

Holographic applications: from Quantum Realms to the Big Bang

2025 年 7 月 11 日星期五 - 2025 年 7 月 19 日星期六

International Conference Center(国际会议中心)

摘要集

Contents

Holographic QCD (I)	1
Machine learning holographic QCD (I)	1
Machine learning holographic QCD (II)	1
Machine learning holographic QCD (I)	1
Holographic QCD (II)	1
Neural Network for Holographic QCD	1
Bayesian Inference of the Critical Endpoint in 2+1-Flavor System from Holographic QCD	1
Holographic Calculation of Thermal Photon Emission Rate and Electric Conductivity in QGP	1
Effective theories for strongly-coupled phases of matter with gapped excitations (I) . . .	2
Introduction to pseudospectra and their applications in Holography (I)	2
Effective theories for strongly-coupled phases of matter with gapped excitations (II) . . .	2
Introduction to pseudospectra and their applications in Holography (II)	2
D-commuting SYK model: building quantum chaos from integrable blocks	2
Quantum Corrections in the Low-Temperature Fluid/Gravity Correspondence	2
Gluon polarization contribution to the spin alignment of vector mesons from holography	3
Holographic QFTs on constant curvature manifolds and phase transitions	3
Locating the QCD critical point using neutron-star observations	3
Quantum-Gravity-Corrected Wilson Loop Correlators and Super-Yang-Mills Theory at Infrared	3
Quantum critical phenomenon by holography	3
Composite vortex in holographic binary superfluids	3
Vortex shedding patterns in holographic	3
QCD matter under extreme conditions	4

Spin polarization in off-equilibrium medium at weak and strong coupling	4
Precision tests of string theory	4
The spectral duality relation (online)	4
Hydrodynamics with multiple charges and holography(online)	4
Far From Equilibrium Physics in Finite Size System	4
Applying Noether's theorem to the pure AdS3 gravity	4
Near-extremal holographic charge correlators	4
Non-hydrodynamics from hidden symmetry	5
Mass and Isospin Breaking Effects in Holographic QCD	5
ER=EPR and Strange Metal from the quantum Entanglement	5
Unique SYK-rised models of Strange Metals	5
ϕ^4 Loops in AdS3/CFT2	5
Connecting boundary entropy and effective central charge at interfaces	5
The D-brane cylinder amplitude and T-duality	5
Comments on quantum chaos and complexity	5
Resurgence and non-perturbativ effects in \overline{TT} deformed CFTs	6
Holographic 3D quantum turbulence	6
Holographic Applications on Quark Stars and Black Holes	6
Bubble dynamics in holographic superfluids with first order phase transition	6
Holographic bubble nucleation in astrophysics or the early universe	6
Schwinger-Keldysh holography: hydrodynamics and beyond	6
Pole dynamics in holographic thermal correlators	6
Holographic entanglement entropy inequalities in multipartite systems	7
Gravitational waves from cosmological chiral phase transitions in soft-wall AdS/QCD . .	7
Magnetic field-driven quantum criticality at strong coupling	7
Holographic Page Curve in SYK model with n-Replica Wormholes	7
QCD phase structure from holography	7
A surface growth approach for bulk reconstruction and \overline{TT} deformation	7
Symmetry-Resolved Entanglement in AdS & BCFT	7
Softening holographic nuclear matter with multi-jump solutions	7

Bulk Spacetime Encoding via Boundary Ambiguities	8
On Corrollian Conformal Field Theory	8
Isospin Asymmetry and Neutron Stars in V-QCD	8
Gravity Dual of Network and Entanglement	8
Holographic multipartite entanglement from upper bound configurations of entanglement entropy combinations	8
Quasinormal modes: from holographic lessons to nonthermal fixed points (online) . . .	8
Celestial holography of massive amplitudes in 4d and 2d	8
Holographic Weyl Anomaly in 8d from General Higher Curvature Gravity	9
Exploring Cosmic Censorship in a Holographic Collider	9
Nucleon gravitational form factors in AdS/QCD	9
Developments on the holographic superconductor and superfluids	9
Applications of numerical relativity in holography	9
The influence of Wilson lines on heavy quark anti-quark potential and mass	9
Bayesian Inference of the Critical Endpoint in 2+1-Flavor System from Holographic QCD	9
Dynamics of chiral phase transition in the soft-wall AdS/QCD	9
Holographic non-conformal interfaces	10
Vortex dynamics on the sphere	10
Holographic Kibble-Zurek Mechanism with Discrete Symmetry	10
Universal Time Evolution of Holographic Complexity	10
Holographic Calculation of Thermal Photon Emission Rate and Electric Conductivity in QGP	10
Clarifying the interior dynamics of charged black holes	10
Chiral phase transition from effective field theory and holography	10
Unify the QGP transports and equations of state in a holographic QCD Model	11
Applications of WKB analysis in bottom-up holographic QCD models	11
Holographic multipartite entanglement from upper bound configurations of entanglement entropy combinations	11
Welcome speech	11
