

Report on comparison between MC and Data

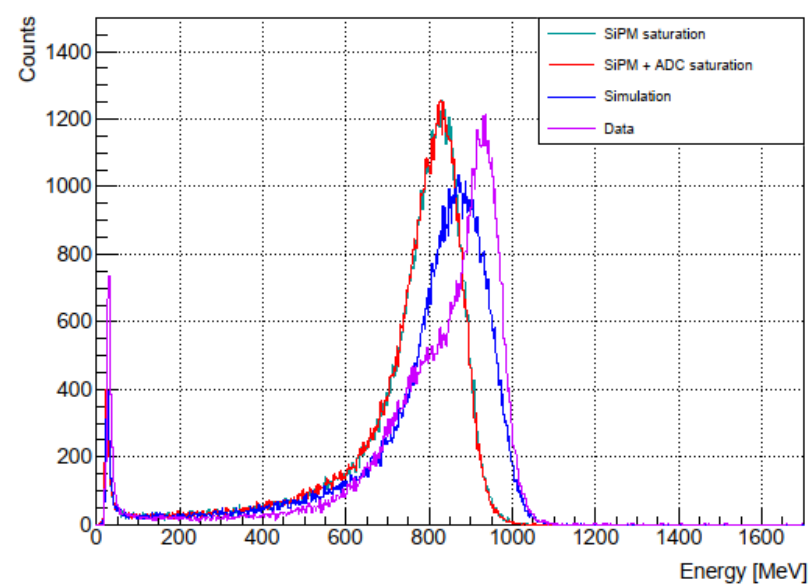

Baohua Qi

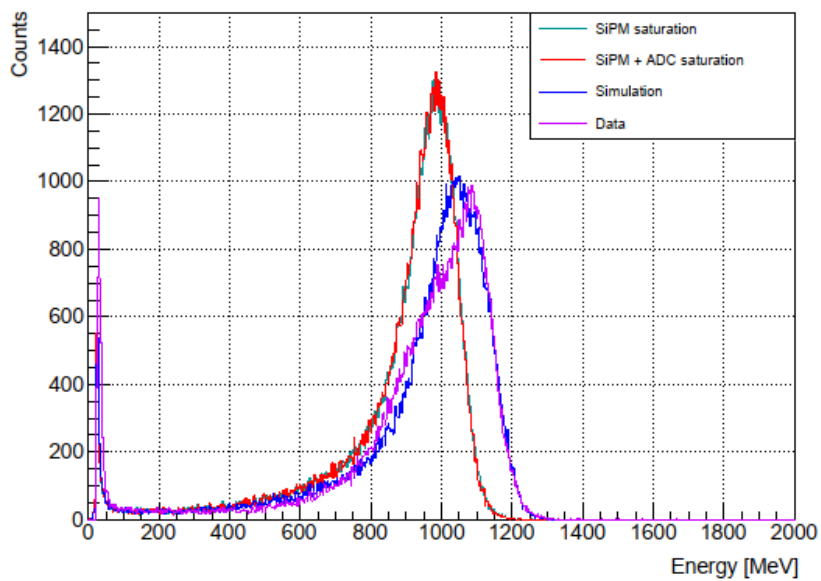

10 GeV

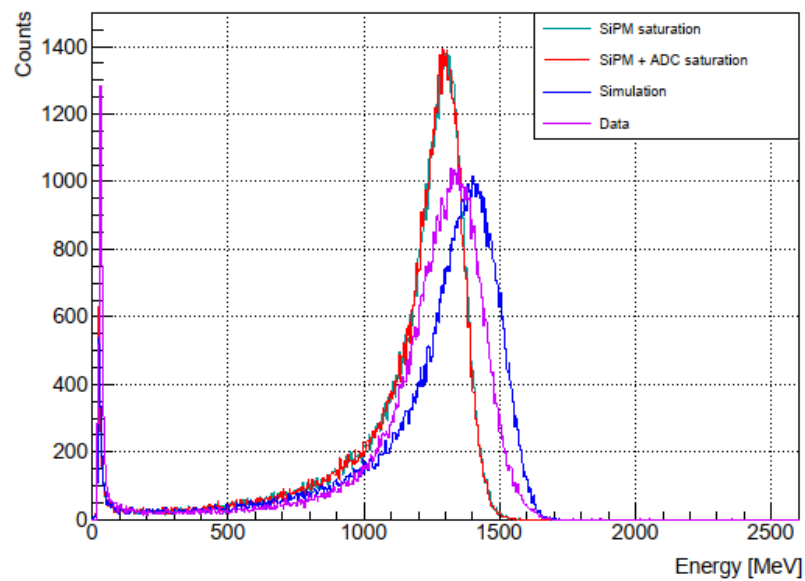

30 GeV

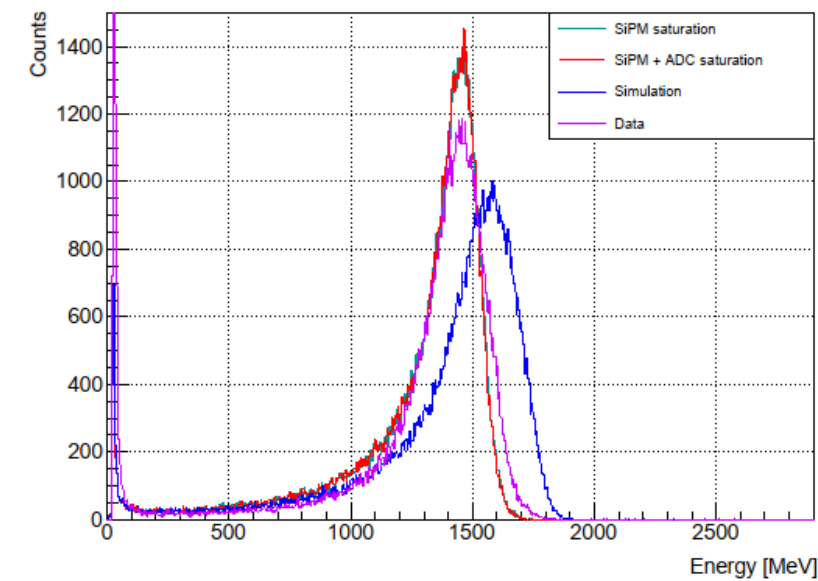

50 GeV

60 GeV

80 GeV

90 GeV

Summary

- Comparison of MC and Data for pion samples.
 - For the π^+ sample with energy lower than 60 GeV:
 - Higher energy deposition in **Data**
 - Tails/platform in **Data**
 - At the energy points higher than 60 GeV:
 - Better consistence between **MC** and **Data**
