

# Using machine learning methods to study aQGCs and nTGCs

*Thursday, 11 August 2022 10:55 (15 minutes)*

Machine learning has been developing rapidly in recent years, and it has become an important topic to leverage the power of machine learning in the phenomenological study of new physics beyond the Standard Model. We will present our recent works on the use of machine learning algorithms in the investigation of aQGCs and nTGCs.
