

LIDINE 2025: LIght Detection In Noble Elements

Tuesday, 21 October 2025

Poster (22:00 - 22:50)

time	[id]	title	presenter
22:00	[35]	Production of GEM-like structures for cryogenic applications, using laser-cutting techniques	CORTEZ, André
22:00	[54]	R&D Developments for PoWER Proof of Concept Tests	PAGLIUSO, Lucca
22:00	[15]	Analysis and suppression of delay photon and delay electron backgrounds of liquid xenon TPCs for ultra-low energy detection	ZHAO, Yifei
22:00	[55]	Impact of Annealing p-Terphenyl Films Deposited on Dicroic Filters: Emission, Absorption, and Adhesion Analysis.	MENDONÇA, Ana Paula
22:00	[59]	Determining Astrophysical Parameters of a Supernova in the Liquid Argon Scintillator Experiment	VALENTIM DA COSTA LIMA, Rodolfo
