

Heavy dark matter at colliders

Friday, 29 October 2021 20:30 (30 minutes)

In this talk, I will review the general search ideas of dark matter at colliders, focusing on the usage and complementarity between different search methods and frameworks. I will show a few concrete examples of recent developments in deriving new results from Open Data. Furthermore, the future perspective of probing heavy dark matter at various future colliders will be discussed.
