CMS Data Analysis School 2019

09-13 December 2019,

Peking University, Beijing, China

The CMS Data analysis school is the official school that CMS organizes every year in US, in Europe and in Asia to train students, Ph.D and young post-docs for the physics analysis. Each school starts with a morning devoted to informational plenary talks followed by the execution of a series of short and long exercises, the essential features of the school.
