

Tenth International Workshop on Spallation Materials Technology

Thursday, 21 October 2010

Oral Session — 10 ESS Target and Structural Materials Issues (15:00 - 16:40)

time	[id] title	presenter
15:00	[132] Materials R&D needs for the ESS target station	Dr NOAH, Etam
15:20	[133] Structural characterization of Lead Gold Eutectic: an x-ray thermodiffraction study	Dr MEDARDE BARRAGAN, Maria Luisa
15:40	[134] Preliminary tests on the compatibility of LGE with T91 and SS316LN steels	Dr DAI, Yong
16:00	[135] Experience with a first LGE loop and proposal for further investigations in flowing LGE	Dr THOMSEN, Knud
16:20	[136] MHD technologies in spallation target related investigations	Mr PLATACIS, Ernests
