## Light quark mass dependence of nucleon mass to two-loop order

Thursday, 26 September 2024 15:05 (20 minutes)

We investigate the nucleon self energy through the sixth chiral order in the covariant SU(2) chiral perturbation theory ( $\chi$ PT) in the single baryon sector using the extended-mass-on-shell(EOMS) scheme. It is found that the EOMS scheme exhibits quite satisfactory convergence behavior through  $O(q^6)$  around physical point. We also predict the pion mass dependence of the nucleon mass to the accuracy of  $O(q^6)$ , which is in satisfactory agreement with the recent lattice results over a wide range of pion mass.
