2. Peking University and School of Physics

Peking University is a comprehensive and national key university. The campus, known as "Yan Yuan" (the garden of Yan), is situated at Haidian District in the western suburb of Beijing, with a total area of 2,743,532 square metres (or 274 hectares). It stands near to the Yuanmingyuan Garden and the Summer Palace.

School of Physics

- 1913, "Wu Li Men"(物理门) was formed in PKU, the opening of undergraduate education in physics in China ->100 anniversary in 2013
- 1919, renamed to "Department of Physics"
- 1937-1945, National Southwestern Associated University period
- In 1952, New Department of Physics by gathering talent scholars from several top universities
- Step development since the opening of China to the world
- 2001, School of Physics was established by combining several departments at PKU

3. Kavli Institute for Theoretical Sciences at the University of Chinese Academy of Sciences.

Kavli ITS is a reformulated institute, which was called the Kavli Institute for Theoretical Physics, China (KITPC). KITPC was founded in June, 2006, and was associated with the Institute of Theoretical Physics (ITP) at the Chinese Academy of Sciences (CAS), and started to operate in May 2007. As one of twenty Kavli institutes worldwide, KITPC played an important role in both promoting China's research in theoretical physics and organizing international programs in physics and related interdisciplinary fields.

KITPC was officially renamed to **Kavli ITS** on Oct. 14, 2016. Kavli ITS is associated with the **University of Chinese Academy of Sciences (UCAS)**. The changes of the institute's name and its associated body from ITP to UCAS were instructed and approved by CAS, and is in accordance with the recommendation of the Kavli Foundation. The mission of Kavli ITS is to establish itself as an international center of excellence in theoretical sciences. Kavli ITS is engaged in theoretical physics and related interdisciplinary sciences. To meet its mission, Kavli ITS is planning to undergo a rapid expansion in its faculty and will continue successful activities of KITPC to sponsor and organize programs and conferences in theoretical physics and related interdisciplinary fields to promote scientific exchange in China and in the world.
