Status – LumiCal

- Regular Meeting: Tuesday afternoon.
- The design of Ref-TDR LumiCal are finishing as [presented yesterday](#). A few details needed to be updated:
 - The full simulation based on CEPCSW.
 - Mechanical Design and Integration.
 - The methods of Survey.
 - Benchmark(Beam Test) of Geant4 Simulation.
 - Backgrounds estimation/affects on other detectors.

Status – Overall design/optimization of IR

- A regular meeting with acc. People will be held at Thursday morning, minutes Link: [CEPC MDI Meeting - HedgeDoc \(ihep.ac.cn\)](https://ihep.ac.cn/HedgeDoc/CEPCMDIMeeting)
- The work on component design optimization is on going:
 - The Re-design of Cryo-Module has been started.
- The overall distribution of magnet field will be presented after the design of the solenoid and also the re-design of the anti-solenoid.
 - The magnetic field of the Solenoid has been presented.
 - The re-design of the anti-solenoid has been started.
 - The joint effort will begin when the anti-solenoid design finished.
