

第五届量子场论及其应用研讨会

Friday, 31 October 2025

Parallel I (15:30 - 17:30)

time	[id] title	presenter
15:30	[51] qT-slicing method and factorization structures for multi-jet processes	FU, Rong-Jun
15:45	[45] Precision Predictions for Three-Dimensional Nucleon Tomography	方, 申
16:00	[44] tW production with soft gluon resummation at next-to-next-to-next-to-leading logarithmic level	丁, 家乐
16:15	[43] Mellin moment for nucleon structure: from transversity to threshold	LI, Wanchen
16:30	[42] Pentagonal Feynman Integral and Wilson Loop with Lagrangian Insertion at Three Loop	XU, Yongqun
16:45	[47] Tame multi-leg Feynman integrals beyond one loop	黄, 礼鸿
17:00	[40] Massive antenna functions in N3LO QCD top-pair production at electron-positron colliders	黎, 哲
17:15	[38] Differential equations for energy correlators in any angle	ROUROU, Ma
