

# An EFT Compendium for Discoveries

**Joydeep Chakrabortty  
IIT Kanpur, India**

**Higgs and Effective Field Theory - HEFT 2021**

**15 April 2021**

## Talk is based on:

### 1. EFT Diagrammatica: UV Roots of the CP-conserving SMEFT

Supratim Das Bakshi, Joydeep Chakrabortty, Suraj Prakash, Michael Spannowsky, Shakeel Ur Rahaman.  
arXiv:2103.11593 [hep-ph].

### 2. Classifying Standard Model Extensions Effectively with Precision Observables

Supratim Das Bakshi, Joydeep Chakrabortty, Michael Spannowsky  
arXiv:2012.03839 [hep-ph]. Phys.Rev. D103 (2021) no.5, 056019.

### 3. CoDEx: Wilson coefficient calculator connecting SMEFT to UV theory

Supratim Das Bakshi, Joydeep Chakrabortty, Sunando Kumar Patra  
arXiv:1808.04403 [hep-ph]. Eur.Phys.J. C79 (2019) no.1, 21.

### 4. A Step Toward Model Comparison: Connecting Electroweak-Scale Observables to BSM through EFT and Bayesian Statistics

Anisha, Supratim Das Bakshi, Joydeep Chakrabortty, Sunando Kumar Patra  
arXiv:2010.04088 [hep-ph].

### 5. Effective Operator Bases for Beyond Standard Model Scenarios: An EFT compendium for discoveries

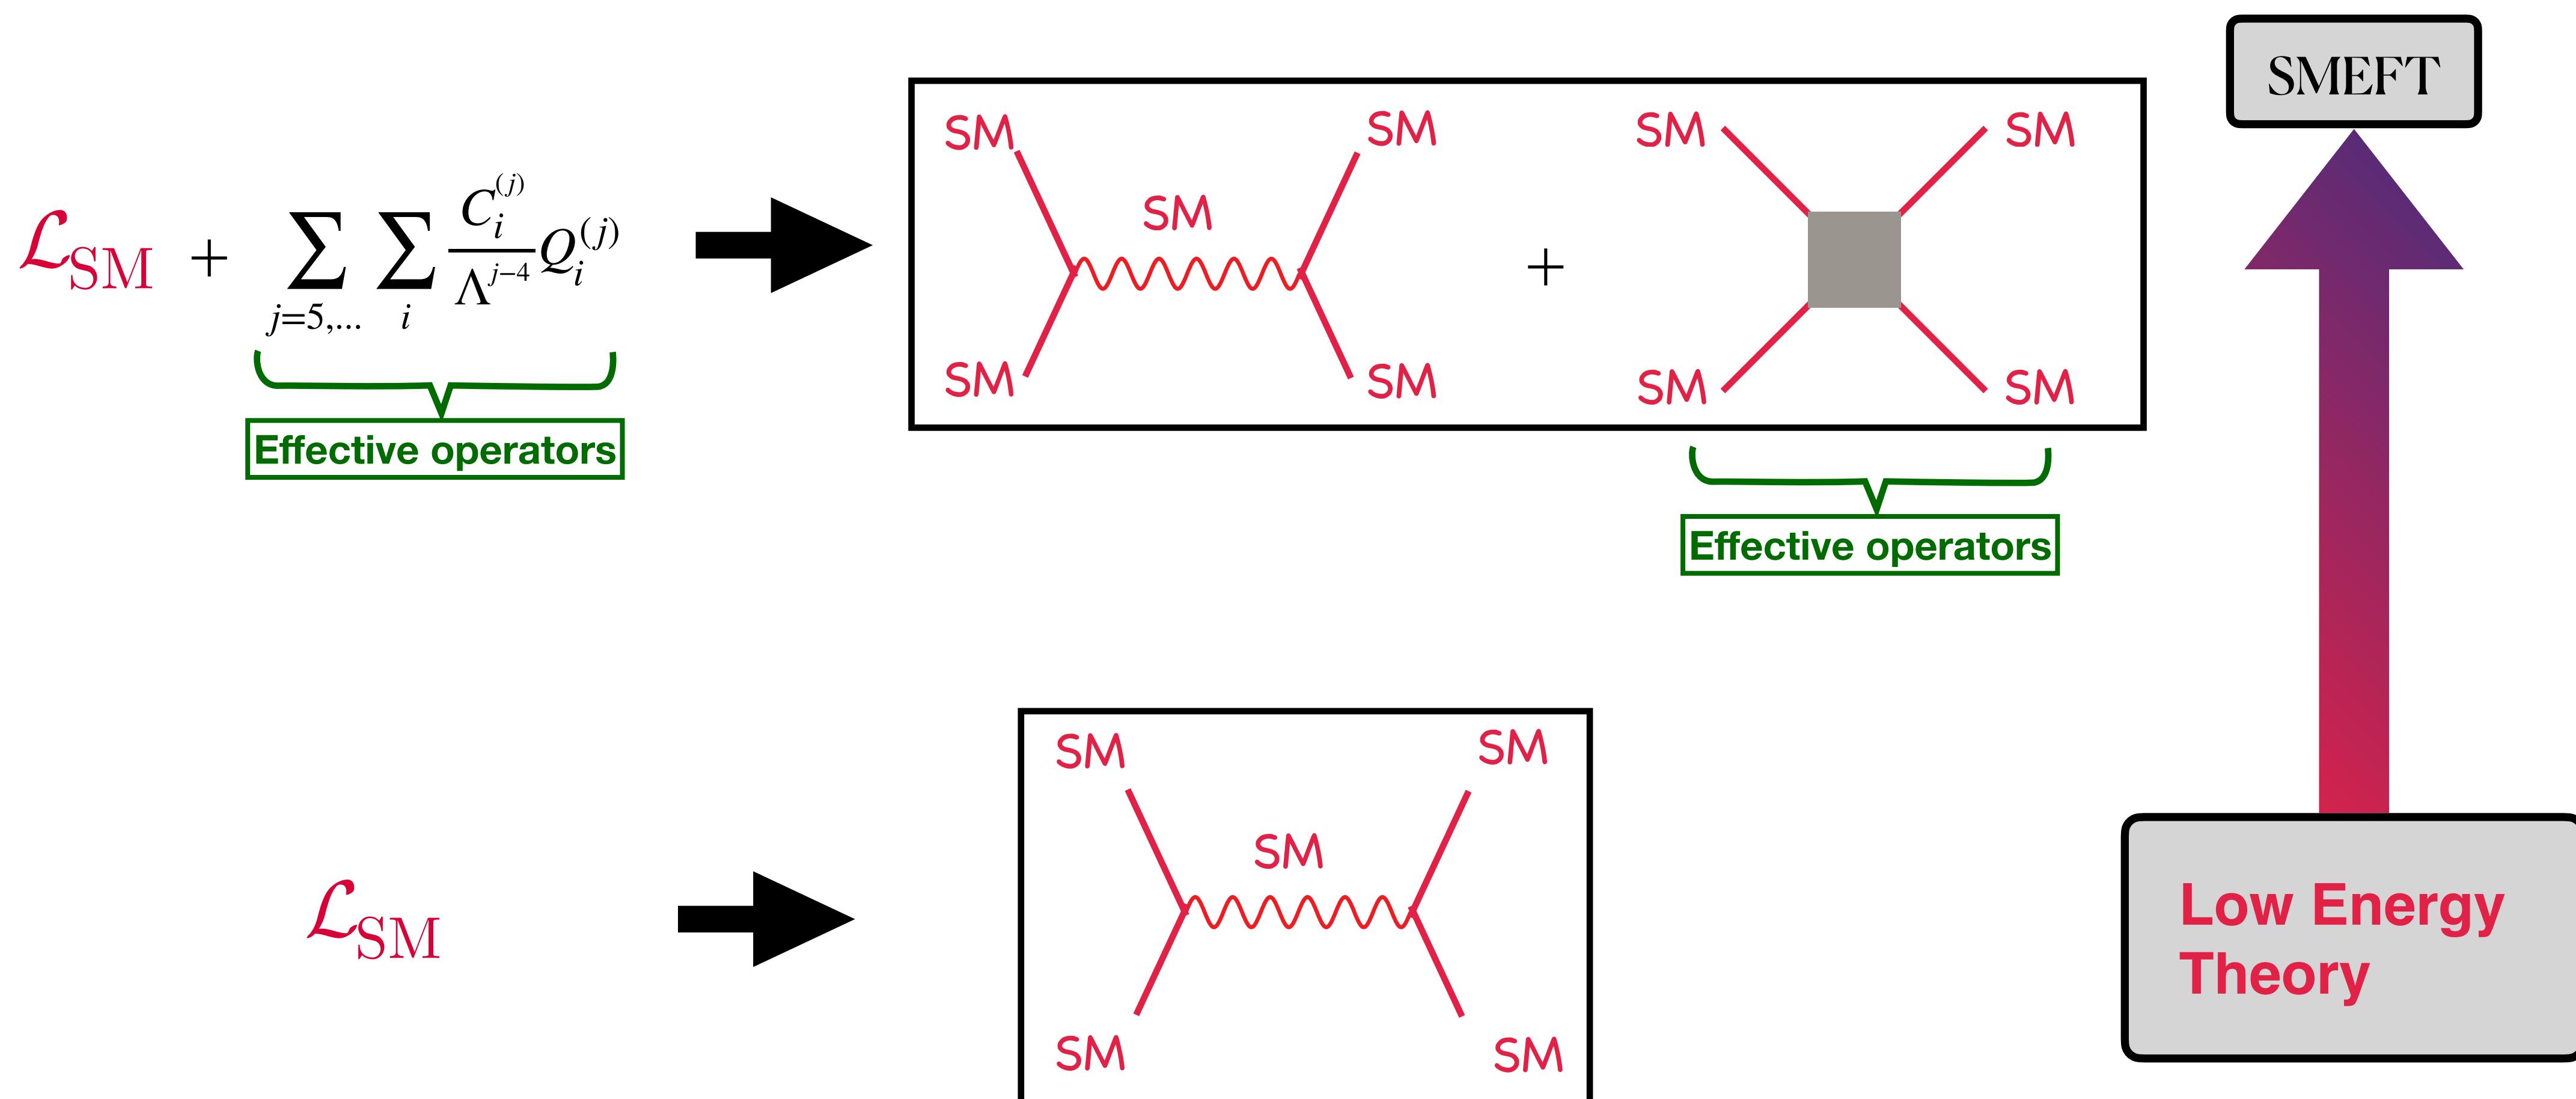

Upalaparna Banerjee, Joydeep Chakrabortty, Suraj Prakash, Shakeel Ur Rahaman, Michael Spannowsky.  
arXiv:2008.11512 [hep-ph]. JHEP 2101 (2021) 028.

## Points to note...

- ❖ **Bottom-Up vs Top-Down**
- ❖ **BSMs as Effective Theories**
- ❖ **Observables (set of operators) as “Response Screen”**
- ❖ **Classifications of BSMs**
- ❖ **Future directions: Relying on the presence of new particle(s)**
- ❖ **Operator driven BSM construction: Reverse engineering**

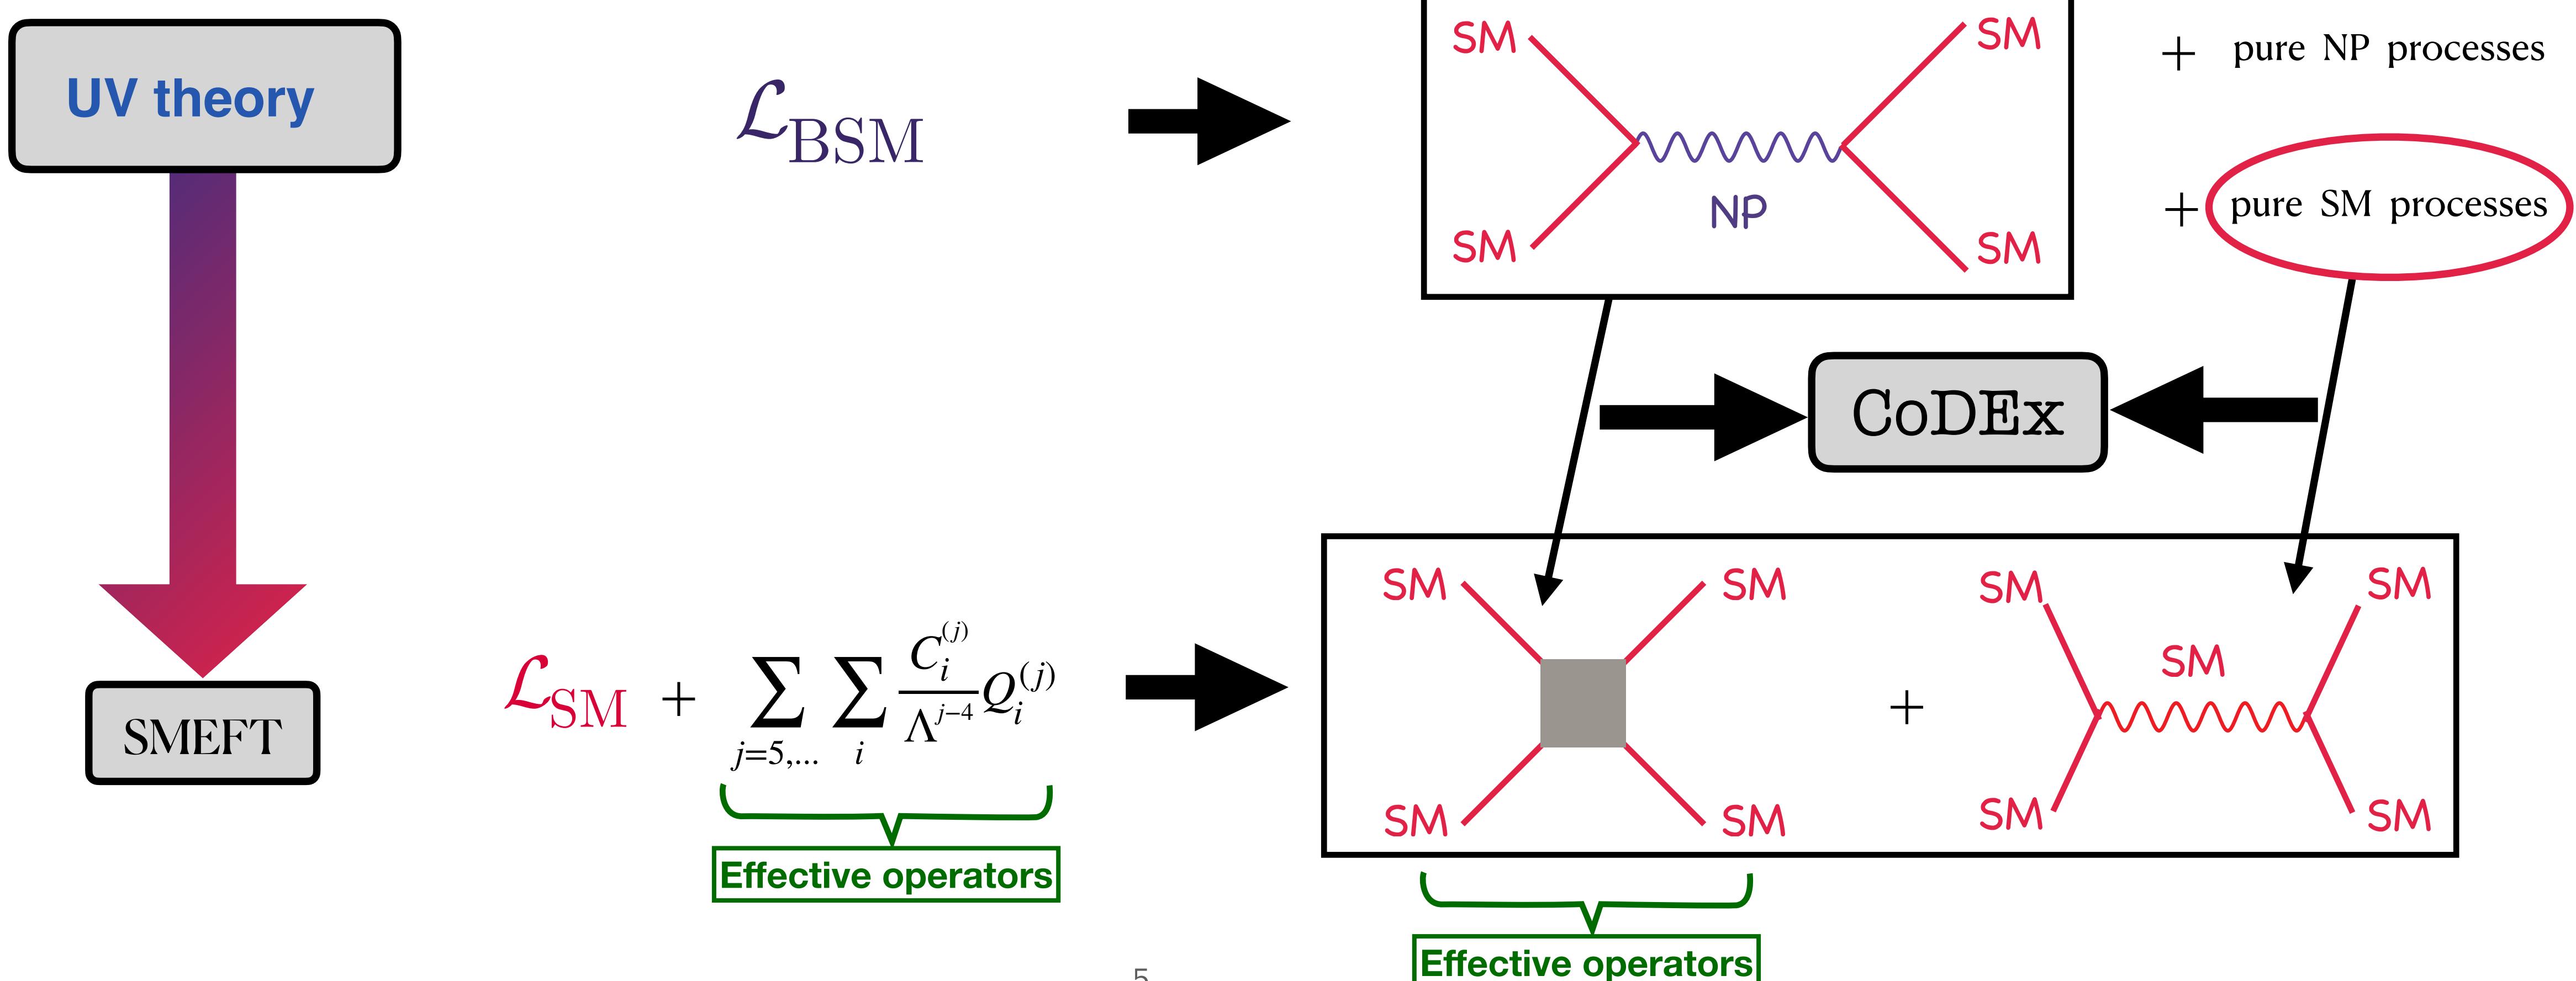

# Bottom-Up approach: SMEFT

- ★ Knowledge of exact nature of new physics is not required
- ❖ Wilson coefficients are free parameters: *origin-less*

# Top-Down approach: SMEFT

- ★ The Wilson coefficients known in terms of BSM parameters
- ❖ The UV complete Lagrangian must be known

# CoDEx : Wilson coefficient calculator

***Complete 1-loop Wilson coefficients within seconds !***

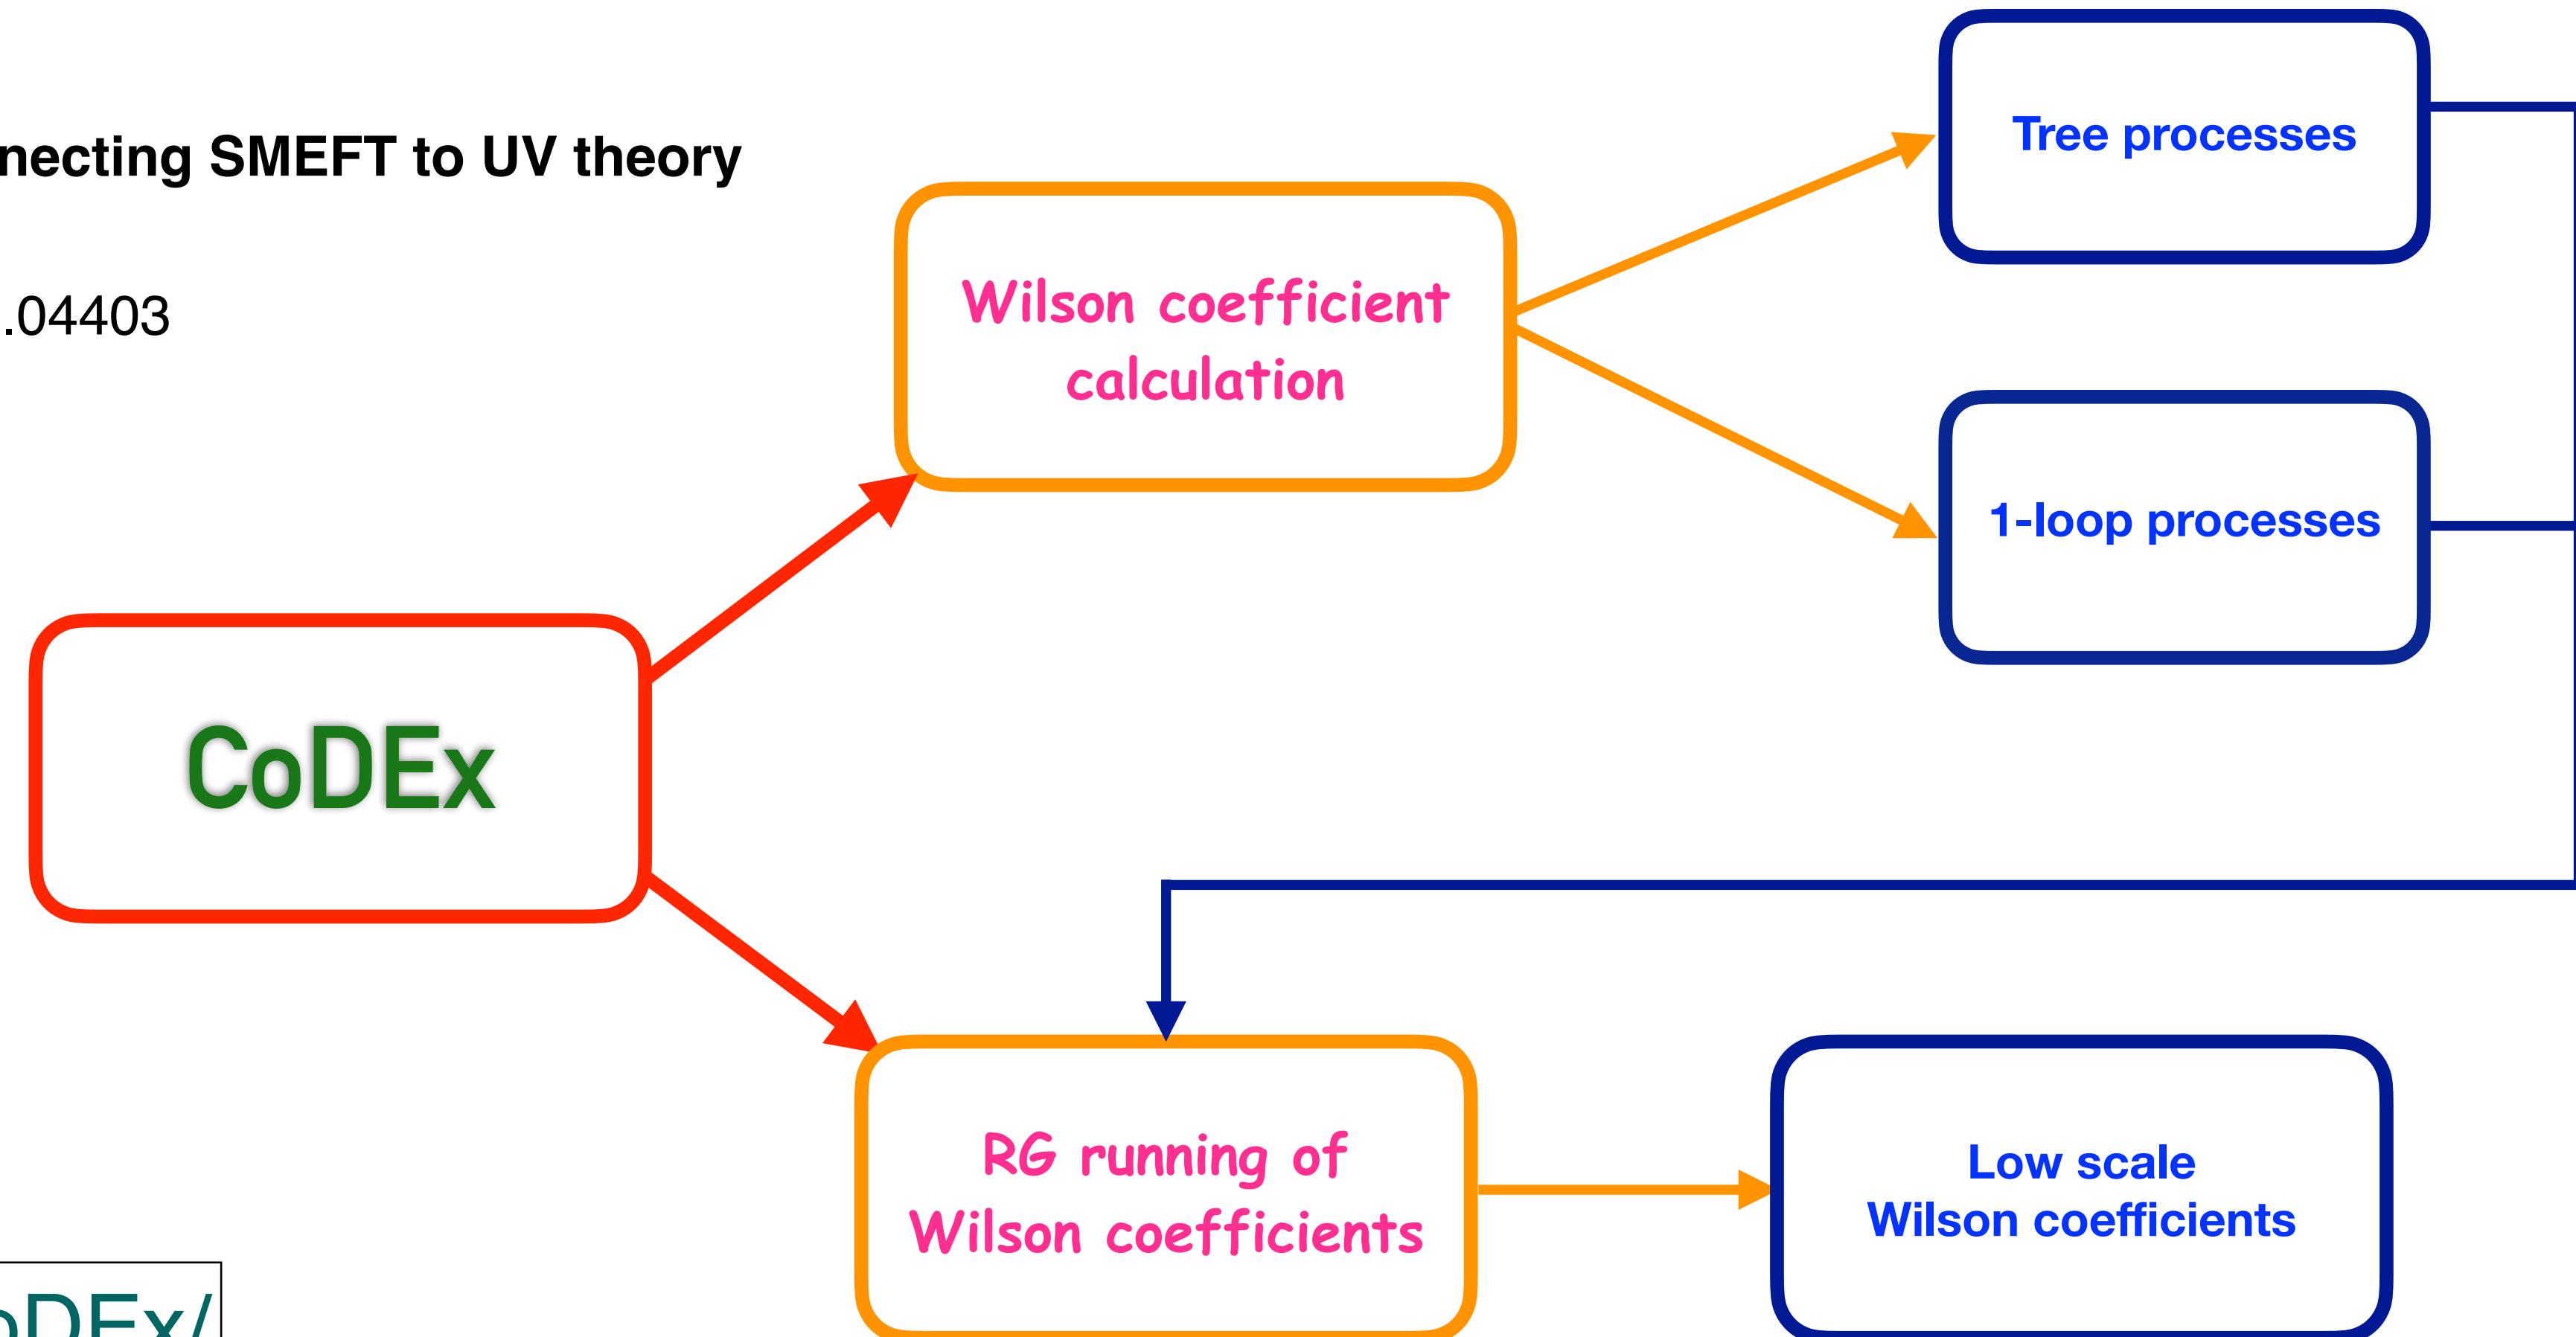

Manually matching BSMs to SMEFT is involved.

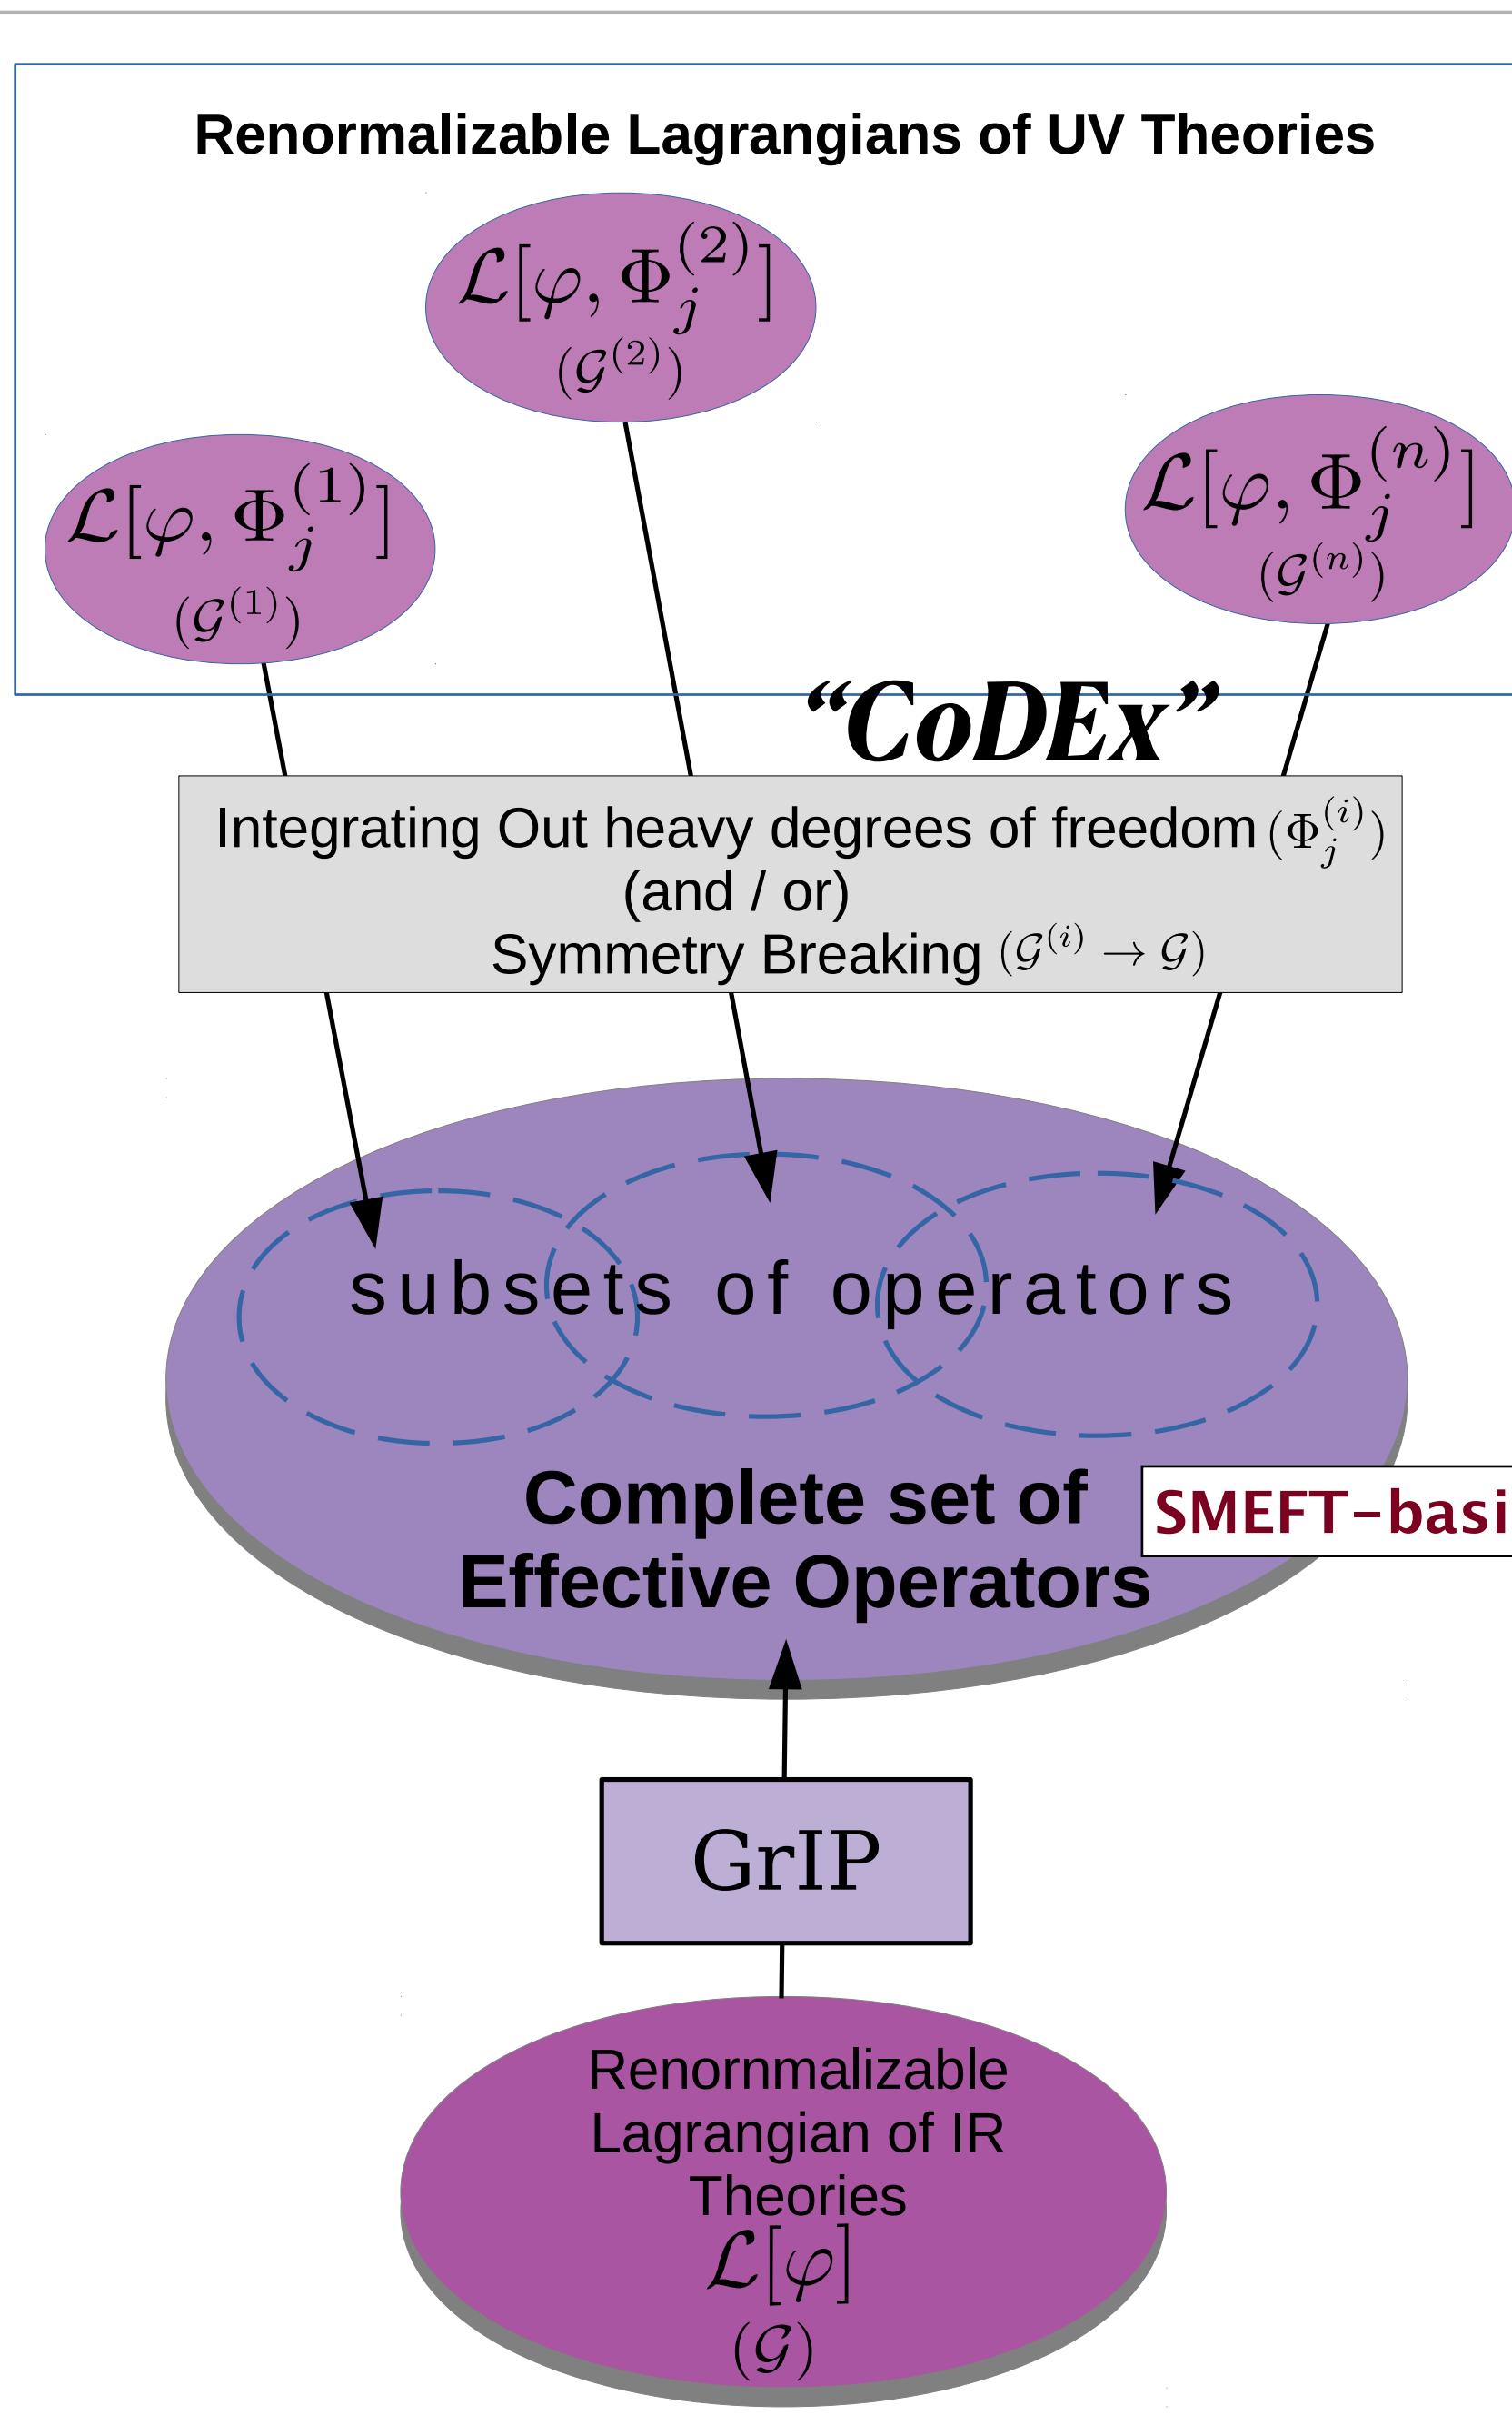

Package for automation is much needed.

**CoDEx: Wilson coefficient calculator connecting SMEFT to UV theory**

Supratim Das Bakshi, JC, S K Patra

Eur.Phys.J.C 79 (2019) 1, 21 · e-Print: 1808.04403

## CoDEX: Wilson coefficient calculator connecting SMEFT to UV theory

Supratim Das Bakshi, Joydeep Chakrabortty, Sunando Kumar Patra

Eur.Phys.J.C 79 (2019) 1, 21 ; e-Print: 1808.04403 [hep-ph]

**Available at:** <https://effexteam.github.io/CoDEX/>

With “**CoDEX**” and “**GrIP**” in arsenal one can use effective field theory to connect **UV** and **IR** theories very easily and of course automatically.

## Characters and Group Invariant Polynomials of (Super)fields: Road to "Lagrangian"

Upalaparna Banerjee, Joydeep Chakrabortty, Suraj Prakash, Shakeel Ur Rahaman

Eur.Phys.J.C 80 (2020) 10, 938; e-print: 2004.12830[hep-ph]

**Available at:** <https://teamgrip.github.io/GrIP/>

## Observable-Operator correspondance

EWPO-LO :  $\{Q_{HD}, Q_{HWB}, Q_{Hq}^{(1)}, Q_{Hq}^{(3)}, Q_{Hl}^{(1)}, Q_{Hl}^{(3)}, Q_{He}, Q_{Hu}, Q_{Hd}, Q_{ll}\}$

EWPO-NLO-I :  $\{Q_{HB}, Q_{HW}, Q_{H\square}\}$

Higgs Signal Strength (HSS) : EWPO-LO + EWPO-NLO-I +  $\{Q_H, Q_{uH}, Q_{dH}, Q_{eH}, Q_G, Q_{HG}\}$

EWPO-NLO-II :  $\{Q_{ed}, Q_{ee}, Q_{eu}, Q_{lu}, Q_{ld}, Q_{le}, Q_{lq}^{(1)}, Q_{lq}^{(3)}, Q_{qe}, Q_{uB}, Q_{uW}, Q_W, Q_{qd}^{(1)}, Q_{qq}^{(1)}, Q_{qq}^{(3)}, Q_{qu}^{(1)}, Q_{ud}^{(1)}, Q_{uu}, Q_{dd}\}$

Additional Operators (AdOps) :  $\{Q_{ud}^{(8)}, Q_{qd}^{(8)}, Q_{qu}^{(8)}, Q_{quqd}^{(1)}, Q_{lequ}^{(1)}, Q_{quqd}^{(8)}, Q_{ledq}\}$

B,L volating Operators (BLV) :  $\{Q_{qqq}, Q_{duu}, Q_{qqu}, Q_{duq}\}$
