

Teleworkshop on Strong QCD from Hadron Structure Experiments

Monday 07 June 2021 - Thursday 10 June 2021

ZOOM

Book of Abstracts

Contents

E: DIS at JLab	1
E: EHM through AMBER at CERN-SPS	1
T: Insights into EHM using pion and kaon targets	1
T: Meson structure from IQCD	1
break	1
E: News on pion and kaon structure studies	1
E: Nucleon energy-momentum tensor	1
T: 3D structure of mesons	1
Discussion	1
close	2
E: 3D images of the nucleon	2
E: Challenges in TMDs	2
T: 3D Structure of the nucleon	2
T: GPDs and PARTONS	2
break	2
E: New states and new opportunities with CLAS12	2
E: EHM from resonance electrocouplings	2
T: Faddeev equation and resonance electrocouplings	2
Discussion	3
close	3
E: New opportunities in nucleon resonances	3
E: 1st CLAS12 results on inclusive electron scattering	3
T: Resonance electroproduction	3
T: LQCD and the description of hadron spectra	3

break	3
E: Transition $N \rightarrow N^*$ GPDs	3
T: Analysis of inclusive electron scattering in the resonance region	3
T: Hadron radii from precise, low- Q^2 e-scattering data	4
Discussion	4
close	4
E: heavy-quark baryons	4
T: Production of hybrids and exotics	4
T: LQCD and exotic hadrons	4
T: EHM and the meson spectrum	4
break	4
T: New baryon states in quark models	5
T: From strong QCD to atomic nuclei	5
Discussion	5
close	5

E: DIS at JLab

1

E: EHM through AMBER at CERN-SPS

2

T: Insights into EHM using pion and kaon targets

Corresponding Author(s): cdroberts@nju.edu.cn

3

T: Meson structure from IQCD

Corresponding Author(s): hwlin@pa.msu.edu

4

break

5

E: News on pion and kaon structure studies

6

E: Nucleon energy-momentum tensor

7

T: 3D structure of mesons

8

Discussion

9

close

10

E: 3D images of the nucleon

11

E: Challenges in TMDs

12

T: 3D Structure of the nucleon

Corresponding Author(s): hyzhao@sjtu.edu.cn

13

T: GPDs and PARTONS

14

break

15

E: New states and new opportunities with CLAS12

16

E: EHM from resonance electrocouplings

17

T: Faddeev equation and resonance electrocouplings

Corresponding Author(s): jsegovia@upo.es

18

Discussion

19

close

20

E: New opportunities in nucleon resonances

21

E: 1st CLAS12 results on inclusive electron scattering

22

T: Resonance electroproduction

23

T: LQCD and the description of hadron spectra

24

break

25

E: Transition $N \rightarrow N^*$ GPDs

26

T: Analysis of inclusive electron scattering in the resonance region

27

T: Hadron radii from precise, low- Q^2 e-scattering data

28

Discussion

29

close

30

E: heavy-quark baryons

31

T: Production of hybrids and exotics

32

T: LQCD and exotic hadrons

33

T: EHM and the meson spectrum

Corresponding Author(s): sqin@cqu.edu.cn

34

break

35

T: New baryon states in quark models

36

T: From strong QCD to atomic nuclei

37

Discussion

38
