

本周汇报

Done:

学习 Simplified ABCD method 完成 cutflow Merge

Ongoing:

学习 Signal region definition

To Do:

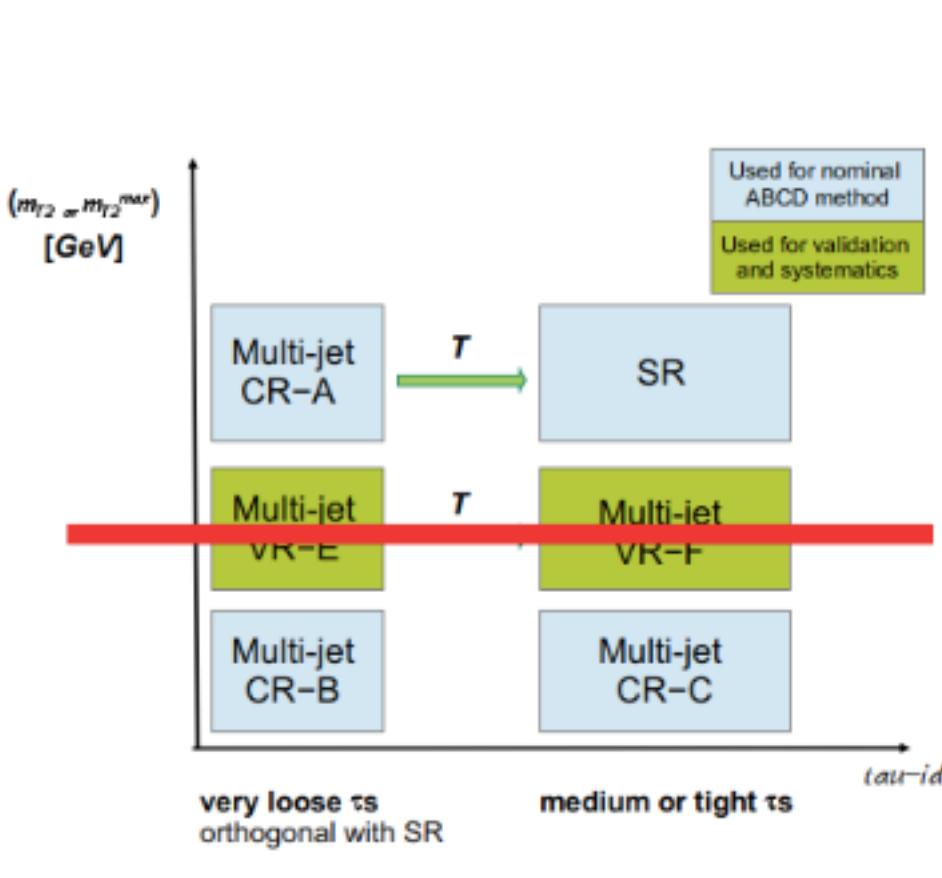

完成 Signal region definition

ABCD 方法

简单介绍及 cut 条件

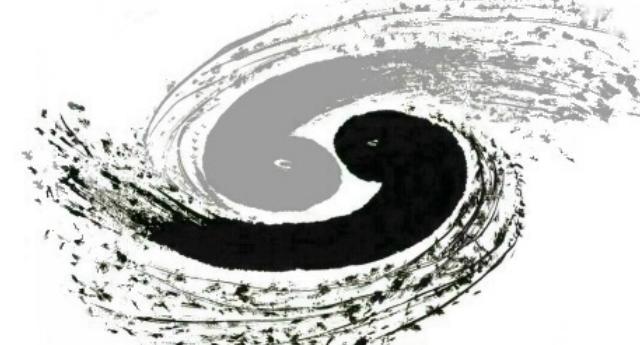

preCR - A (lowMass)	preSR - lowMass
≥ 2 veryloose τ s; $m_{T2} > 35$ GeV $10 < E_T^{\text{miss}} < 150$ GeV	≥ 2 Medium ≥ 1 tight τ s (OS) $m_{T2} > 35$ GeV $10 < E_T^{\text{miss}} < 150$ GeV
preCR - B (lowMass)	preCR - C (lowMass)
≥ 2 veryloose τ s; $15 < m_{T2} < 35$ GeV $10 < E_T^{\text{miss}} < 150$ GeV	≥ 2 Medium ≥ 1 tight τ s (OS) $15 < m_{T2} < 35$ GeV $10 < E_T^{\text{miss}} < 150$ GeV

- PF(purity factor) = #QCD / #data
- Multi-jet events yields in a region \rightarrow data * PF
- TF = #multi-jet in C / #multi-jet in B
- #multi-jet in SR = #multi-jet in A \times TF

修改 DiTauMET.cxx 文件

修改 ABC 区 Cutflow 条件

```
oTree->Branch("Weight_mc", &Var["totalWeight"]);

下周工作安排

2022.8.15-2022.8.22

1. 阅读文献
2. 学习完成 ABCD 方法优化信号区
3. 复习备考

Question?

谢谢！
