

Light Meson Spectroscopy at BESIII

BESIII has the world's largest samples of J/ψ and $\psi(3686)$ events from e^+e^- annihilations, which offer an ideal and clean laboratory to study light meson spectroscopy, in particular for the search for QCD exotics. Recent important achievements in this field, including the observation of a 1^{-+} state, $\eta_1(1855)$ in $J/\psi \rightarrow \gamma\eta\eta'$, the observation of the $X(2600)$ in $J/\psi \rightarrow \gamma\eta'\pi^+\pi^-$, and the PWA of $J/\psi \rightarrow \gamma\eta'\eta'$ will be highlighted.
