session / 73

Dual condensates at finite isospin chemical potential

Parallel Session / 74

相对论重离子碰撞中的同位旋效应及相变

Plenary Session III / 75

Overview from the ALICE experiment

Plenary Session III / 76

Jet measurements with CMS and ALICE at LHC

Plenary Session III / 77

Recent quarkonium measurement at STAR

Plenary Session III / 78

Measurement of Lambda-Lambda correlation function

Plenary Session IV / 79

Medium effect on jet fragmentation via shower parton recombination

Plenary Session IV / 80

Jets and open heavy flavors in heavy-ion collisions

Plenary Session IV / 81

Jets escaping from Quark Soup

Plenary Session IV / 82

Transport properties of heavy quarks in dense medium

Parallel Session / 83

Medium-induced Jet energy loss and flavor conversion in e+A

Parallel Session / 84

Jet-induced photon radiation via longitudinal and transverse scattering

Parallel Session / 85

Investigation of the redistribution of lost energy from jets with AMPT model

Parallel Session / 86

The evolution of fragmentation function at finite temperature

Parallel Session / 87

Linear Boltzmann Transport for Jet Propagation in the Quark-Gluon Plasma: Medium-induced Gluon Radiations and Medium Recoil

Parallel Session / 88

Heavy quark potential from a deformed AdS₅ model

Parallel Session / 89

高能核-核碰撞中净 K 介子分布

Parallel Session / 90

Correlations and fluctuations of identified baryons in quark combination models

Parallel Session / 91

Rapidity bin correlation pattern from a multi-phase transport model

Parallel Session / 92

Event by event multiplicity fluctuations in the statistical model

Parallel Session / 93

Correlated Fluctuations near the QCD critical point

Parallel Session / 94

Quark number fluctuations at finite temperature and finite chemical potential

Parallel Session / 95

LHC 能区奇异粒子产生的实验研究

Parallel Session / 96

High p_T π^0 production in ALICE at LHC

Parallel Session / 97

Production of Muons from Heavy-Flavour Hadron Decays in Pb–Pb Collisions at with ALICE at the LHC

Parallel Session / 98

Cold nuclear matter effects on the color singlet J/ψ production in p(d)-Au collisions at energies of RHIC and LHC

Parallel Session / 99

Upgrade of the ALICE Inner Tracking System

Parallel Session / 100

Pion⁰-hadron correlation and isolated photon-hadron correlation with EMCal in ALICE

Parallel Session / 101

Chiral soliton model at finite temperature and density

Parallel Session / 102

Chiral Magnetic Effect and the Structure of Compact Star

Parallel Session / 103

Universal behaviour of chiral phase transition in (2+1) flavour QCD

Parallel Session / 104

(Inverse) Magnetic catalysis and chirality imbalance

Parallel Session / 105

(Inverse) Magnetic Catalysis in Bose-Einstein Condensation

Parallel Session / 106

Phase transitions and thermal properties of QCD via the Dyson-Schwinger equation approach

Plenary Session V / 107

Flow in p+A Collisions from Parton Cascade

Plenary Session V / 108

Chiral kinetic theory for quark matter

Plenary Session V / 109

Longitudinal fluctuations and event plane de-correlation at RHIC and LHC

Plenary Session V / 110

Symmetry Energy in Quark Matter

Plenary Session VI / 111

Effect of Pion Bose-Einstein Condensation on Interferometry Measurements in Ultra-Relativistic Heavy Ion Collisions

Plenary Session VI / 112

Gluon Condensate at High Temperature

Plenary Session VI / 113

iTPC upgrade at RHIC-STAR

Plenary Session VI / 114

A Fixed Target Program for STAR

Plenary Session IV / 115

Nuclear equation of state at high densities and the CEE
