

# 第八届手征有效场论研讨会

Friday, October 27, 2023 - Tuesday, October 31, 2023

中州国际饭店中华厅

## Book of Abstracts

# Contents

河南大学校领导致辞 . . . . .	1
河南大学校领导致辞 . . . . .	1
大会主席致辞 . . . . .	1
Recent highlights at BESIII and future prospects . . . . .	1
Recent results on hadrons at Belle and BelleII . . . . .	1
HIAF 上的不稳定核物理研究 . . . . .	1
Some applications of nucleon four-point correlation functions . . . . .	1
大会主席致辞 . . . . .	1
合影 . . . . .	1
Recent highlights at BESIII and future prospects . . . . .	2
Recent results on hadrons at Belle and BelleII . . . . .	2
HIAF 上的不稳定核物理研究 . . . . .	2
Some applications of nucleon four-point correlation functions . . . . .	2
Advances in modeling structure and decay properties of deformed nuclei with nuclear chiral Hamiltonians . . . . .	2
Chiral Effective Field Theory for QCD and Electroweak Theories . . . . .	2
在 BS 方程的框架下研究分子态 . . . . .	3
Chiral EFT and heavy hadronic molecules . . . . .	3
Discovery and discovery potential of doubly heavy baryon . . . . .	3
Spin entanglement in neutron-proton scattering . . . . .	3
Method for measuring the proton charge radius from the timelike region . . . . .	3
Study the multiquark states with the chiral unitary approach . . . . .	3
Quark model with hidden local symmetry and its application to the hadron spectrum . . . . .	3
The Study of the Singularity of Single loop in Decay process . . . . .	4

QCD phase transition and its microscopic origin . . . . .	4
Lattice QCD study of the exotic hadrons . . . . .	4
Rigorous Roy equations meet precise lattice data: pi-pi scattering at unphysical pion masses . . . . .	4
Nonlocal Interactions, its conception and developments . . . . .	4
Chiral EFT prediction for $0\nu\beta\beta$ decay at leading order . . . . .	4
Study of near-threshold exotic state from coupled-channel effect . . . . .	4
分组讨论 . . . . .	5
中高能重离子碰撞中核结团和超核结团产生研究 . . . . .	5
Recent progress in lattice chiral effective field theory . . . . .	5
Gamow 壳模型计算滴线外原子核共振结构 . . . . .	5
DiPion LCDAs, a possible interplay between conformal expansion and ChEFT . . . . .	5
Covariant chiral nuclear force–recent developments . . . . .	5
Effects of scale symmetry with chEFT in nuclear matter under relativistic mean field scheme . . . . .	5
用 Roy-Steiner 方程研究 Pi-N 散射的阈下共振态 . . . . .	6
LEC relations in baryon ChPT from chiral quark model . . . . .	6
Bayesian method for fitting the low-energy constants in chiral perturbation theory . . . . .	6
The electromagnetic form factors of baryons from chiral EFT . . . . .	6
Dark sector effective field theory . . . . .	6
Bubble nucleation in the Polyakov quark-meson model . . . . .	6
Effective field theory with resonant P-wave interaction . . . . .	7
Two-pole structures as a universal phenomenon dictated by coupled-channel chiral dynam- ics . . . . .	7
Generalized parton distributions in spin-3/2 particles . . . . .	7
Study of doubly charmed exotic mesons in heavy quark effective field theory . . . . .	7
闭幕 . . . . .	7

## 合影

10

## Recent highlights at BESIII and future prospects

Corresponding Author: xiaorui@ucas.ac.cn

11

## Recent results on hadrons at Belle and BelleII

Corresponding Author: shencp@fudan.edu.cn

12

## HIAF 上的不稳定核物理研究

13

## Some applications of nucleon four-point correlation functions

Corresponding Author: xu.feng@pku.edu.cn

14

## Advances in modeling structure and decay properties of deformed nuclei with nuclear chiral Hamiltonians

Corresponding Author: yao.jiangming@gmail.com

15

## Chiral Effective Field Theory for QCD and Electroweak Theories

Corresponding Author: jhyu@itp.ac.cn

16

## **在 BS 方程的框架下研究分子态**

Corresponding Author: khw020056@hotmail.com

17

## **Chiral EFT and heavy hadronic molecules**

Corresponding Author: wangbo@hbu.edu.cn

18

## **Discovery and discovery potential of doubly heavy baryon**

Corresponding Author: qqin@hust.edu.cn

19

## **Spin entanglement in neutron-proton scattering**

Corresponding Author: dbai@itp.ac.cn

20

## **Method for measuring the proton charge radius from the time-like region**

Corresponding Author: fkguo@itp.ac.cn

21

## **Study the multiquark states with the chiral unitary approach**

Corresponding Author: xiaochw@gxnu.edu.cn

22

## **Quark model with hidden local symmetry and its application to the hadron spectrum**

**Corresponding Author:** hebingran@nju.edu.cn

23

### **The Study of the Singularity of Single loop in Decay process**

**Corresponding Author:** wujiajun@ucas.ac.cn

24

### **QCD phase transition and its microscopic origin**

**Corresponding Author:** hengtong.ding@mail.ccnu.edu.cn

25

### **Lattice QCD study of the exotic hadrons**

**Corresponding Author:** liuming@impcas.ac.cn

26

### **Rigorous Roy equations meet precise lattice data: pi-pi scattering at unphysical pion masses**

**Corresponding Author:** xionghuicao@pku.edu.cn

27

### **Nonlocal Interactions, its conception and developments**

**Corresponding Author:** whj@jlu.edu.cn

28

### **Chiral EFT prediction for $0\nu\beta\beta$ decay at leading order**

**Corresponding Author:** pwzhao@pku.edu.cn

29

## **Study of near-threshold exotic state from coupled-channel effect**

**Corresponding Author:** zhiyang@uestc.edu.cn

30

## **分组讨论**

31

## **中高能重离子碰撞中核结团和超核结团产生研究**

**Corresponding Author:** fengzhq@scut.edu.cn

32

## **Recent progress in lattice chiral effective field theory**

**Corresponding Author:** bnlv@giscaep.ac.cn

33

## **Gamow 壳模型计算滴线外原子核共振结构**

**Corresponding Author:** jianguo\_li@pku.edu.cn

34

## **DiPion LCDAs, a possible interplay between conformal expansion and ChEFT**

**Corresponding Author:** scheng@hnu.edu.cn

35

## **Covariant chiral nuclear force—recent developments**

**Corresponding Author:** ljxwohool@sina.com

36

**Effects of scale symmetry with chEFT in nuclear matter under relativistic mean field scheme**

Corresponding Author: yaoma@pku.edu.cn

37

**用 Roy-Steiner 方程研究 Pi-N 散射的阈下共振态**

Corresponding Author: liquzhi@scu.edu.cn

38

**LEC relations in baryon ChPT from chiral quark model**

Corresponding Author: yrliu@sdu.edu.cn

39

**Bayesian method for fitting the low-energy constants in chiral perturbation theory**

Corresponding Author: jsz@gxu.edu.cn

40

**The electromagnetic form factors of baryons from chiral EFT**

Corresponding Author: yqh@hnu.edu.cn

41

**Dark sector effective field theory**

Corresponding Author: maxid@scnu.edu.cn

42

**Bubble nucleation in the Polyakov quark-meson model**

**Corresponding Author:** mao@hznu.edu.cn

43

### **Effective field theory with resonant P-wave interaction**

**Corresponding Author:** songlin@scu.edu.cn

44

### **Two-pole structures as a universal phenomenon dictated by coupled-channel chiral dynamics**

45

### **Generalized parton distributions in spin-3/2 particles**

**Corresponding Author:** fudongyan@ihep.ac.cn

46

### **Study of doubly charmed exotic mesons in heavy quark effective field theory**

**Corresponding Author:** junmobei@live.cn

47

**闭幕**
