

Status

- Beam induced Background
 - No Shielding version, Higgs + Low Lumi-Z
 - Shielding version(Baseline)
 - 10cm Paraffin at both ends
 - 2cm W between 1.11~1.9m, inside Cryo-Module
 - 1cm W outside of Lumi LYSO
 - 1cm W outside of Cryo-Module
 - Higgs+Low-Lumi Z had first version.
 - Remain works:
 - Low Pt electron/positron generated by Pair needs to be shielded.
 - Touschek Hotspot
- First version almost finished(~30 pages), merged to Main Branch
 - FFS missing, BG unfinished
 - Ref. List missing
