

# The 23rd International Conference on Few-Body Problems in Physics (FB23)

Contribution ID: 37

Type: **2.Parallel session talk**

## Few-body effects in heavy flavour hadronic molecules

*Thursday, 26 September 2024 09:00 (25 minutes)*

Properties of near-threshold exotic hadrons in the spectrum of heavy quarks are sensitive to multi-body effects that are particularly relevant for states containing charmed quarks. I will discuss few-body effects in heavy flavour hadronic molecules at the example of the tetraquark  $T_{cc}^+$  state discovered recently by the LHCb collaboration and studied on the lattice.
