TaichuPix-3 test

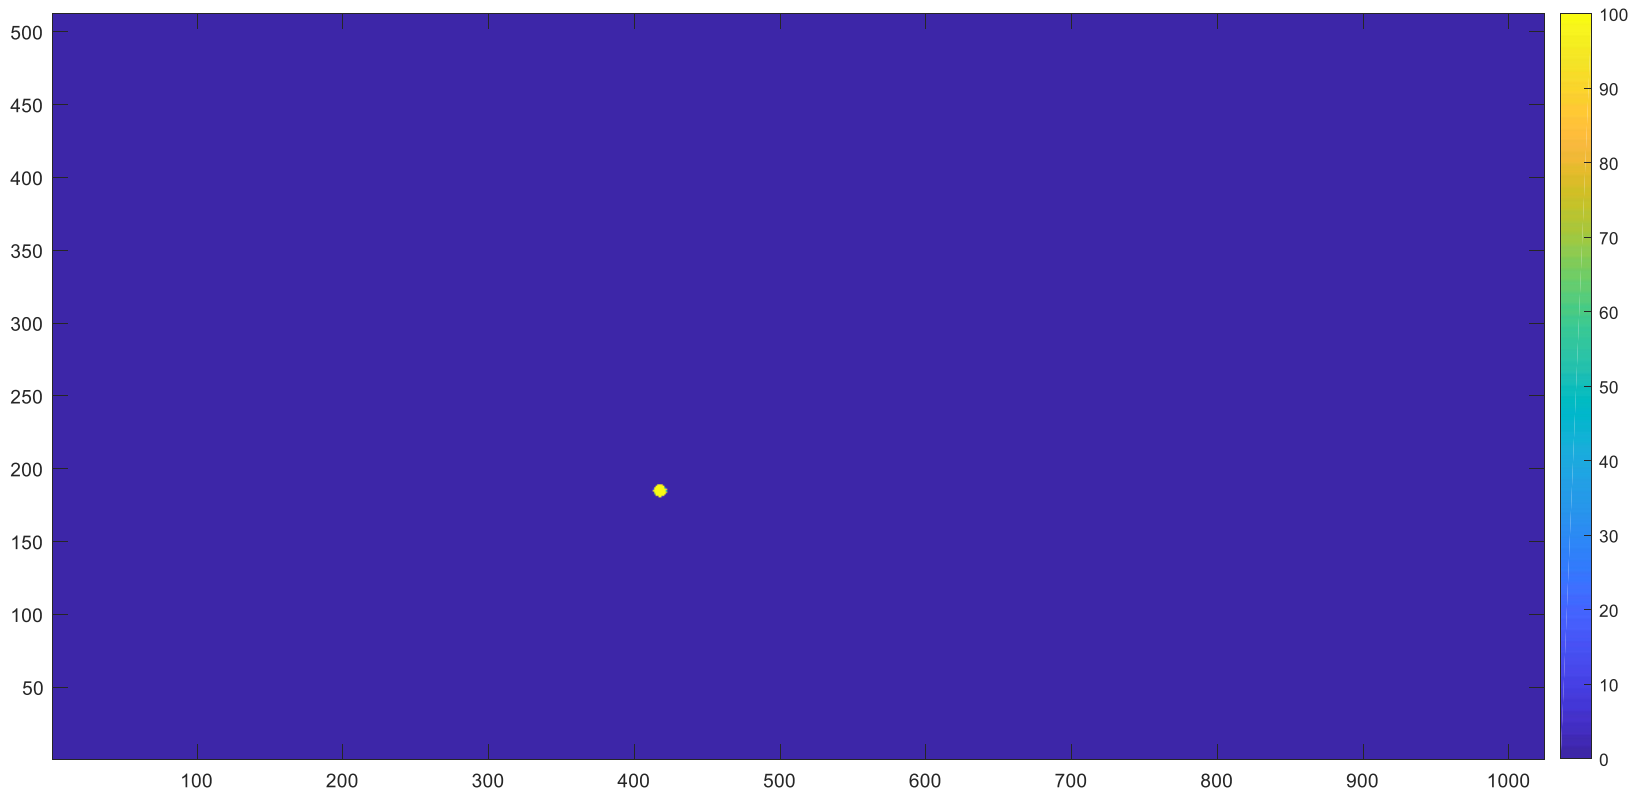

Ying ZHANG

2023-1-12

Laser test of Flex v1.5D

■ To verify the stability of the output data

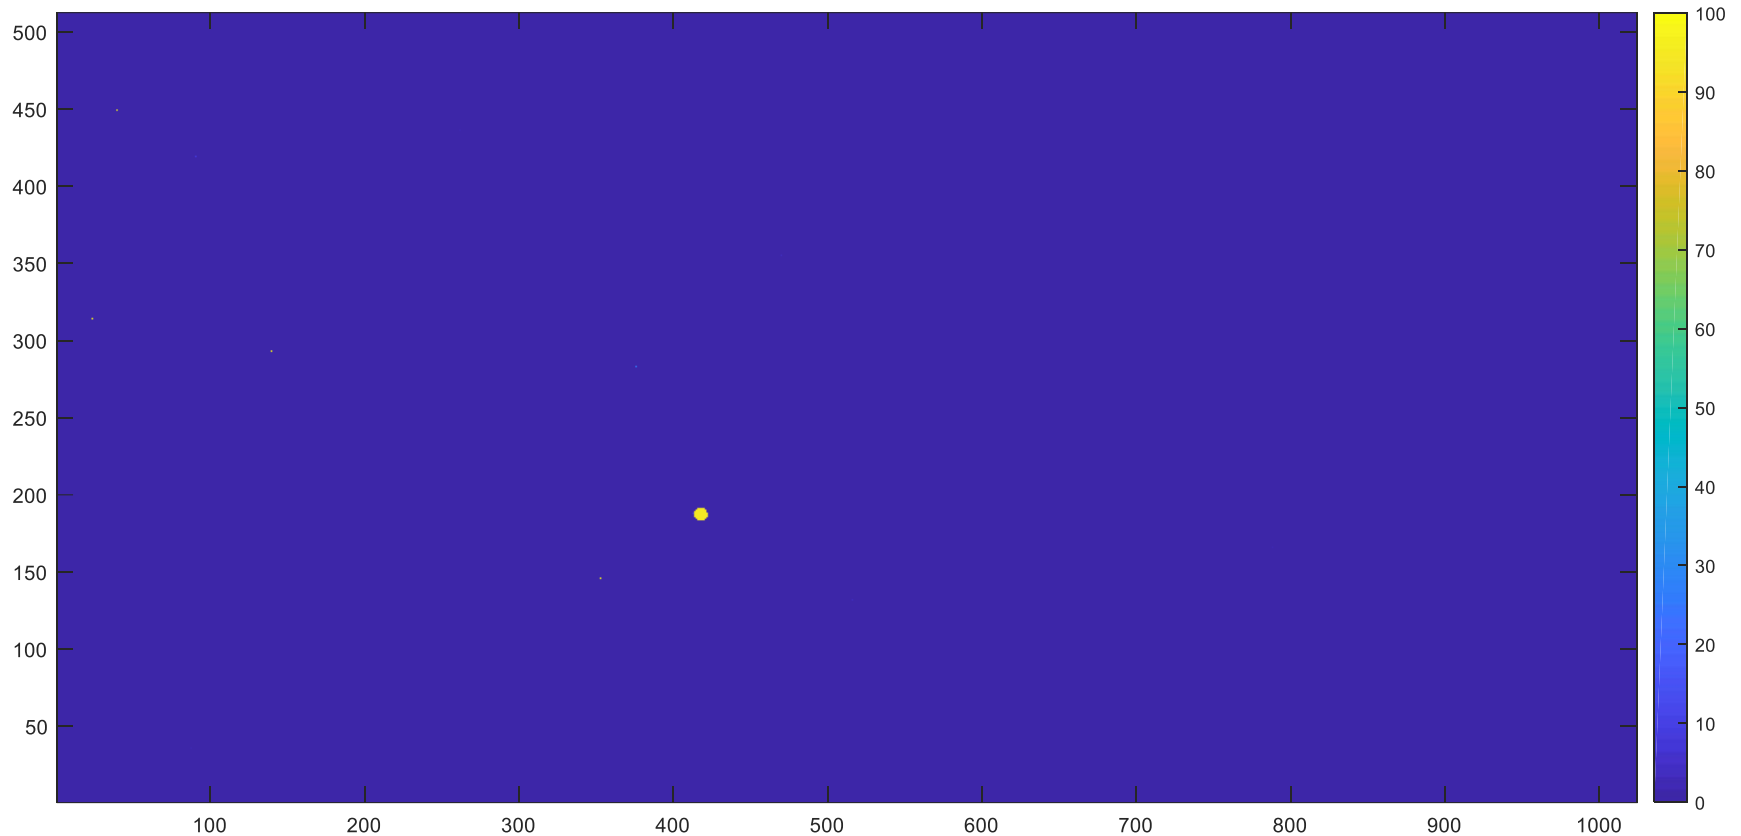

- Sample 100 times for 1s/10s with laser, check output counts

Exposure 1s with a 100 Hz laser source @ITHR=96

Laser test of Flex v1.5D

➤ Sample at different ITHR

Exposure 1s with a 100 Hz laser source @ITHR=32

■ **100 times of stable output observed @ITHR=32/96**

Test of Flex_v1.3_3

- DPULSE wire-bonded to GND
- ~40% output normal in the OCT mode

1674x9 double
