

### **Third Circular of NUSYS 2022**

Dear Colleagues,

The second “Nuclear Physics School for Young Scientists (NUSYS 2022)” will be held from Aug 8 to Aug 13, 2022 in Ruichang city, Jiangxi province of China, and the date for checking in is on Aug 7, 2022. NUSYS 2022 is organized by the China Institute of Atomic Energy, and co-organized by Ruichang Academe of Nuclear Physics Application and Jiangxi Province Nuclear Society.

The goal of this school is to motivate the enthusiasm of young researchers to study nuclear physics by introducing the rich variety of present on-going activities in the field of experimental and theoretical nuclear physics, especially the opportunities created by the on-going or the next-generation nuclear physics facilities in Asia.

Each student is required to present a poster related to her/his work during the summer school. The organization committee will select three students for " ANPhA Award for Young Scientists ", and three students for " NUSYS Award for YoungScientists ". Award-winners will be requested to give oral presentations at the closing ceremony.

The school will be held in a hybrid mode, the onsite form (domestic participants) and the online form (participants from abroad via ZOOM), due to COVID-19. If the condition doesn't meet the requirement of onsite form owing to COVID-19, the NUSYS 2022 will be held fully online.

The school is jointly organized by the China Institute of Atomic Energy(CIAE), Beihang University (BUAA), Fudan University (FDU), Institute of Modern Physics (IMP), Lanzhou University (LZU), Nanjing University (NJU), Peking University (PKU) and Tsinghua University (THU).

### **Poster Session**

The poster sessions will be arranged for two nights after dinner during the summer school. All presentations and questions must be in English, as English is the official language of the summer school.
