Zhan Li

Cuts

- In this slide all figures are under the cut of loose region.
- $m_{4l} \in [130, 220] \text{ GeV}$,
- $m_{3l} > 120 \text{ GeV}$,
- $n_{\text{jets}} \geq 2$
- Here m_{4l} is m_{4l_fsr}

H eta

H eta

- variable used:
- η_{4l_fsr}
- $[-10, 10]$, 10 bins

H m4l

H m4l

- variable used:
- $m_{4l_constrained_HM}$
- $[130, 235]$, 7 bins

HpT_4l

HpT_4l

- variable used:
- p_{T4l_fsr}
- $[100, 400]$, 20 bins

Njets

Njets

- variable used:
- n_{jets}
- $[1, 10]$, 9 bins

MCFM_MELA_ggZZ

Cuts

- In this slide all figures are under the cut of
- $m_{4l} \in [130, 220] \text{ GeV}$,
- no others.
- Here m_{4l} is m_{4l_fsr}

H eta

H eta

- variable used:
- η_{4l_fsr}
- $[-10, 10]$, 10 bins

H m4l

H m4l

- variable used:
- $m_{4l_constrained_HM}$
- $[130, 235]$, 7 bins

HpT_4l

HpT_4l

- variable used:
- p_{T4l_fsr}
- $[100, 400]$, 20 bins

Njets

Njets

- variable used:
- n_{jets}
- $[1, 10]$, 9 bins

Cuts

- In this slide all figures are under the cut of $m_{41} \in [180, 220] \text{ GeV}$, no others.
- Here m_{41} is $m41_{\text{fsr}}$

H eta

H eta

- variable used:
- eta4l_fsr
- [-10,10], 10 bins

H m4l

H m4l

- variable used:
- m4l_constrained_HM
- [174,222], 8 bins
- But the cut is up to 220, so the last bin is inconvinible.

HpT_4l

HpT_4l

- variable used:
- pt4l_fsr
- [100,400], 20 bins

Njets

Njets

- variable used:
- n_jets
- [1,10], 9 bins

Cuts

- In this slide all figures are under the cut of $m_{41} \in [180, 220] \text{ GeV}$, $m_{32} > 300 \text{ GeV}$, $\pi_{34\text{cs}} = 2$, $|\Delta\eta_{32}| > 3$
- Here m_{41} is $m41_{\text{fsr}}$

H eta

H eta

- variable used:
- eta4l_fsr
- [-10,10], 10 bins

H m4l

H m4l

- variable used:
- m4l_constrained_HM
- [174,222], 7 bins
- But the cut is up to 220, so the last bin is inconvinible.

HpT_4l

HpT_4l

- variable used:
- pt4l_fsr
- [100,400], 20 bins

Njets

Njets

- variable used:
- n_jets
- [1,10], 9 bins

Cuts
