

The 15th Workshop on QCD Phase Transition and Relativistic Heavy-Ion Physics (QPT 2023)

Friday, 15 December 2023 - Tuesday, 19 December 2023

Dehan Hotel

Book of Abstracts

Contents

STAR and sPHENIX overview	1
ALICE overview	1
LHCb overview	1
CMS highlights	1
QCD Phase transition from lattice	1
QCD phase transition from effective models	1
holographic QCD	1
CME experiment	2
spin transport theory	2
heavy flavor physics	2
UPC physics	2
EIC physics	2
Unveiling the dynamics of little-bang nucleosynthesis	2
opening	2
Light Nuclei Production in Au+Au Collisions at 14.6 and 19.6 GeV from RHIC BES-II . . .	3
Mass spectra of meson nonet (pions, kaons, η and η') and the related QCD phase transitions under external magnetic field	3
Bubble dynamics in a first-order quark-hadron transition	3
The QCD phase transition intrigued by turbulence	3
高温高密 QCD 物质中守恒荷涨落性质的输运模型研究	3
fRG study of QCD phase structure under rotation	3
Coupling strength induced BCS-BEC crossover on phase boundary of pion superfluid . . .	3
The nonequilibrium evolution near the phase boundary	4

Net baryon number fluctuations established by rapidity scan of an inhomogeneous system from statistical thermal models	4
Fluctuations of conserved charges in strong magnetic fields in (2+1)-flavor QCD	4
Microscopic Encoding of Macroscopic Universality: Scaling Properties of Dirac Eigenspectra near QCD Chiral Phase Transition	4
Functional renormalization group study of the quark-meson model with ω and ρ vectors meson	4
Recent progress on intermittency analysis in relativistic heavy-ion collisions	4
Functional renormalization group study of neutral and charged pion under magnetic fields in the quark-meson model	5
Dilepton production enhancement from the first-order chiral phase transition	5
Energy Dependence of Intermittency for Charged Hadrons in Au+Au Collisions from the STAR Experiment at RHIC	5
Track finding algorithm for the TPC detector at CEE experiment	5
“准”夸克胶子等离子体中重夸克碰撞能量损失的研究	5
Scaling behaviors of heavy flavor meson suppression and flow in different nuclear collision systems at the LHC	5
Multiplicity dependence of $\sigma\psi(2S)/\sigma J/\psi$ in pp collisions at $\sqrt{s} = 13$ TeV	6
Flavor hierarchy of parton energy loss in quark-gluon plasma from a Bayesian analysis	6
Exotic hadron production and heavy quark polarization in HIC	6
J/ψ production in pp collisions with the PACIAE model	6
Constraining the equation of state with heavy quarks in the quasi-particle model of QCD matter	6
Exploring dead-cone effect on heavy-quark medium-induced gluon radiations	6
Spin alignment for K mesons	7
Vector meson polarization measurements in pp and Pb–Pb collisions with ALICE at the LHC}	7
Spin Polarization, Anomalous Magnetic Moment and Transporation in the magnetized QCD background	7
Measurements of J/ψ polarization and global spin alignment in Ru+Ru and Zr+Zr collisions at $\sqrt{s_{NN}} = 200$ GeV from the STAR experiment	7
Measurements of Global and Local Polarization of Hyperons in Heavy Ion Collisions from STAR	7
A topological realization of spin polarization through vortex formation in collisions of Bose-Einstein condensates	7

Polarized hadron production in unpolarized high energy collisions	8
Spin polarization from Quantum kinetic theory with self-energies and collisions	8
Full-order mode analysis within a mutilated relaxation time approximation	8
Stochastic spin hydrodynamics	8
Momentum and angular correlations in Z/gamma-hadron production in relativistic heavy-ion collisions	8
Deep learning jet modifications in heavy-ion collisions	8
Are gluon showers inside a quark-gluon plasma strongly coupled? a theorist' s test . . .	9
Observation of medium-induced yield enhancement and acoplanarity broadening via h-jet correlations with ALICE	9
Enhancement of baryon-to-meson ratios around jets as a signature of medium response . . .	9
Imaging constituent quark shape of proton with exclusive vector meson production at HERA	9
Flavor dependence of jet quenching in heavy-ion collisions	9
Transverse momentum balance of dijets in Xe+Xe collisions at the LHC	9
Systematic study of flow harmonics via di-hadron correlations at in p+Au, d+Au and $^3\text{He}+\text{Au}$ collisions at 200 GeV	9
correlations in non-uniform temperature system	10
Elliptic anisotropy of hard probes from parton scatterings in small collision systems . . .	10
Elliptic anisotropy measurement of the $f_0(980)$ hadron in proton-lead collisions and evidence of its quark-antiquark composition by CMS	10
The anisotropic flow of identified particles in Au+Au collisions at $\sqrt{s_{NN}} = 3 - 19.6$ GeV from RHIC-STAR	10
Understanding the transverse-momenutm-dependent observables in hard processes in pA and eA	10
Probing the Short-Distance Structure of the Quark-Gluon Plasma with Energy Correlators	11
Rapidity and azimuthal correlations of strong color field	11
Nuclear cluster structure effect in O+O collisions at RHIC energy	11
The relation of global polarization and directed flow in Au+Au collisions at RHIC	11
Recent measurements of the electromagnetic probes at RHIC	11
A UV-Regulated Theory of Diffusion	11
Collision-energy dependence of the Breit-Wheeler process in heavy-ion collisions and its application to nuclear charge radius measurements	11

Measuring QGP temperature with thermal dielectrons with STAR BES-II data	12
探索中子星内部可能的强子夸克相变	12
Decay contributions to the parity-odd fragmentation functions	12
Spin Alignment Induced by Magnetic Moment Polarization	12
Medium-Assisted Enhancement of Exotic Hadron Production from Small to Large Colliding Systems	12
Magneto-birefringence and axial Ward identity at finite temperature and density	12
Chiral vortical catalysis	13
Search for the Chiral Magnetic Effect with Forced Match of Multiplicity and Elliptic Flow in Isobar Collisions at STAR	13
The role of neutral and charged pions in (inverse) magnetic catalysis and diamagnetism .	13
N-particle irreducible actions for stochastic fluids	13
(Magneto-)thermoelectric effects in QCD medium with multiple conserved charges . . .	13
Production of $X_{c\bar{s}\bar{c}\bar{s}}$ in heavy ion collisions	13
Quantum computing for parton fragmentation functions	14
Searching CEP in a holographic model with machine learning	14
Searching CEP in a holographic model with machine learning	14
Light quark jet quenching in higher derivative gravity	14
Pion dynamics in a soft-wall AdS-QCD model	14
Critical endpoint dynamics in 2-flavor holographic QCD: Understanding critical phenomena	14
Bubble nucleation and gravitational waves from holography	14
Holographic imaginary potential of a quark antiquark pair in the presence of gluon condensation	15
Investigating high energy proton-proton collisions with a multi-phase transport model coupled with PYTHIA8 initial conditions	15
Validation of GPU-accelerated parton cascade with elliptic flow	15
Exploring Nuclear Structure from Relativistic Heavy Ion Collisions	15
Machine learning in QCD	15
quantum computing in QCD	15
JET physics	16
HIAF and CEE	16

flash talks	16
next QPT	16
acknowledgment	16
Welcome	16
Opening	16
HENPIC overview	16
Spin polarization and chiral effect	17
Jet and heavy flavor	17
From heavy ion to EIC	17
Summary	17
Awards	17

parallel I / 188

Track finding algorithm for the TPC detector at CEE experiment

Corresponding Author: guoq@ihep.ac.cn

parallel II / 189

“准”夸克胶子等离子体中重夸克碰撞能量损失的研究

Corresponding Author: yunguo@gxnu.edu.cn

parallel II / 190

Scaling behaviors of heavy flavor meson suppression and flow in different nuclear collision systems at the LHC

Corresponding Author: lisq79@jnxu.edu.cn

parallel II / 191

Multiplicity dependence of $\sigma\psi(2S)/\sigma J/\psi$ in pp collisions at $\sqrt{s} = 13$ TeV

parallel II / 192

Flavor hierarchy of parton energy loss in quark-gluon plasma from a Bayesian analysis

parallel II / 193

Exotic hadron production and heavy quark polarization in HIC

Corresponding Author: baoyi.chen@tju.edu.cn

parallel II / 194

J/ψ production in pp collisions with the PACIAE model

Corresponding Author: wenchao.zhang@snnu.edu.cn

parallel II / 195

Constraining the equation of state with heavy quarks in the quasi-particle model of QCD matter

Corresponding Author: 1589086324@qq.com

parallel II / 196

Exploring dead-cone effect on heavy-quark medium-induced gluon radiations

Corresponding Author: mingze-li@mails.ccnu.edu.cn

parallel II / 197

Spin alignment for K mesons

Corresponding Author: shipu@ustc.edu.cn

parallel II / 198

Vector meson polarization measurements in pp and Pb–Pb collisions with ALICE at the LHC}

Corresponding Author: baixiaozhi@ustc.edu.cn

parallel II / 199

Spin Polarization, Anomalous Magnetic Moment and Transporation in the magnetized QCD background

Corresponding Author: fengsq@ctgu.edu.cn

parallel II / 200

Measurements of J/ψ polarization and global spin alignment in Ru+Ru and Zr+Zr collisions at $\sqrt{s_{NN}} = 200$ GeV from the STAR experiment

Corresponding Author: yangqian2020@sdu.edu.cn

parallel II / 201

Measurements of Global and Local Polarization of Hyperons in Heavy Ion Collisions from STAR

Corresponding Author: gouxingrui123@163.com

parallel II / 202

A topological realization of spin polarization through vortex formation in collisions of Bose-Einstein condensates

Corresponding Author: jdeng@sdu.edu.cn

parallel II / 203

Polarized hadron production in unpolarized high energy collisions

Corresponding Author: shuyi@sdu.edu.cn

parallel II / 204

Spin polarization from Quantum kinetic theory with self-energies and collisions

Corresponding Author: fangshuo@mail.ustc.edu.cn

parallel II / 205

Full-order mode analysis within a mutilated relaxation time approximation

Corresponding Author: hu-j23@fzu.edu.cn

parallel II / 206

Stochastic spin hydrodynamics

Corresponding Author: yanglixin@fudan.edu.cn

parallel III / 207

Momentum and angular correlations in Z/γ -hadron production in relativistic heavy-ion collisions

Corresponding Author: xm2014111654@mails.ccnu.edu.cn

parallel III / 208

Deep learning jet modifications in heavy-ion collisions

Corresponding Author: yilun.du@iat.cn

parallel III / 209

Are gluon showers inside a quark-gluon plasma strongly coupled? a theorist' s test

Corresponding Author: oae2ft@virginia.edu

parallel III / 210

Observation of medium-induced yield enhancement and acoplanarity broadening via h-jet correlations with ALICE

Corresponding Author: yzhhou@mails.ccnu.edu.cn

parallel III / 211

Enhancement of baryon-to-meson ratios around jets as a signature of medium response

Corresponding Author: aluo@sdu.edu.cn

parallel III / 212

Imaging constituent quark shape of proton with exclusive vector meson production at HERA

Corresponding Author: wxiangphy@gmail.com

parallel III / 213

Flavor dependence of jet quenching in heavy-ion collisions

Corresponding Author: zhangshanl@mails.ccnu.edu.cn

parallel III / 214

Transverse momentum balance of dijets in Xe+Xe collisions at the LHC

Corresponding Author: yaoli2017@mails.ccnu.edu.cn

parallel III / 215

**Systematic study of flow harmonics via di-hadron correlations at
in p+Au, d+Au and $^3\text{He}+\text{Au}$ collisions at 200 GeV**

Corresponding Author: maowu.nie@sdu.edu.cn

parallel III / 216

correlations in non-uniform temperature system

Corresponding Author: lijiajiang@nwu.edu.cn

parallel III / 217

**Elliptic anisotropy of hard probes from parton scatterings in small
collision systems**

Corresponding Author: tsy@wtu.edu.cn

parallel III / 218

**Elliptic anisotropy measurement of the $f_0(980)$ hadron in proton-
lead collisions and evidence of its quark-antiquark composition
by CMS**

Corresponding Author: gu180@purdue.edu

parallel III / 219

**The anisotropic flow of identified particles in Au+Au collisions at
 $\sqrt{s_{NN}} = 3 - 19.6$ GeV from RHIC-STAR**

Corresponding Author: wuxing6218@mails.ccnu.edu.cn

parallel III / 220

**Understanding the transverse-momentm-dependent observables
in hard processes in pA and eA**

Corresponding Author: weiyaoke@ccnu.edu.cn

parallel III / 221

Probing the Short-Distance Structure of the Quark-Gluon Plasma with Energy Correlators

Corresponding Author: yangzhong1994@mails.cnu.edu.cn

parallel III / 222

Rapidity and azimuthal correlations of strong color field

Corresponding Author: xumm@cnu.edu.cn

parallel III / 223

Nuclear cluster structure effect in O+O collisions at RHIC energy

Corresponding Author: zhaoxinli127@126.com

parallel III / 224

The relation of global polarization and directed flow in Au+Au collisions at RHIC

Corresponding Author: jiangzf@mails.cnu.edu.cn

parallel I / 225

Recent measurements of the electromagnetic probes at RHIC

Corresponding Author: chiyang@sdu.edu.cn

parallel I / 226

A UV-Regulated Theory of Diffusion

Corresponding Author: abbasi.physics@gmail.com

parallel I / 227

Collision-energy dependence of the Breit-Wheeler process in heavy-ion collisions and its application to nuclear charge radius measurements
