

Experimental measurement of neutronic performance at neutron beam line in CSNS

Songlin WANG, Bin ZHOU, TianCheng YI, Fei SHEN,
TianJiao LIANG

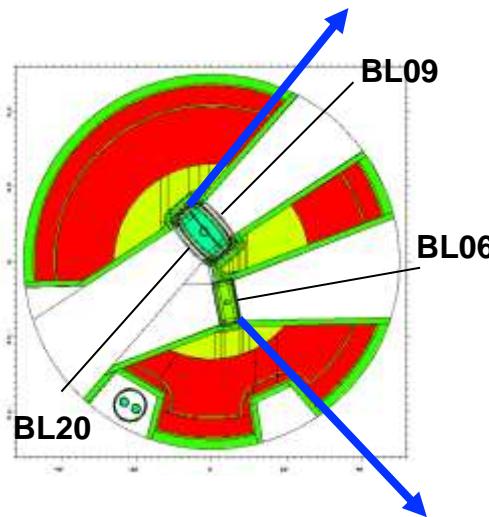

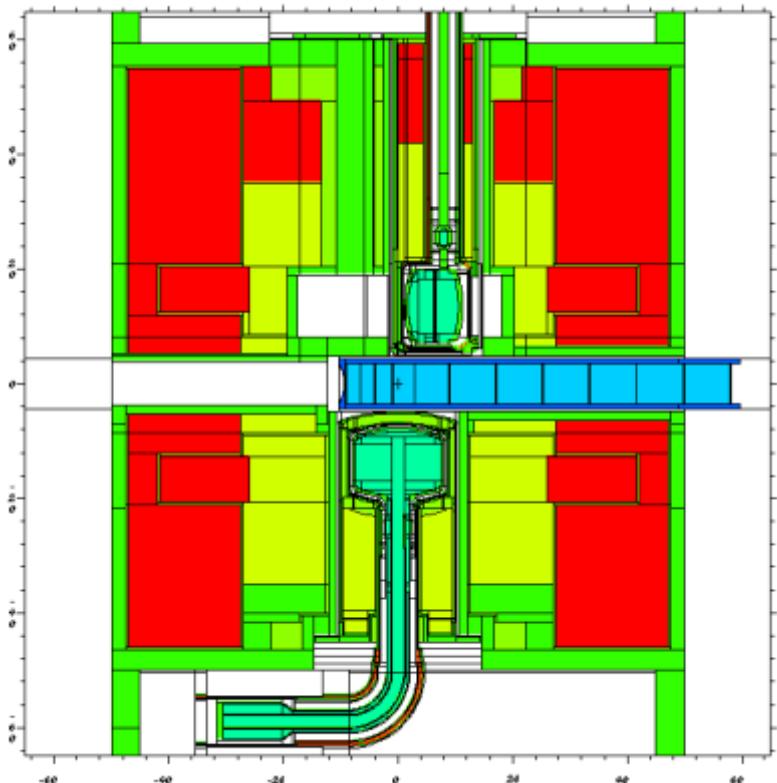

*China Spallation Neutron Source,
Institute of High Energy Physics, CAS*

Outline

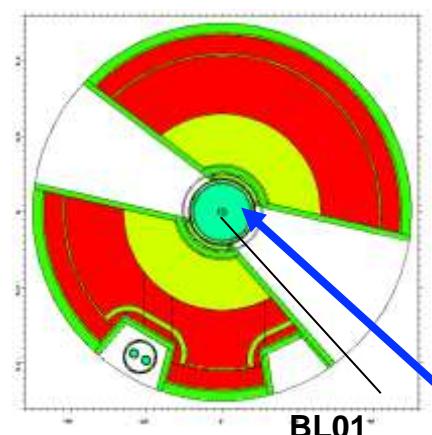

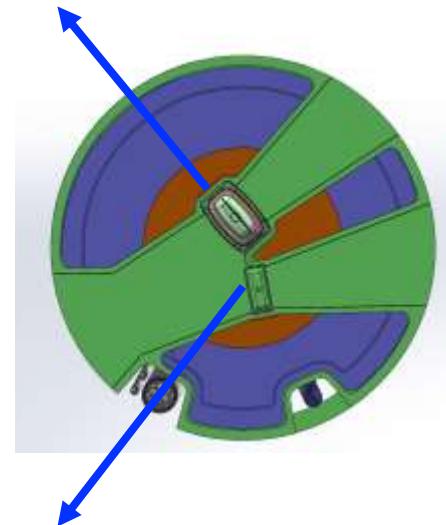

- 1 Neutronic performance simulation**
- 2 Measurement methods
- 3 Neutron Spectra
- 4 Neutron pulse shape
- 5 Summary

TMR engineering geometry

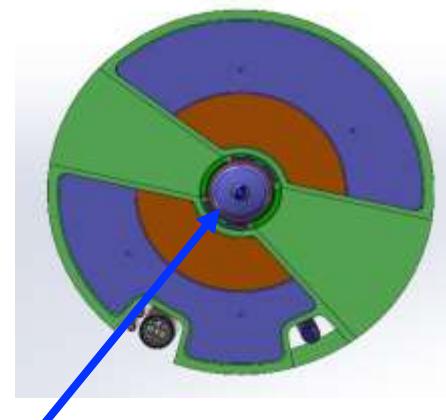

DPHM (Decoupled & Poisoned Hydrogen Moderator)

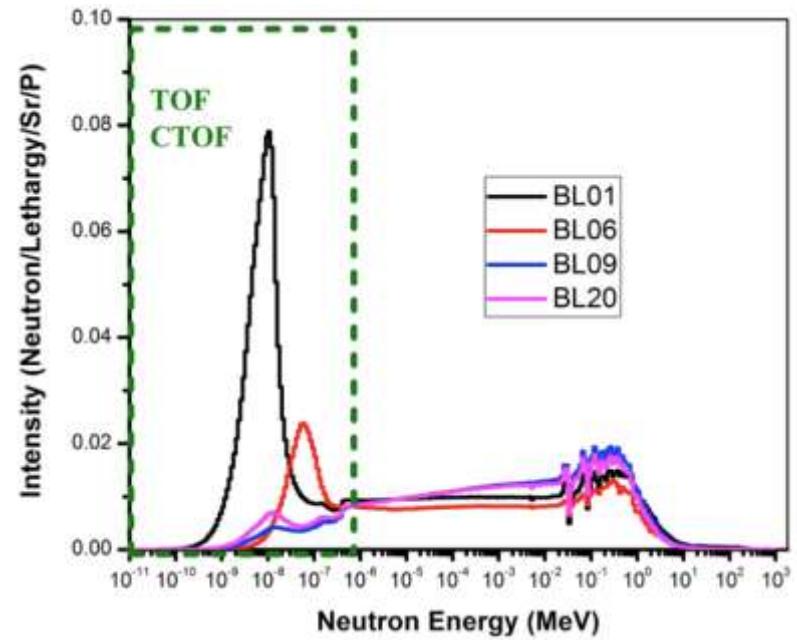

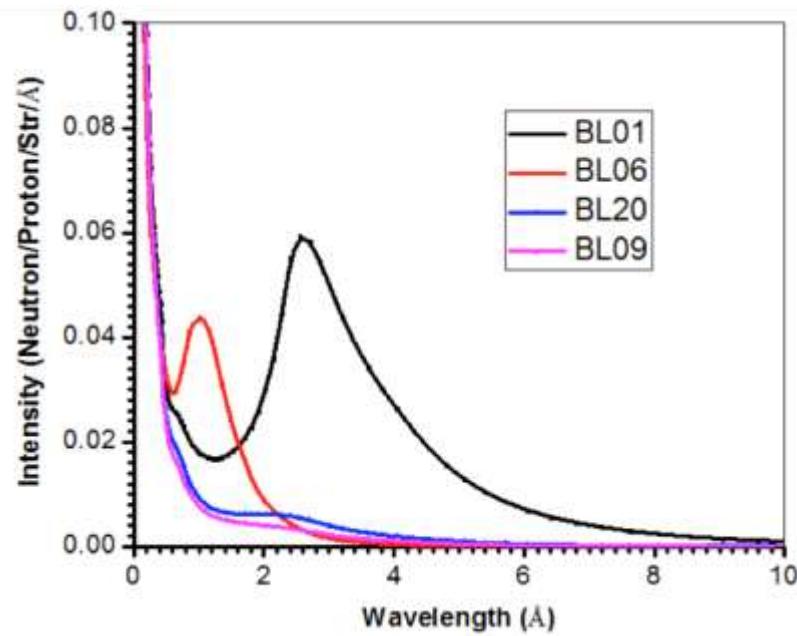

DWM (Decoupled Water moderator)

CHM (Coupled Hydrogen Moderator)

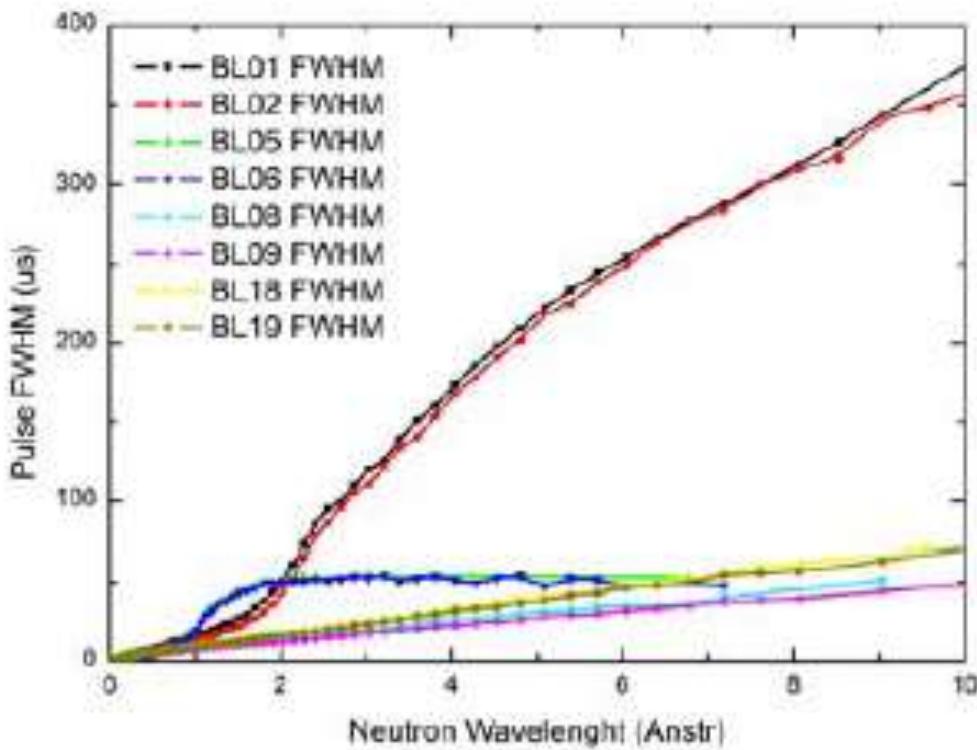

Wavelength spectra of mechanical model

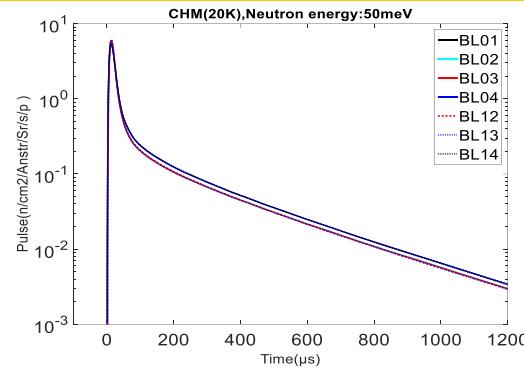

Neutronic performance – Wavelength spectra

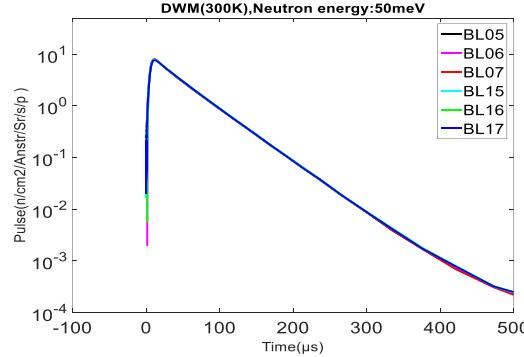

Neutron pulse shape of mechanical model

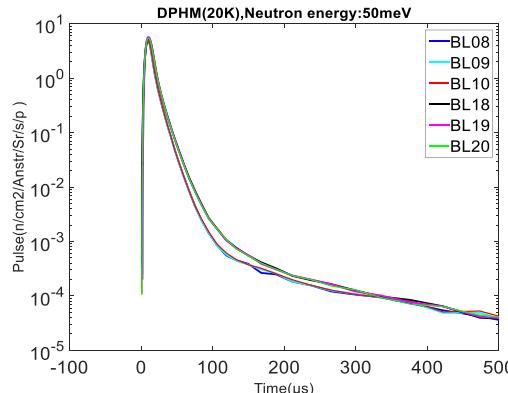

Pulse FWHM

CHM

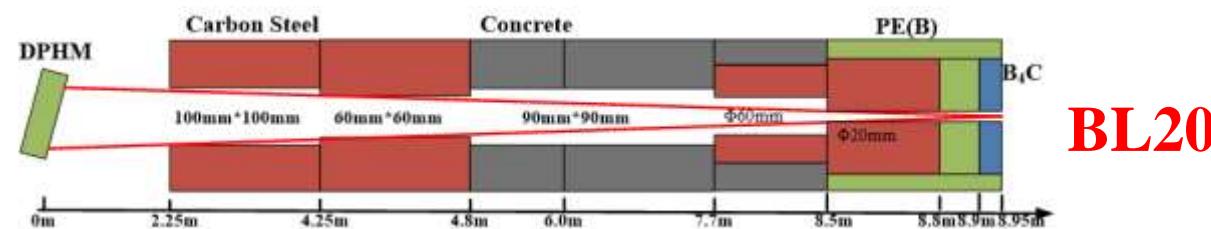

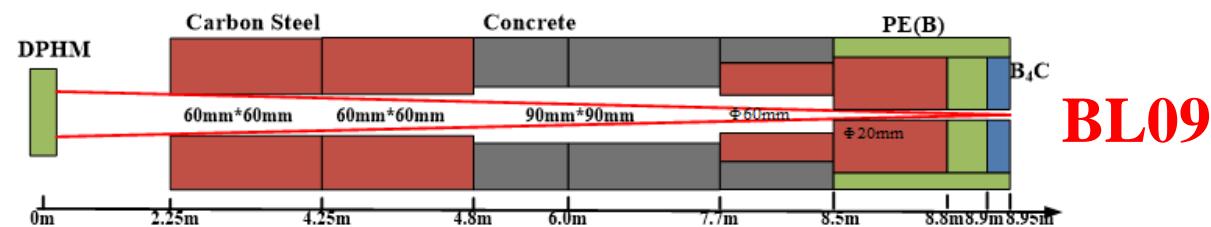

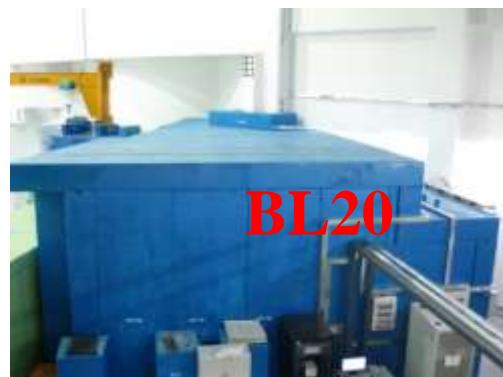

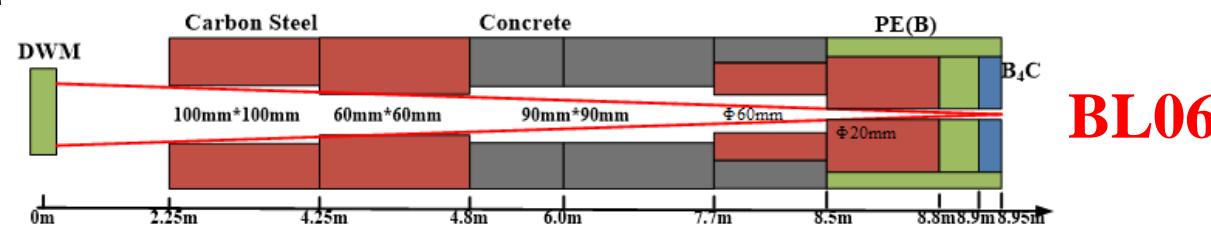

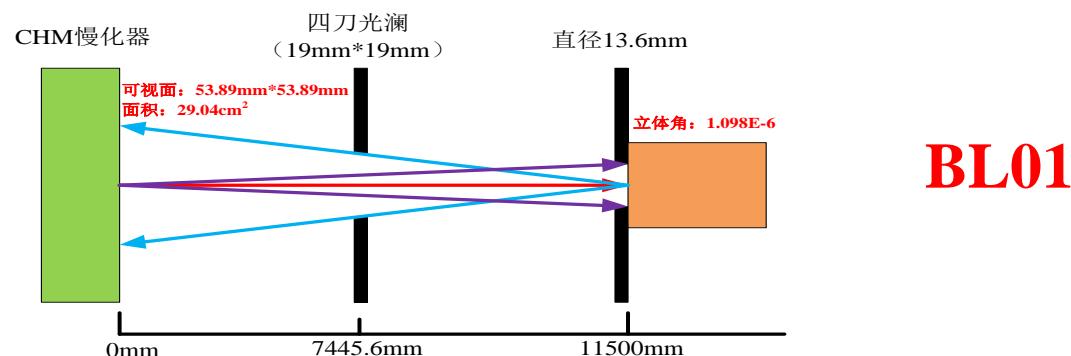

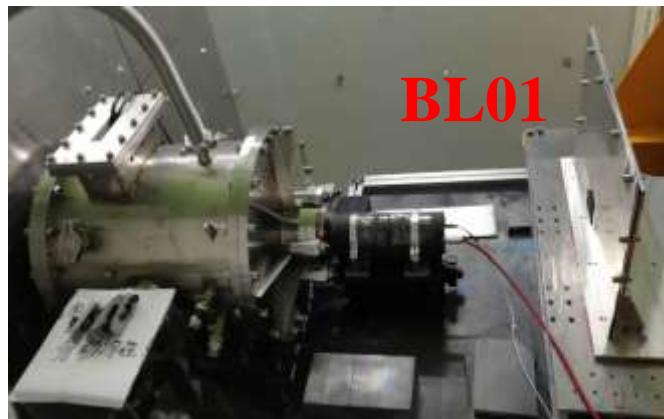

DWM

DPHM

Pulse shape of 1.28 Å neutron

Neutronic performance measurement position

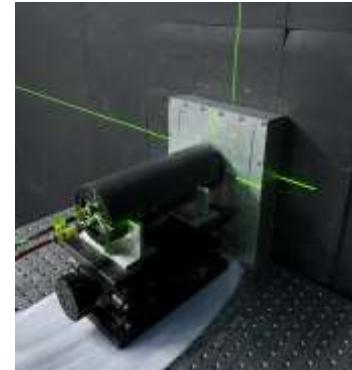

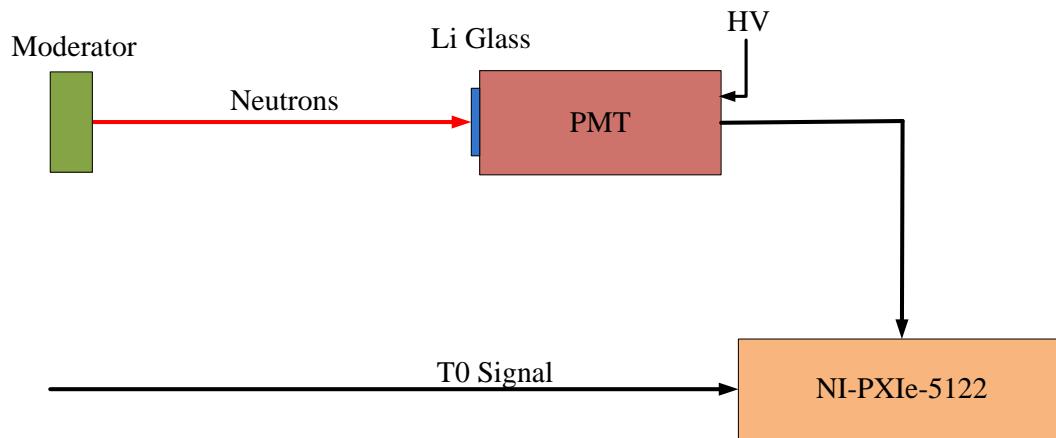

Outline

- 1 Neutronic performance simulation
- 2 **Measurement methods**
- 3 Neutron Spectra
- 4 Neutron pulse shape
- 5 Summary

Wavelength spectra measurement method-CTOF

- Lithium-glass scintillation detector worked at current mode
- Detector anode current signal is recorded by high resolution digitizer
- TOF spectra is expected to measure for single proton pulse

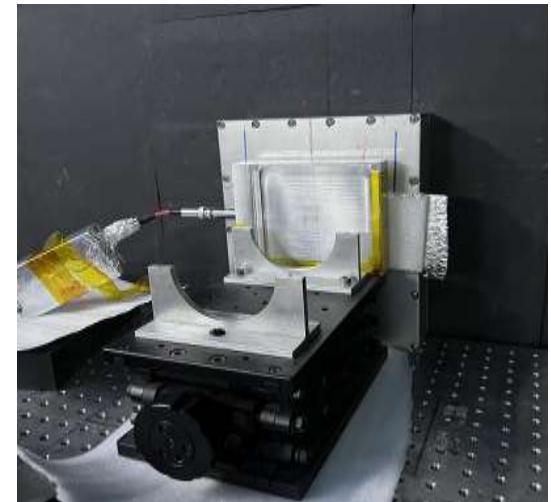

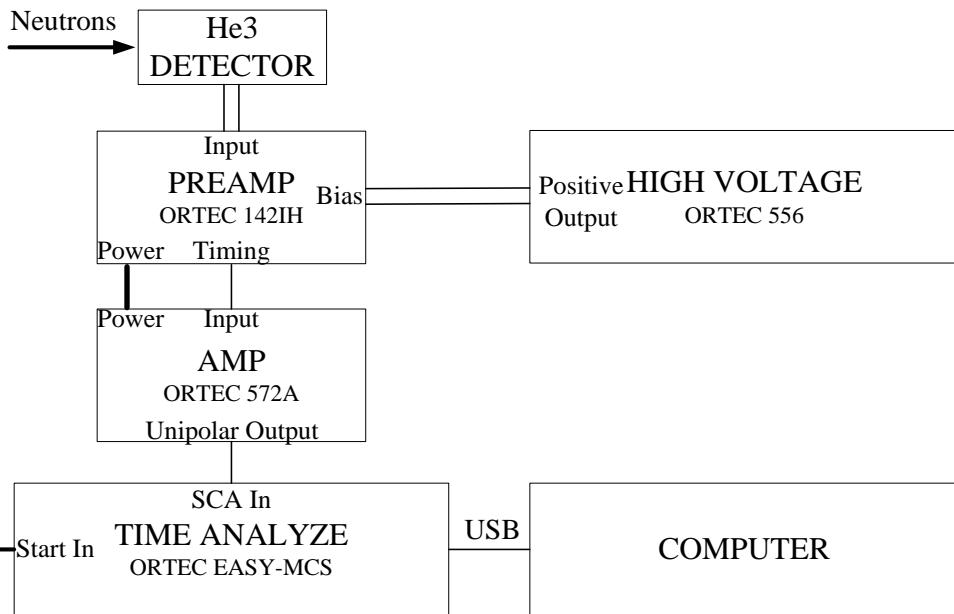

Li glass detector

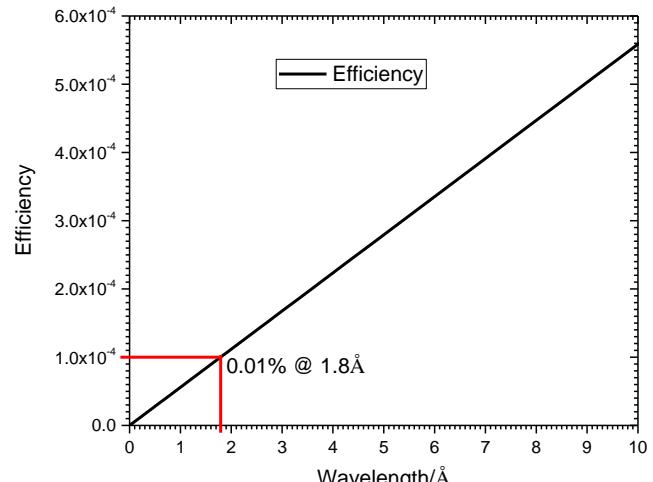

Digitizer

Wavelength spectra measurement method-TOF

- The low efficiency neutron detector to avoid overlap

Low efficiency neutron detector

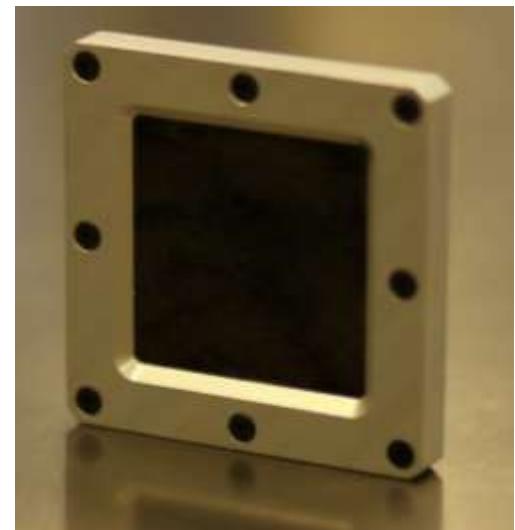

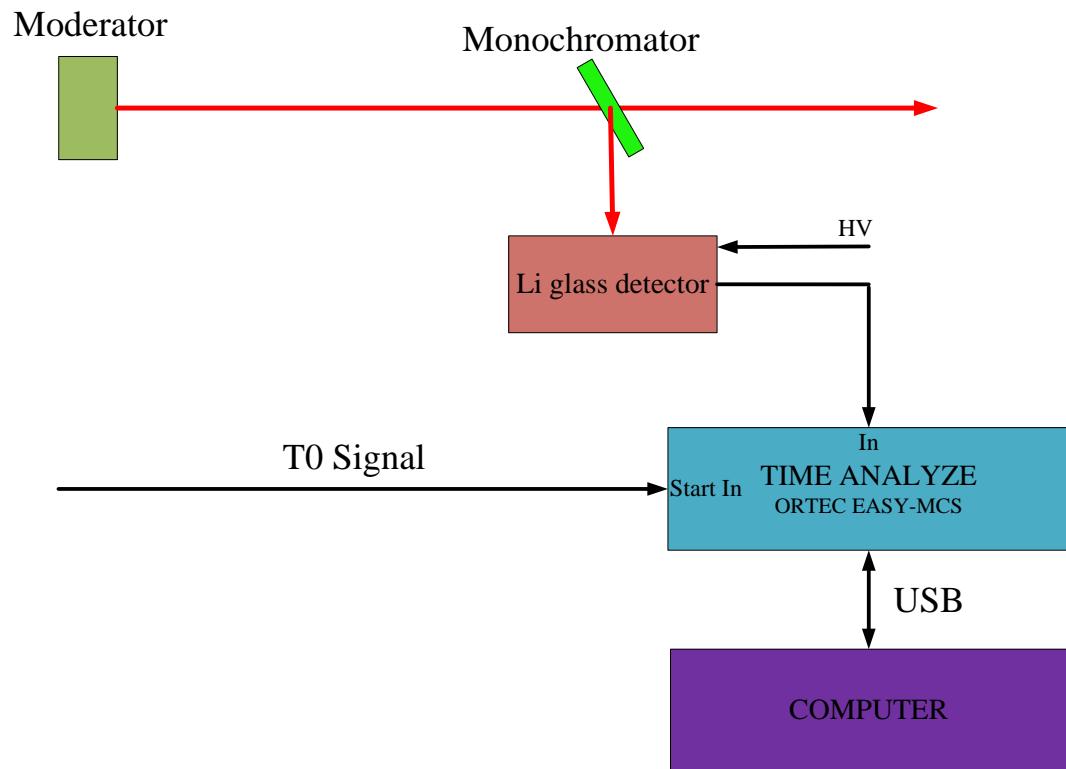

The efficiency line of detector

Pulse shape measurement method

- Bragg diffraction select single wavelength neutron

Mica monochromator

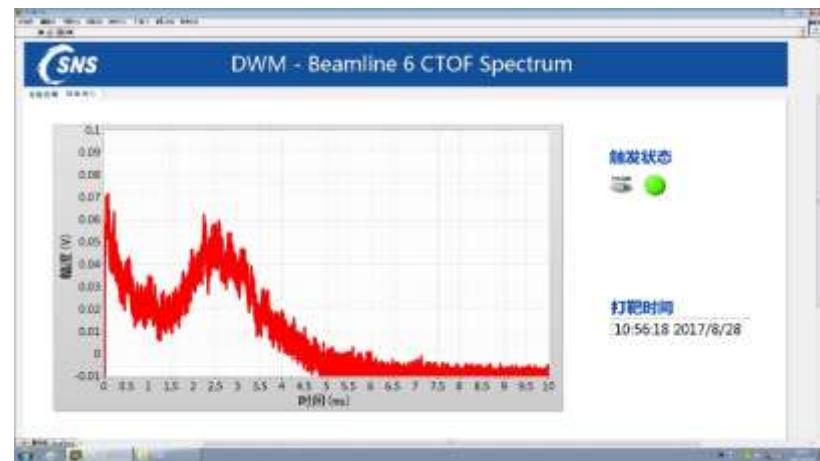

Germanium monochromator

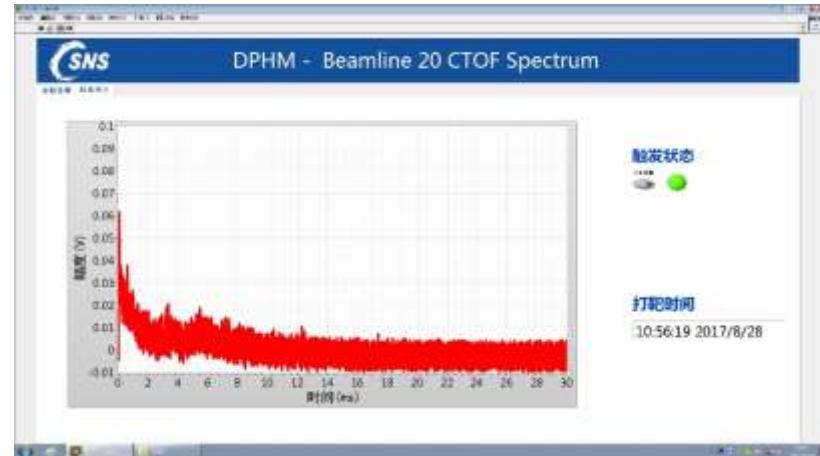

Outline

- 1 Neutronic performance simulation
- 2 Measurement methods
- 3 Neutron Spectra**
- 4 Neutron pulse shape
- 5 Summary

First Neutron (CTOF technique)

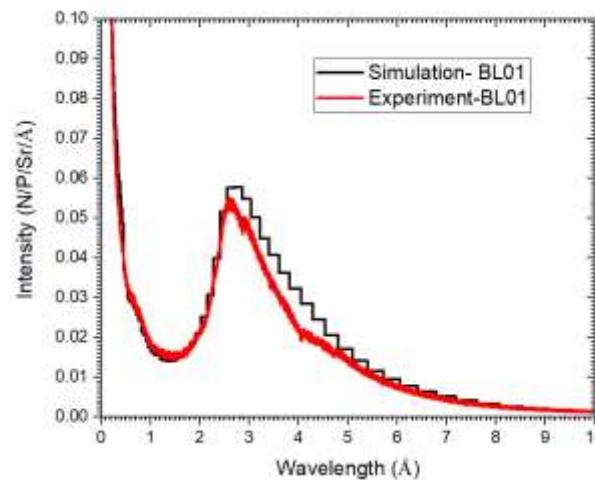

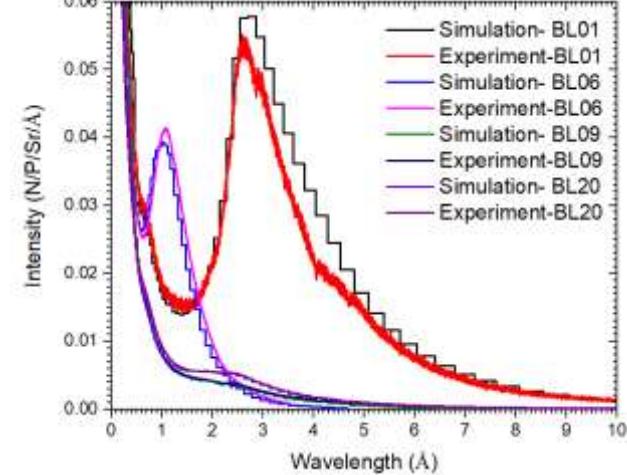

First neutron CTOF spectrum of BL06

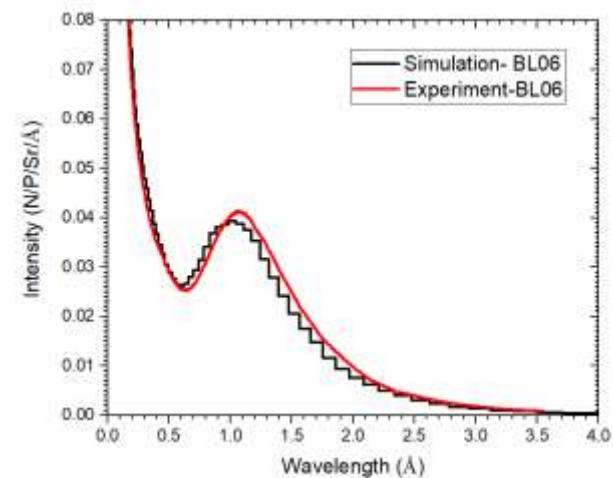

First neutron CTOF spectrum of BL20

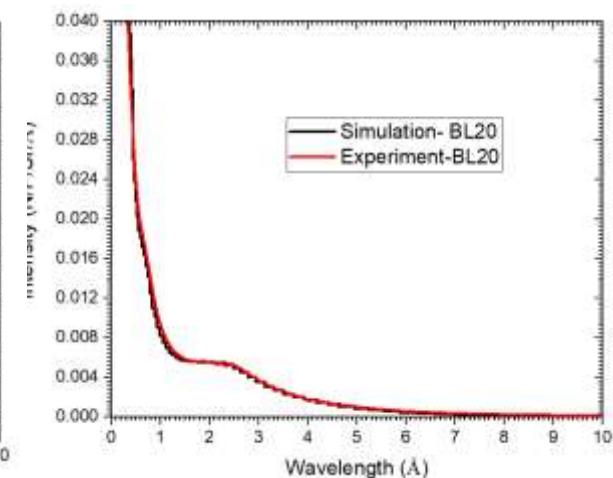

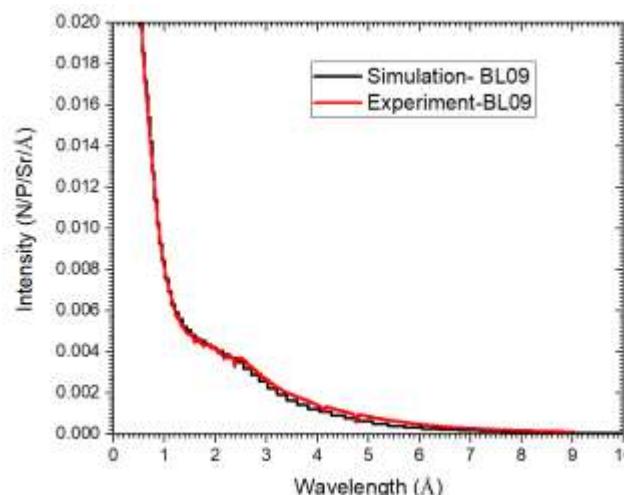

Neutron wavelength spectra result -CTOF

BL01 @ CHM

BL06 @ DWM

BL09 @ DPHM

BL20 @ DPHM

Flux comparison (CTOF and Au activation)

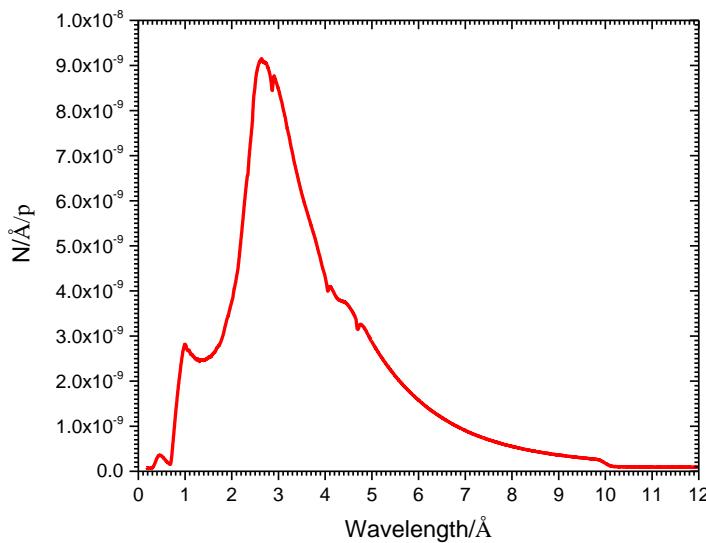

Position: SANS

Length: 11.5m

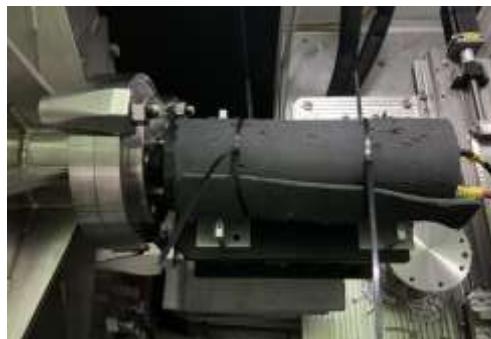

Wavelength band: 0.64Å~10.36Å

Neutron detector: Li glass detector / Au

Method: CTOF/Activation

The wavelength spectra

CTOF

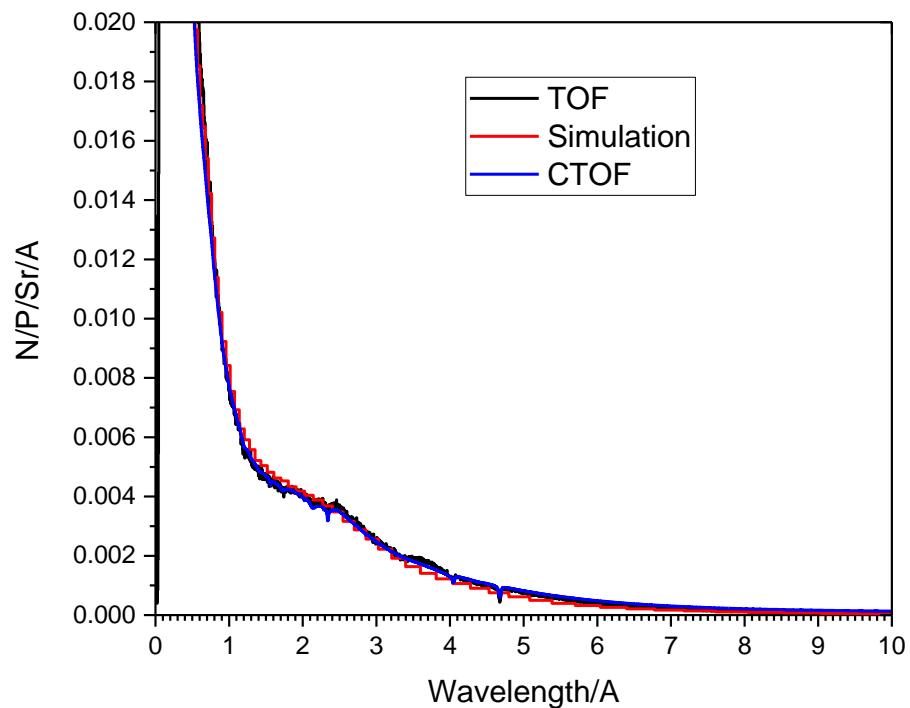

Au activation

	$n/\text{p}/\text{cm}^2$
CTOF	1.74×10^{-8}
Activation	1.70×10^{-8}

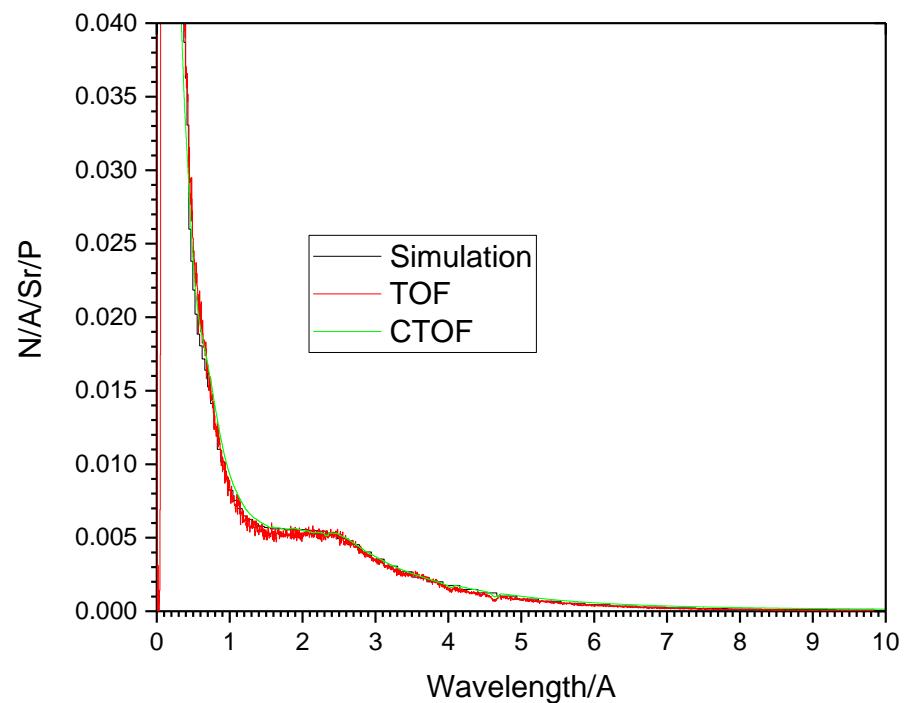

Neutron wavelength spectra result -TOF

- The wavelength spectra of TOF measurement and CTOF measurement agree well with the simulation.

BL09 @ DPHM

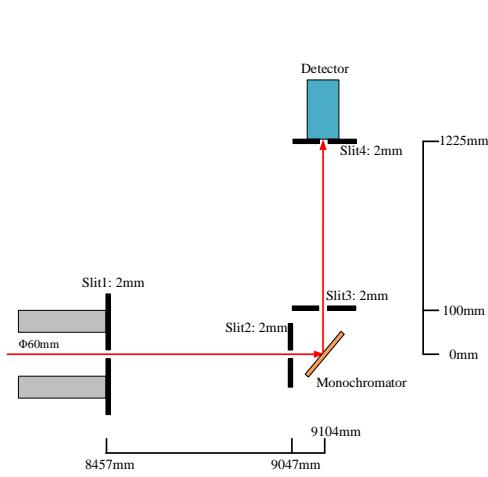

BL20 @ DPHM

Outline

- 1 Neutronic performance simulation
- 2 Measurement methods
- 3 Neutron Spectra
- 4 Neutron pulse shape
- 5 Summary

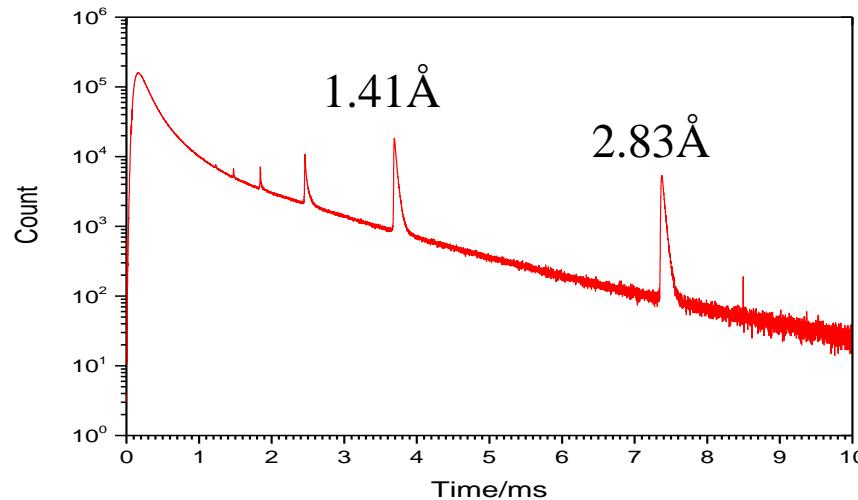

Pulse shape measurement result – BL06

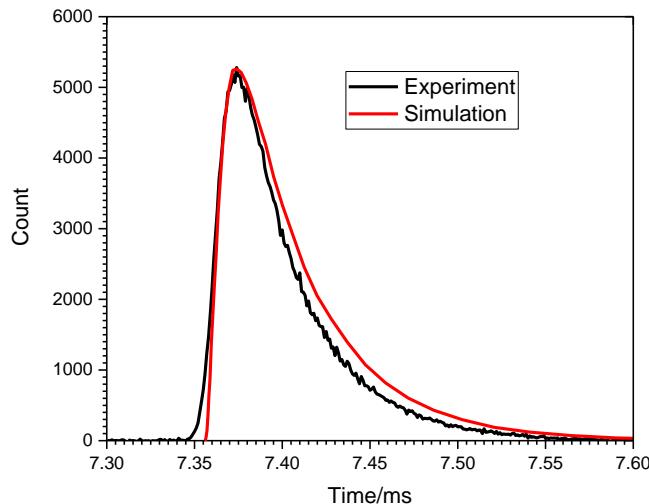

Experiment setup

Beamline	BL06
Moderator	DWM
Diffraction plane	Ge[2 2 0]
Bragg angle	45degree
Wavelength of diffraction neutron	2.83Å/1.41Å
Neutron detector	Li glass detector

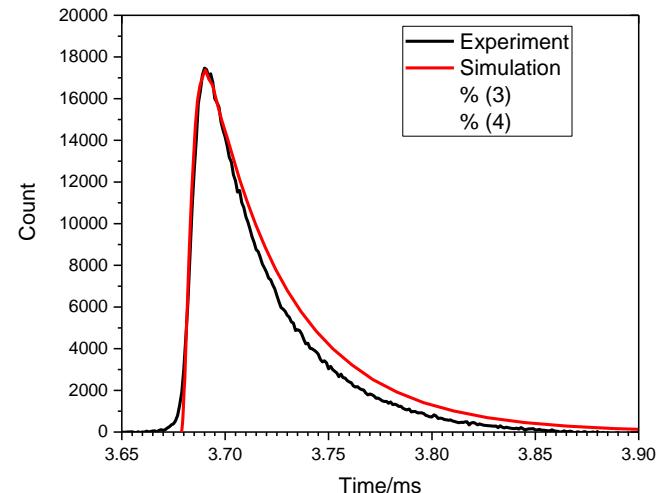

Pulse shape measurement result – BL06

The TOF spectrum

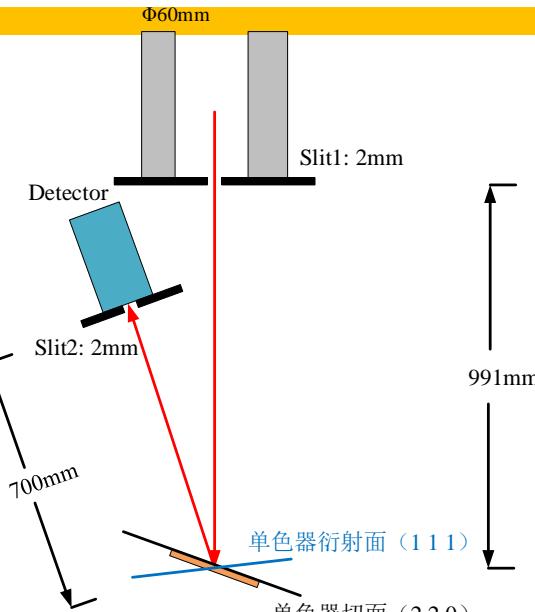

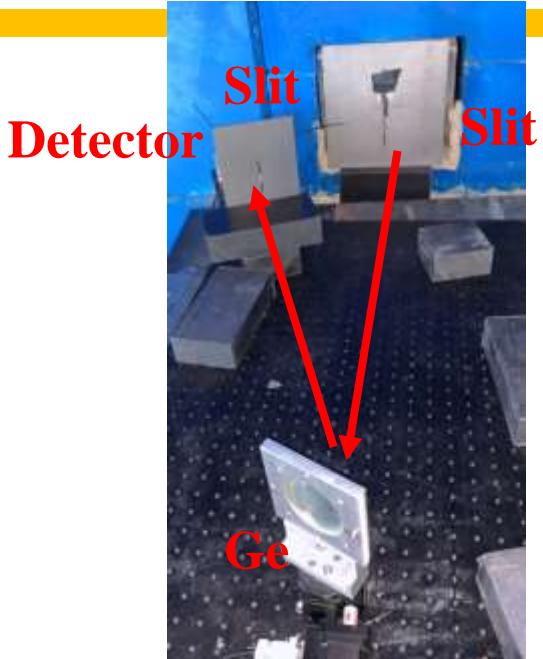

The pulse shape 2.83\AA

The pulse shape 1.41\AA

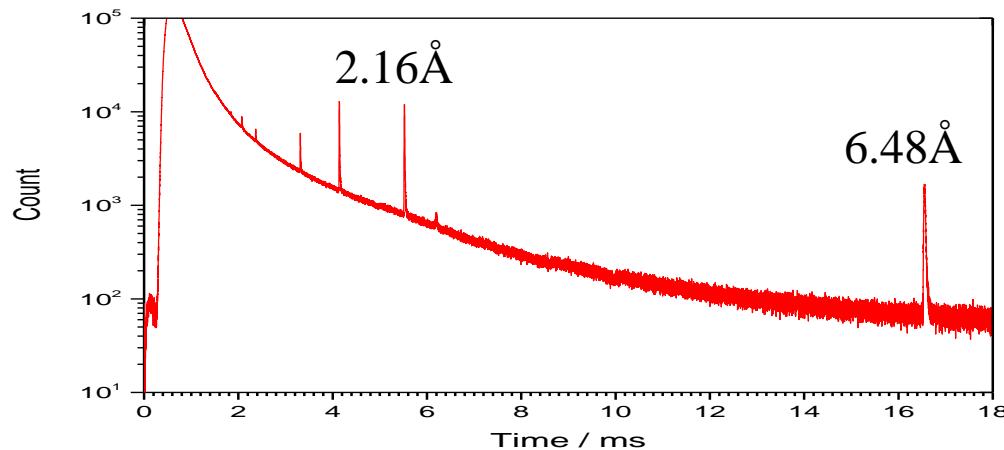

Pulse shape measurement result – BL09

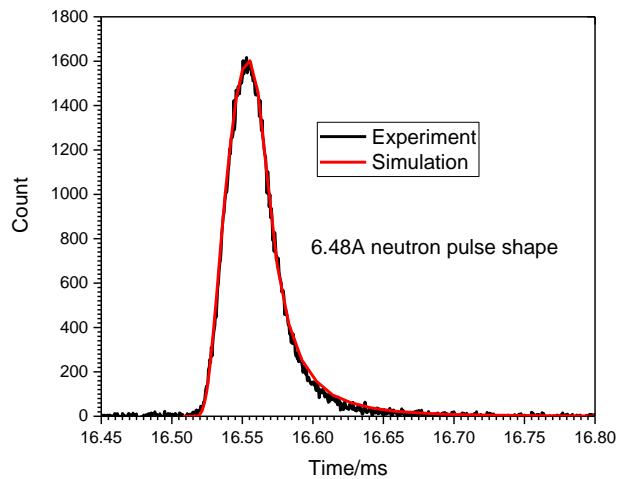

Experiment setup

Beamline	BL09
Moderator	DPHM
Diffraction plane	Ge[1 1 1]
Cut plane	Ge[2 2 0]
Bragg angle	82.6degree
Wavelength of diffraction neutron	6.48Å、2.16Å
Neutron detector	Li glass detector

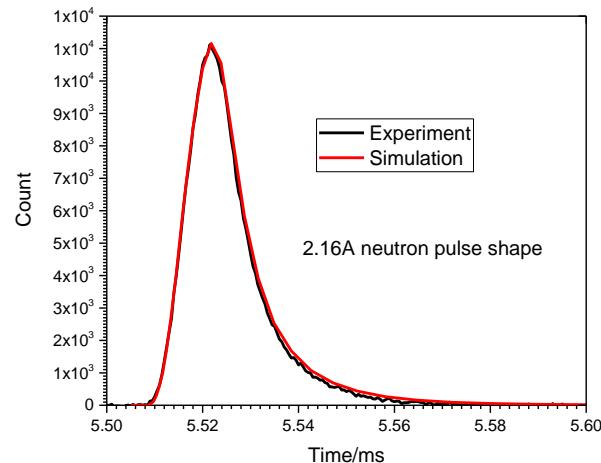

Pulse shape measurement result – BL09

The TOF spectrum

The pulse shape 6.48\AA

The pulse shape 2.16\AA

Outline

- 1 Neutronic performance simulation
- 2 Measurement methods
- 3 Neutron Spectra
- 4 Neutron pulse shape
- 5 Summary

Summary

- The neutron spectra of three moderators were measured and agree well with the simulation.
- The integral flux was verified by activation measurement of gold foil.
- The pulse shape of DPHM and DWM were measured and agree well with the simulation.

Thank you !
