

**102-fold Improvement in Hyperpolarized  $^{131}\text{Xe}$  Production Using Spin Exchange Optical Pumping and the First Measurement of the Spin-Dependent Scattering Length in Polarized Neutron-Polarized  $^{131}\text{Xe}$  Using Pseudomagnetic Precession**

*Wednesday, 8 December 2021 21:50 (18 minutes)*

**Presenter:** Mr HAO, LU

**Session Classification:** Session 3
