

第八届中国LHC物理研讨会 The 8th China LHC Physics Workshop (CLHCP2022)

Thursday, 24 November 2022

Parallel Session: HF/HI/QCD (16:20 - 18:20)

-Conveners: 瑞林 朱

time	[id] title	presenter
16:20	[104] Unpolarized Transverse Momentum Dependent Parton Distributions from Lattice QCD	ZHANG, Qi'an
16:40	[105] Z boson production studies at LHCb	DENG, Jianqiao
16:55	[106] W boson production in p-Pb and Pb-Pb collisions at ALICE	ZHAO, Mingrui
17:10	[108] Measurement of isolated photon production cross section in pp collisions at 13 TeV with ALICE	XU, Ran
17:25	[109] Lattice-QCD calculation of TMD wave functions through Large-Momentum Effective Theory	CHU, Minhuan
17:45	[110] Study of jet production and correlations with ALICE	HOU, Yongzhen
18:00	[240] Factorization of the Drell-Yan AFB and the first measurement of the corresponding proton structures using CMS 8 TeV and D0 1.96 TeV data	XIE, Mingzhe
