

LO&CLK distribution RTM board development progress

Monday, 15 September 2025 15:30 (20 minutes)

We are developing an RTM board to generate and distribute Local and Clock signals for LLRF controller. 4 channels LO, 4 clock and 4 RF reference signals are designed on the board for small scale applications. The PCB layout of the board has been finished, so the status of the board will be presented.
