

Status update

tdr.25.5.0 validation for tracking

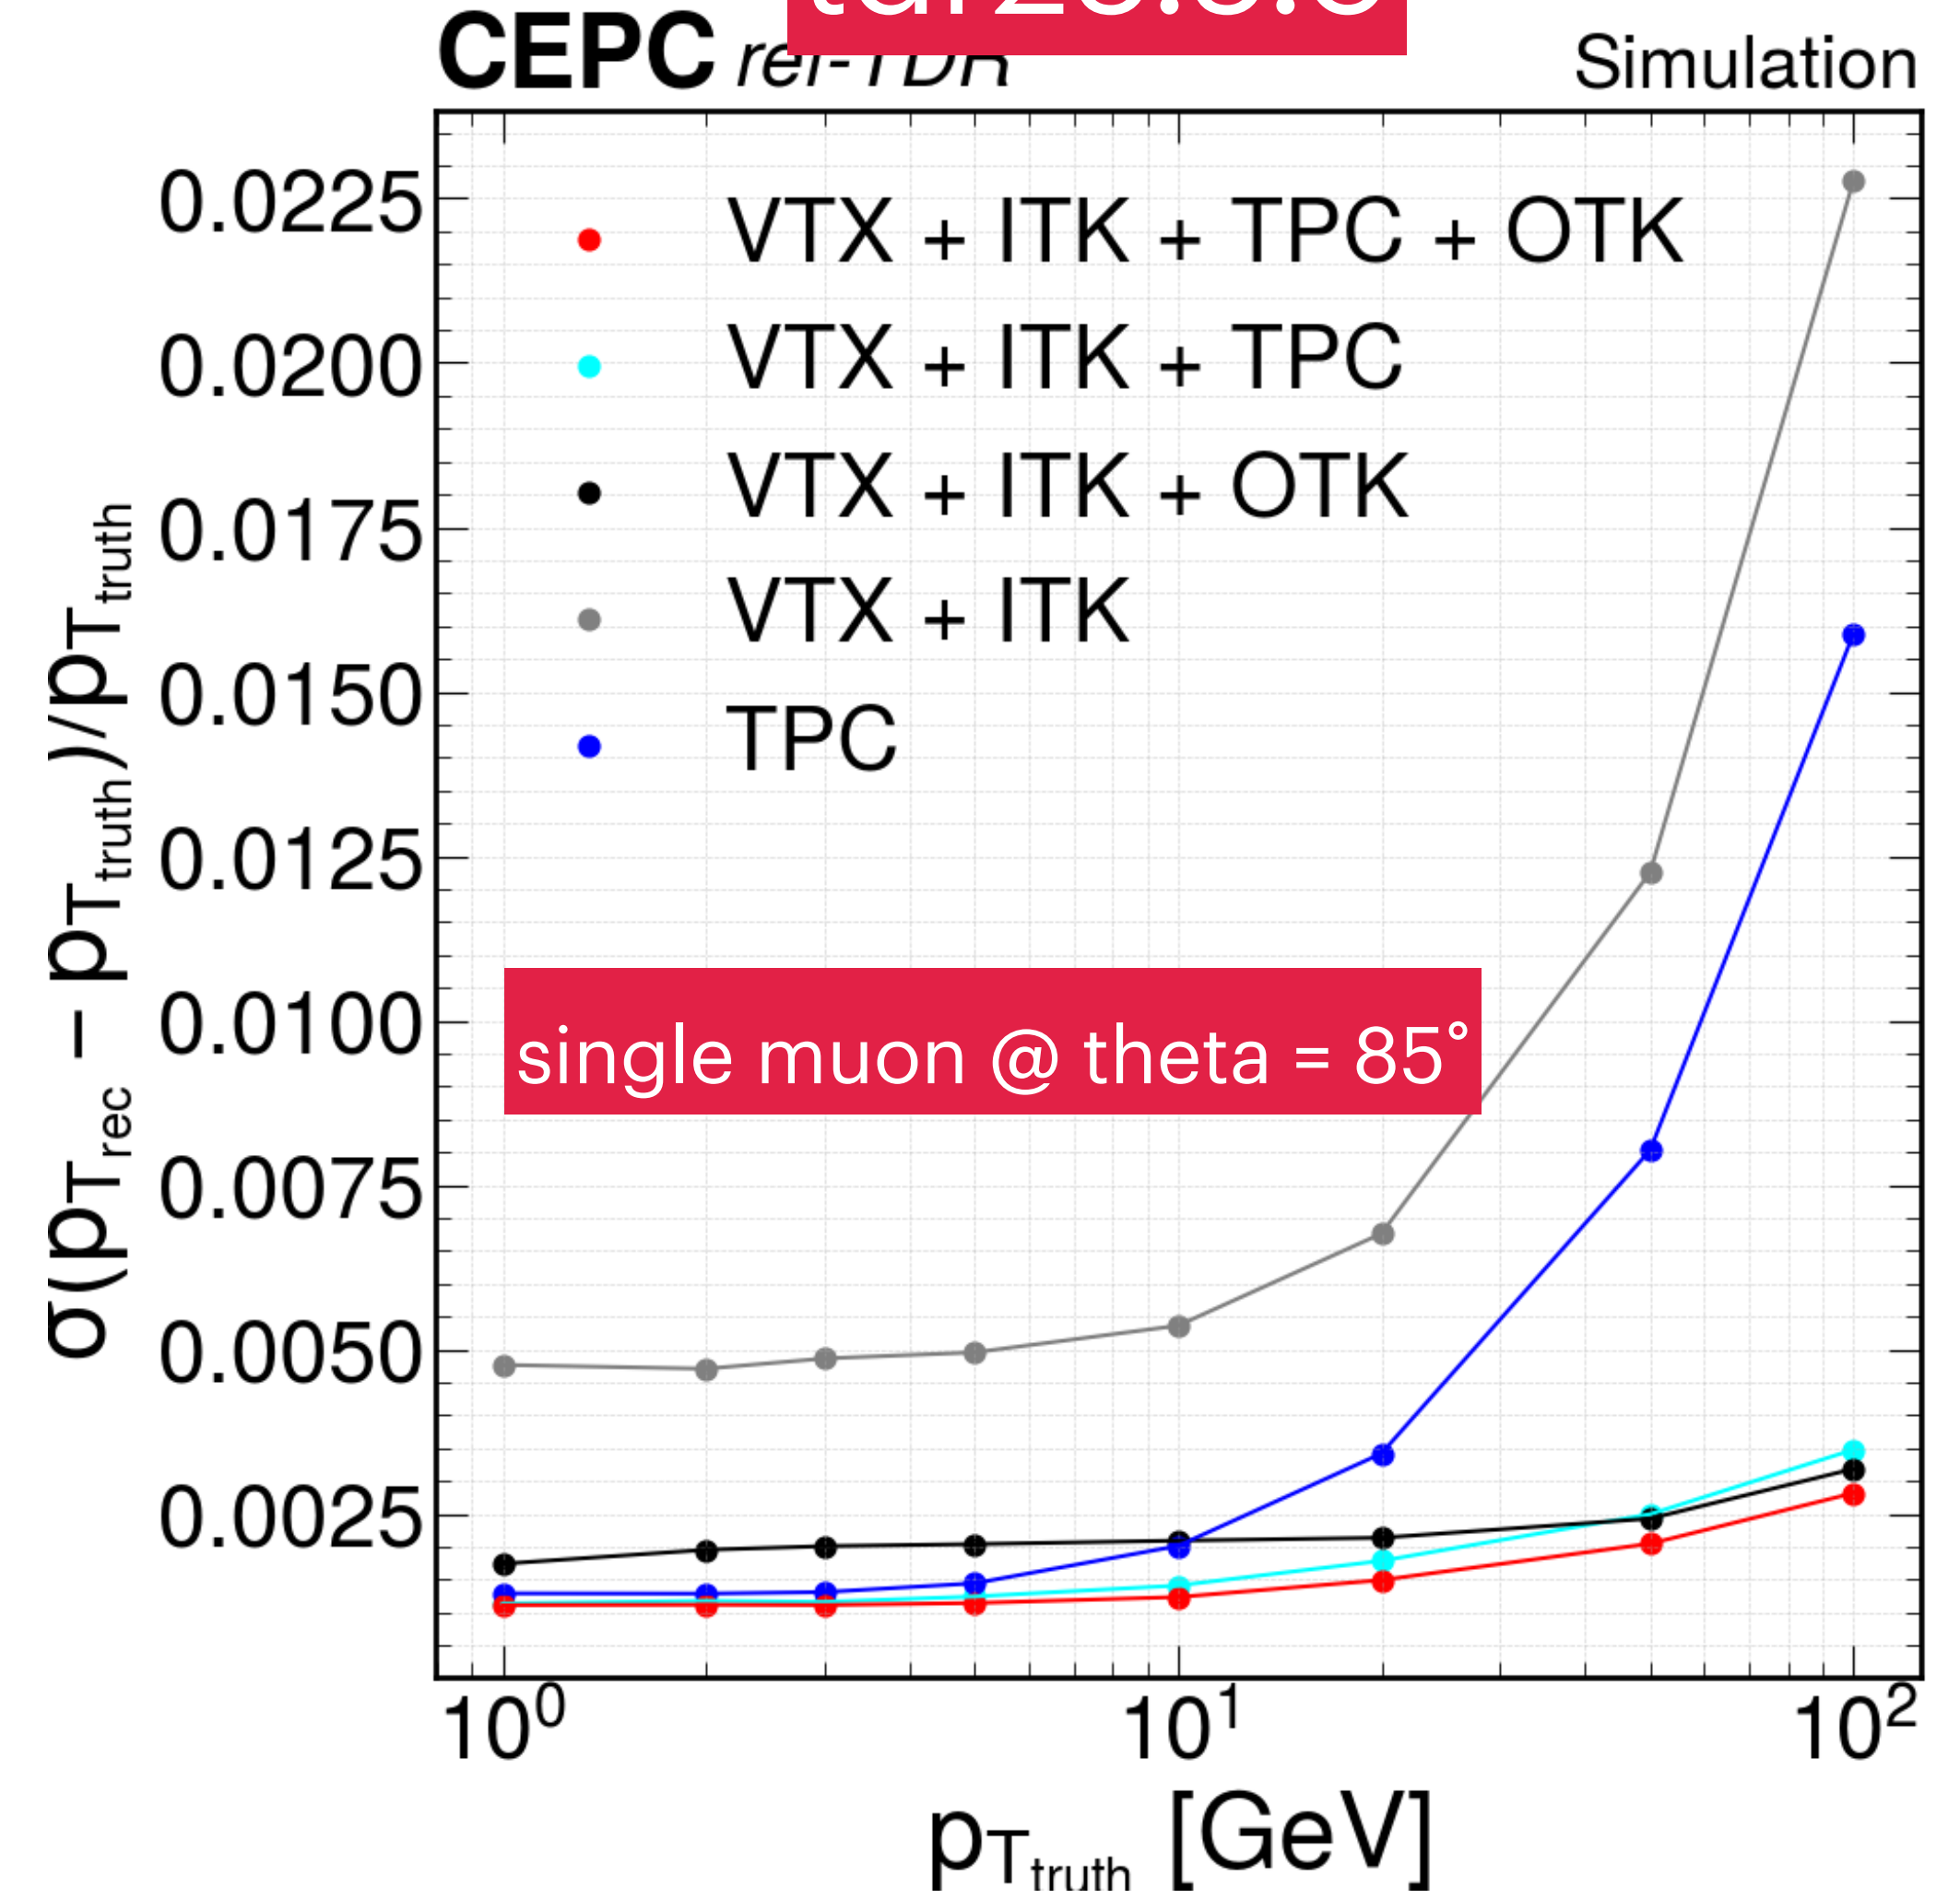

Chenguang Zhang / 26May2025

Resolution

tdr25.3.6

tdr25.5.0

- The performance is stable with the new release

Resolution

tdr25.3.6

tdr25.5.0

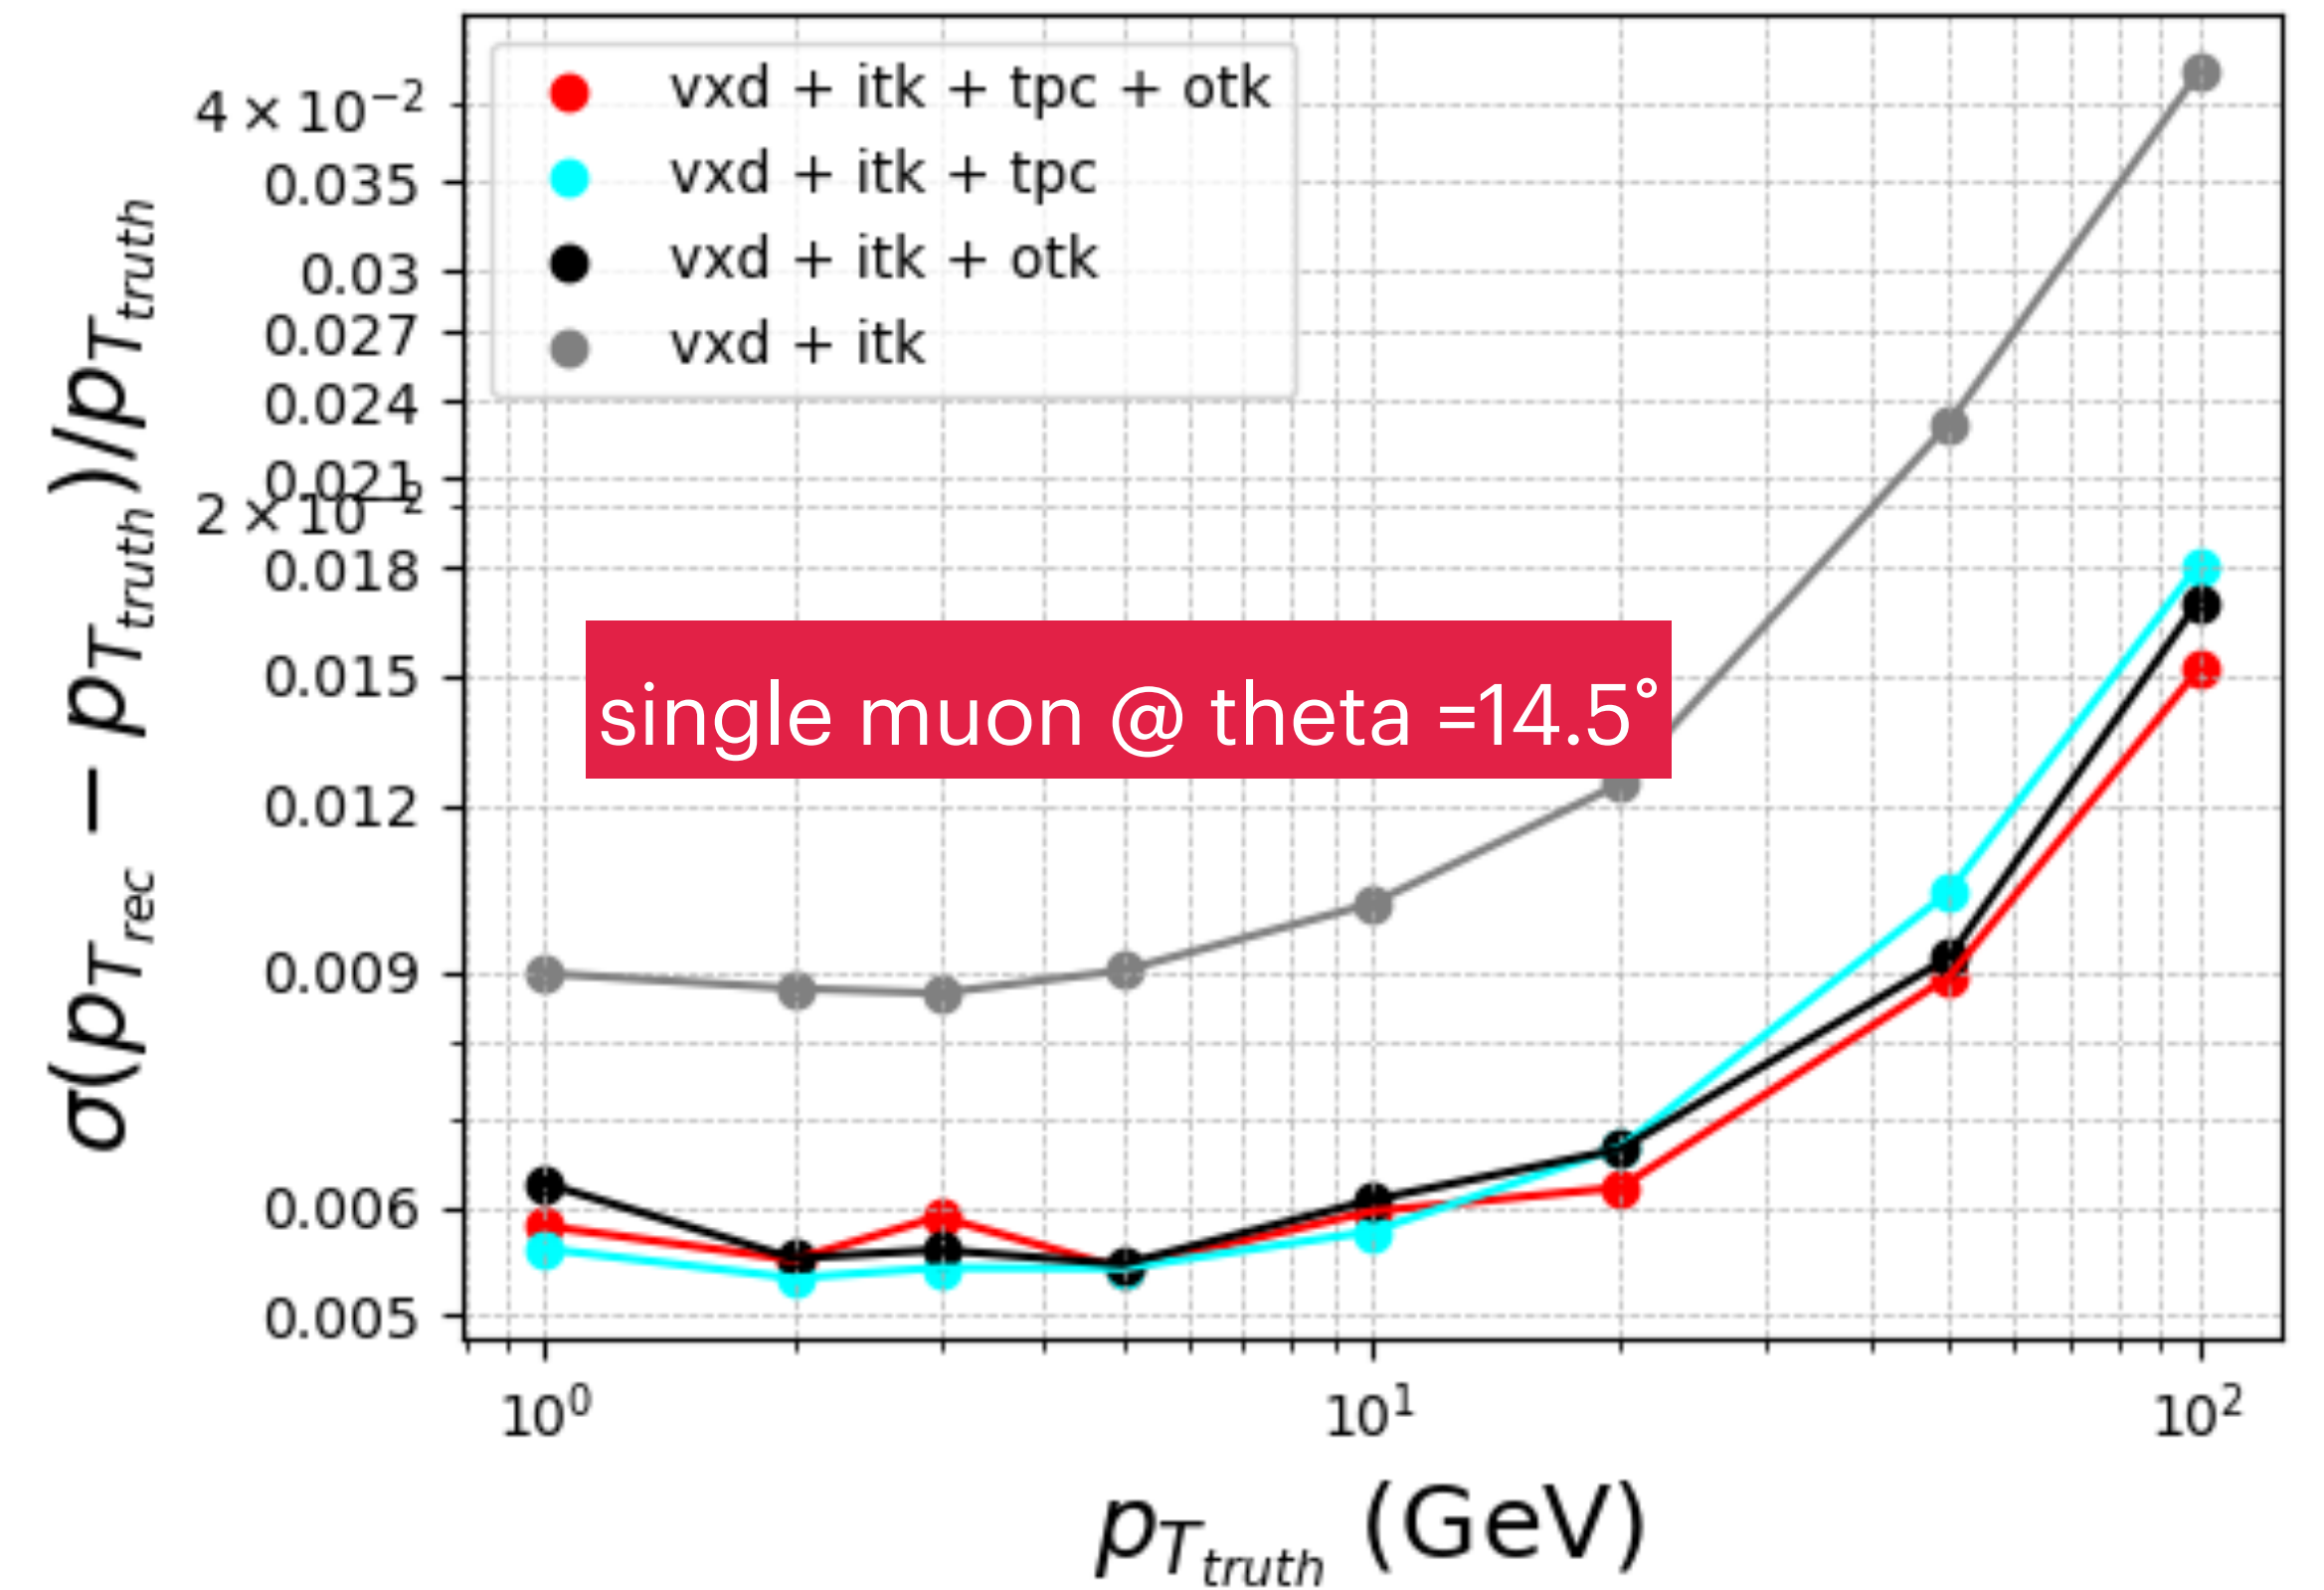

- There may be tiny improvements since MR254, which updated the MDI support material, but the impact is not very clear

Resolution

tdr25.3.6

tdr25.5.0

- Some fits could be further optimised, but this is beyond the scope of this validation
- The tracking performance of the forward region is fine with the new release

ITKB Hit Efficiency

tdr25.3.6

tdr25.5.0

- In the right plot, VXD_{L5/6} and OTKB > 0.995
- The hit efficiencies of ITKE layers are reduced due to the MR246 [fix the issue of lacking gap in ITK]

ITKE Hit Efficiency

tdr25.3.6

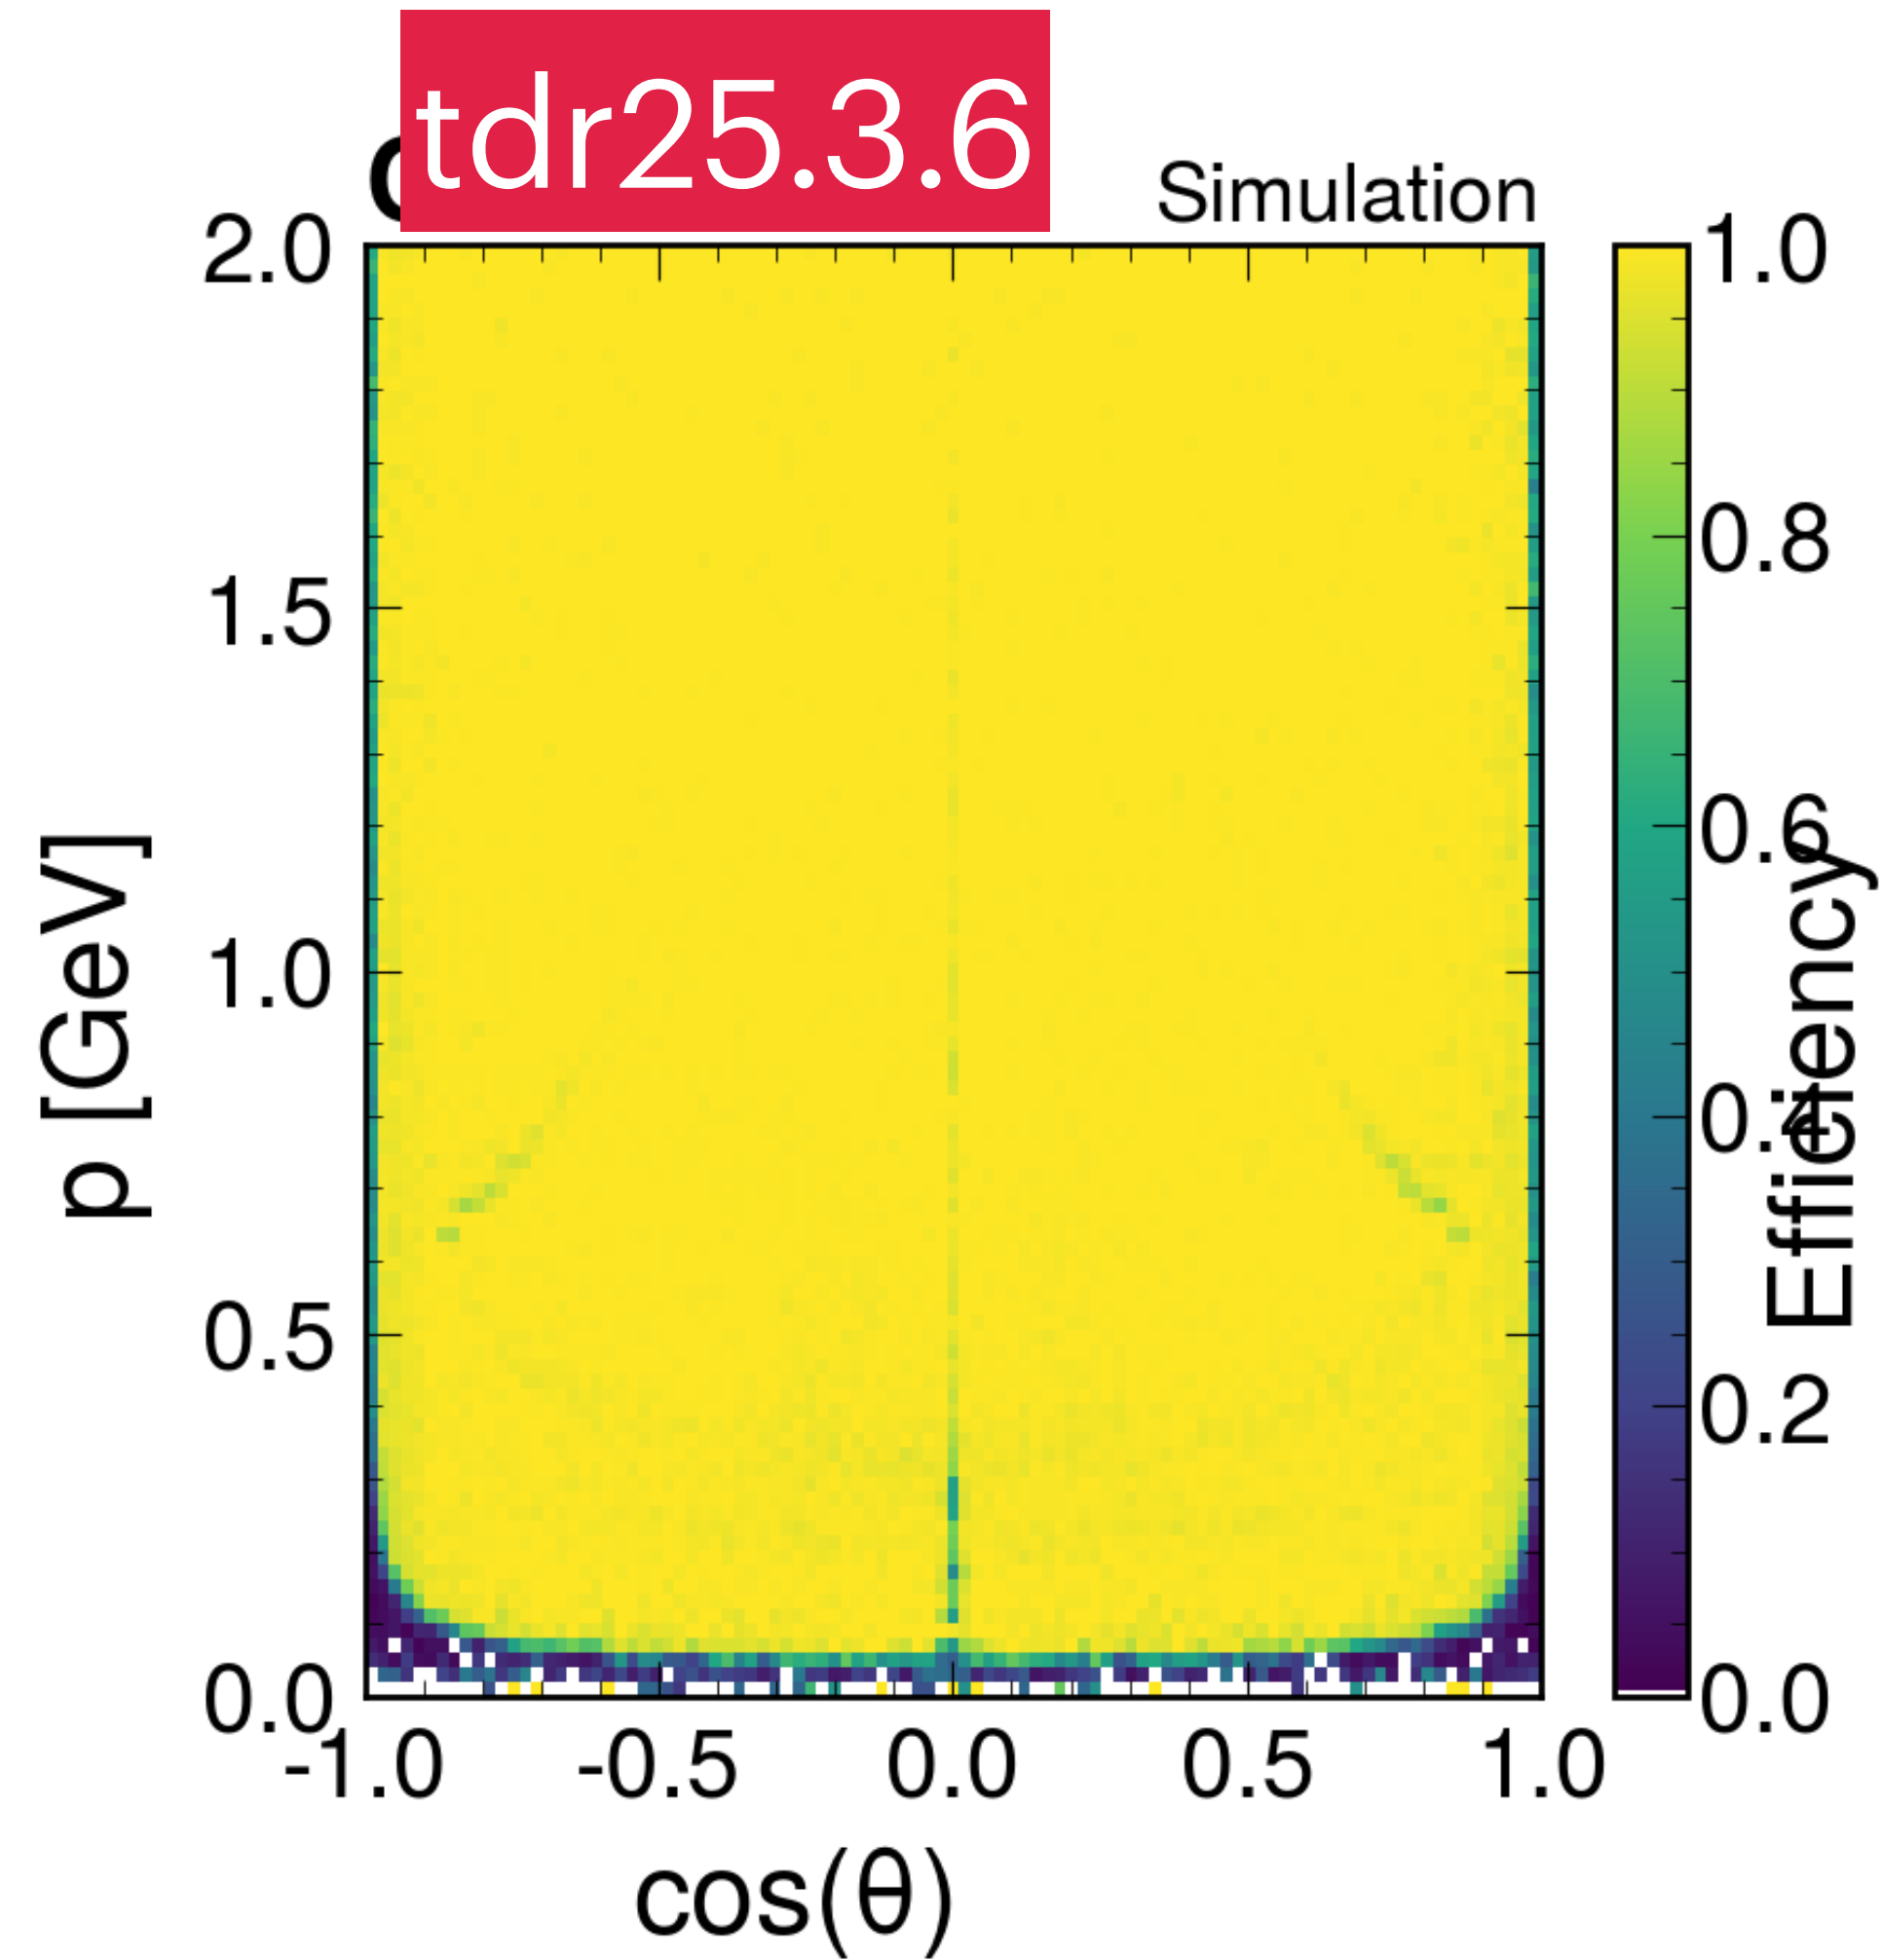

tdr25.5.0

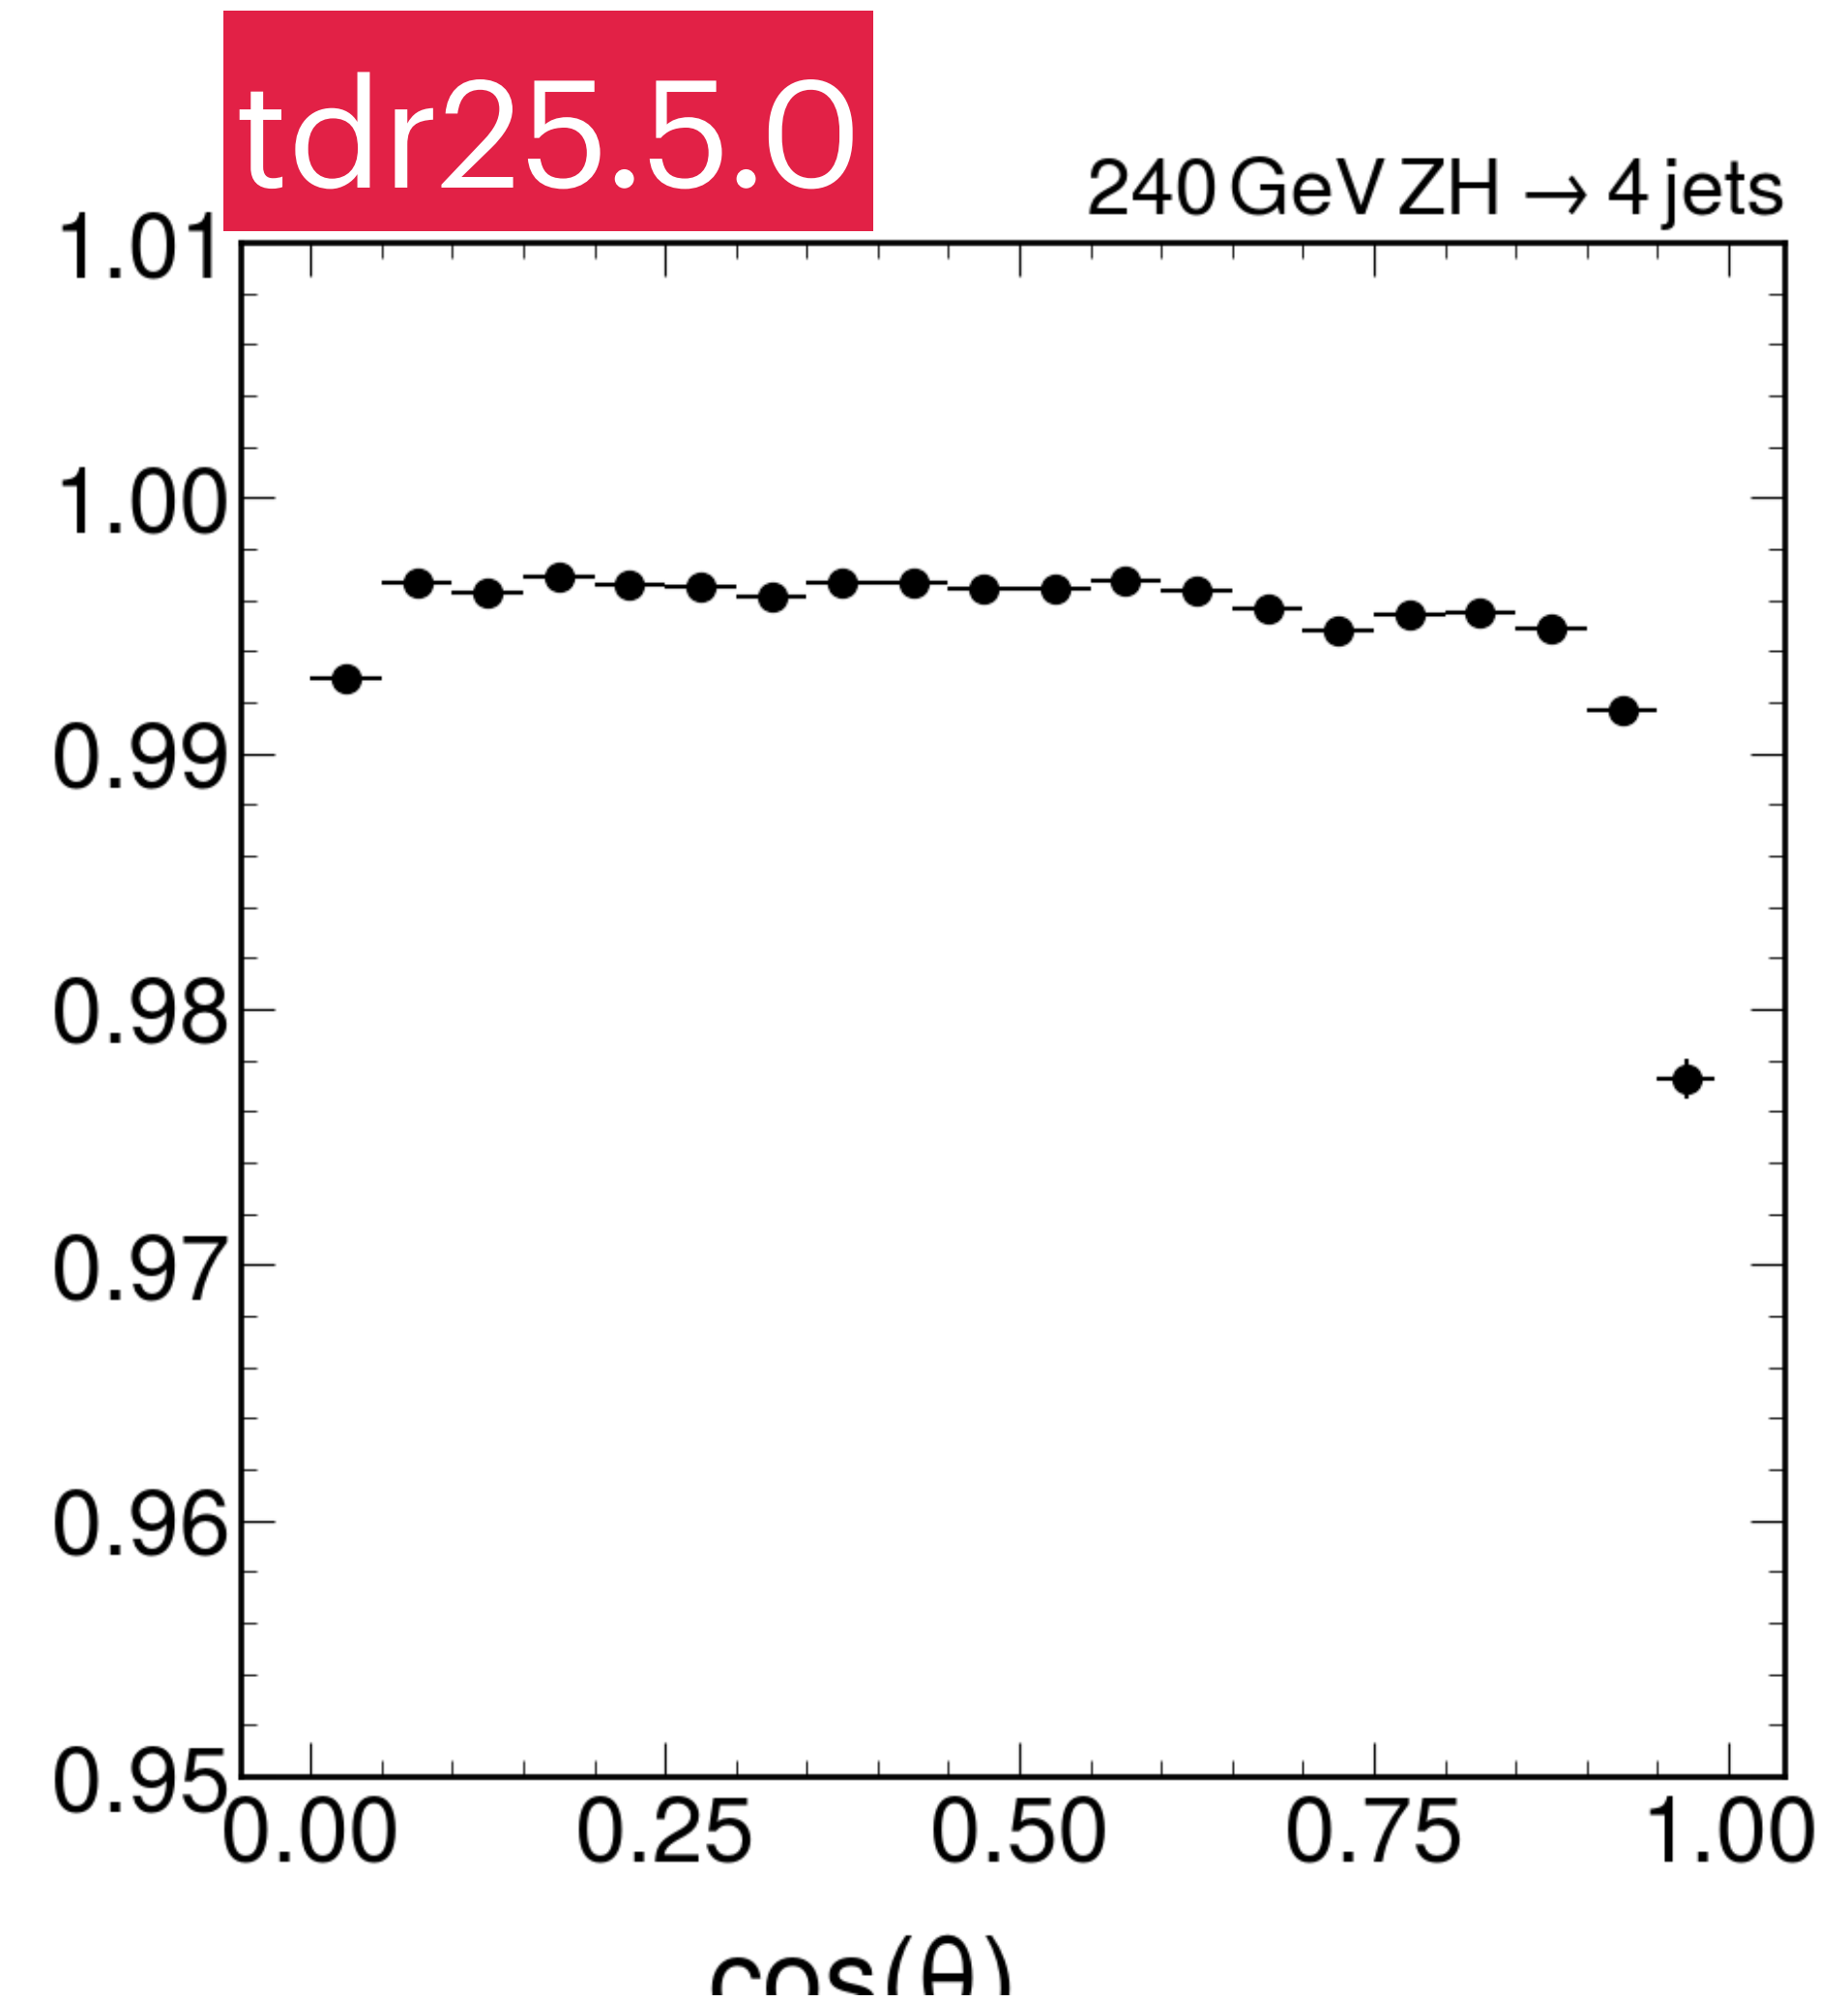

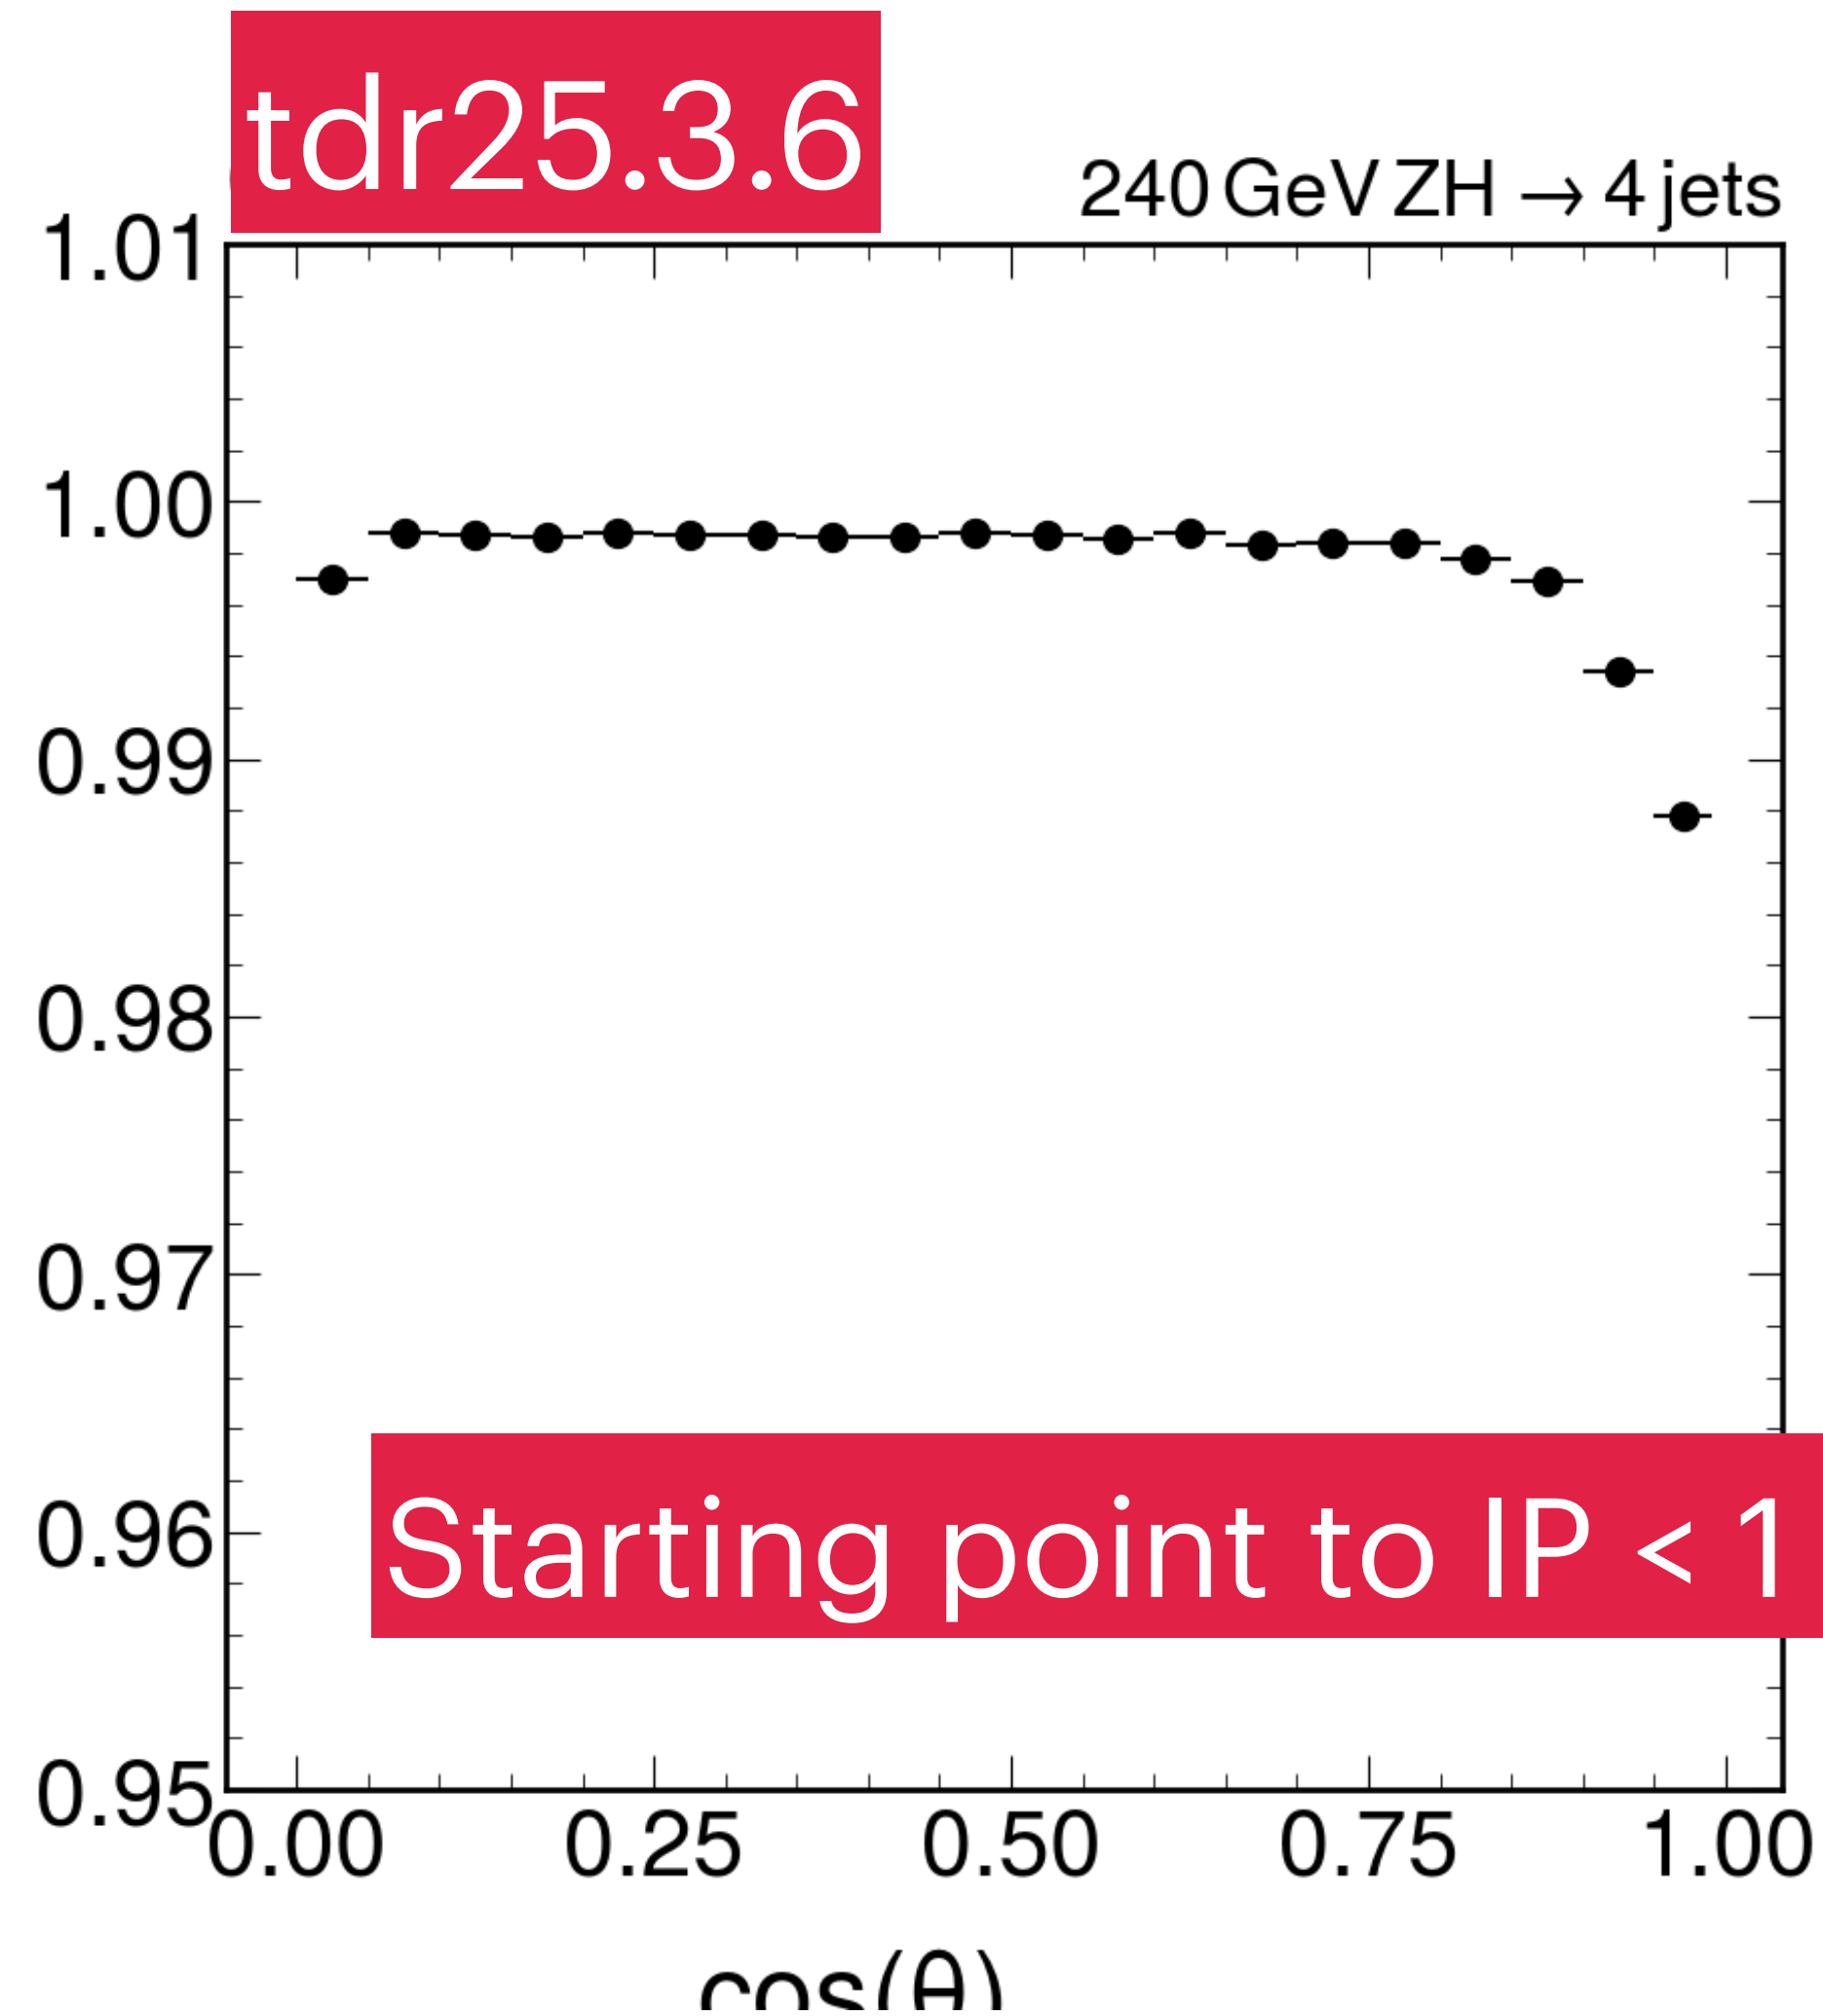

- In the right plot, VXDL_{5/6} and OTKE > 0.995
- The hit efficiencies of ITKB layers are reduced due to the MR246

Trk Efficiency

- The inefficiency in certain specific areas was fixed by MR262

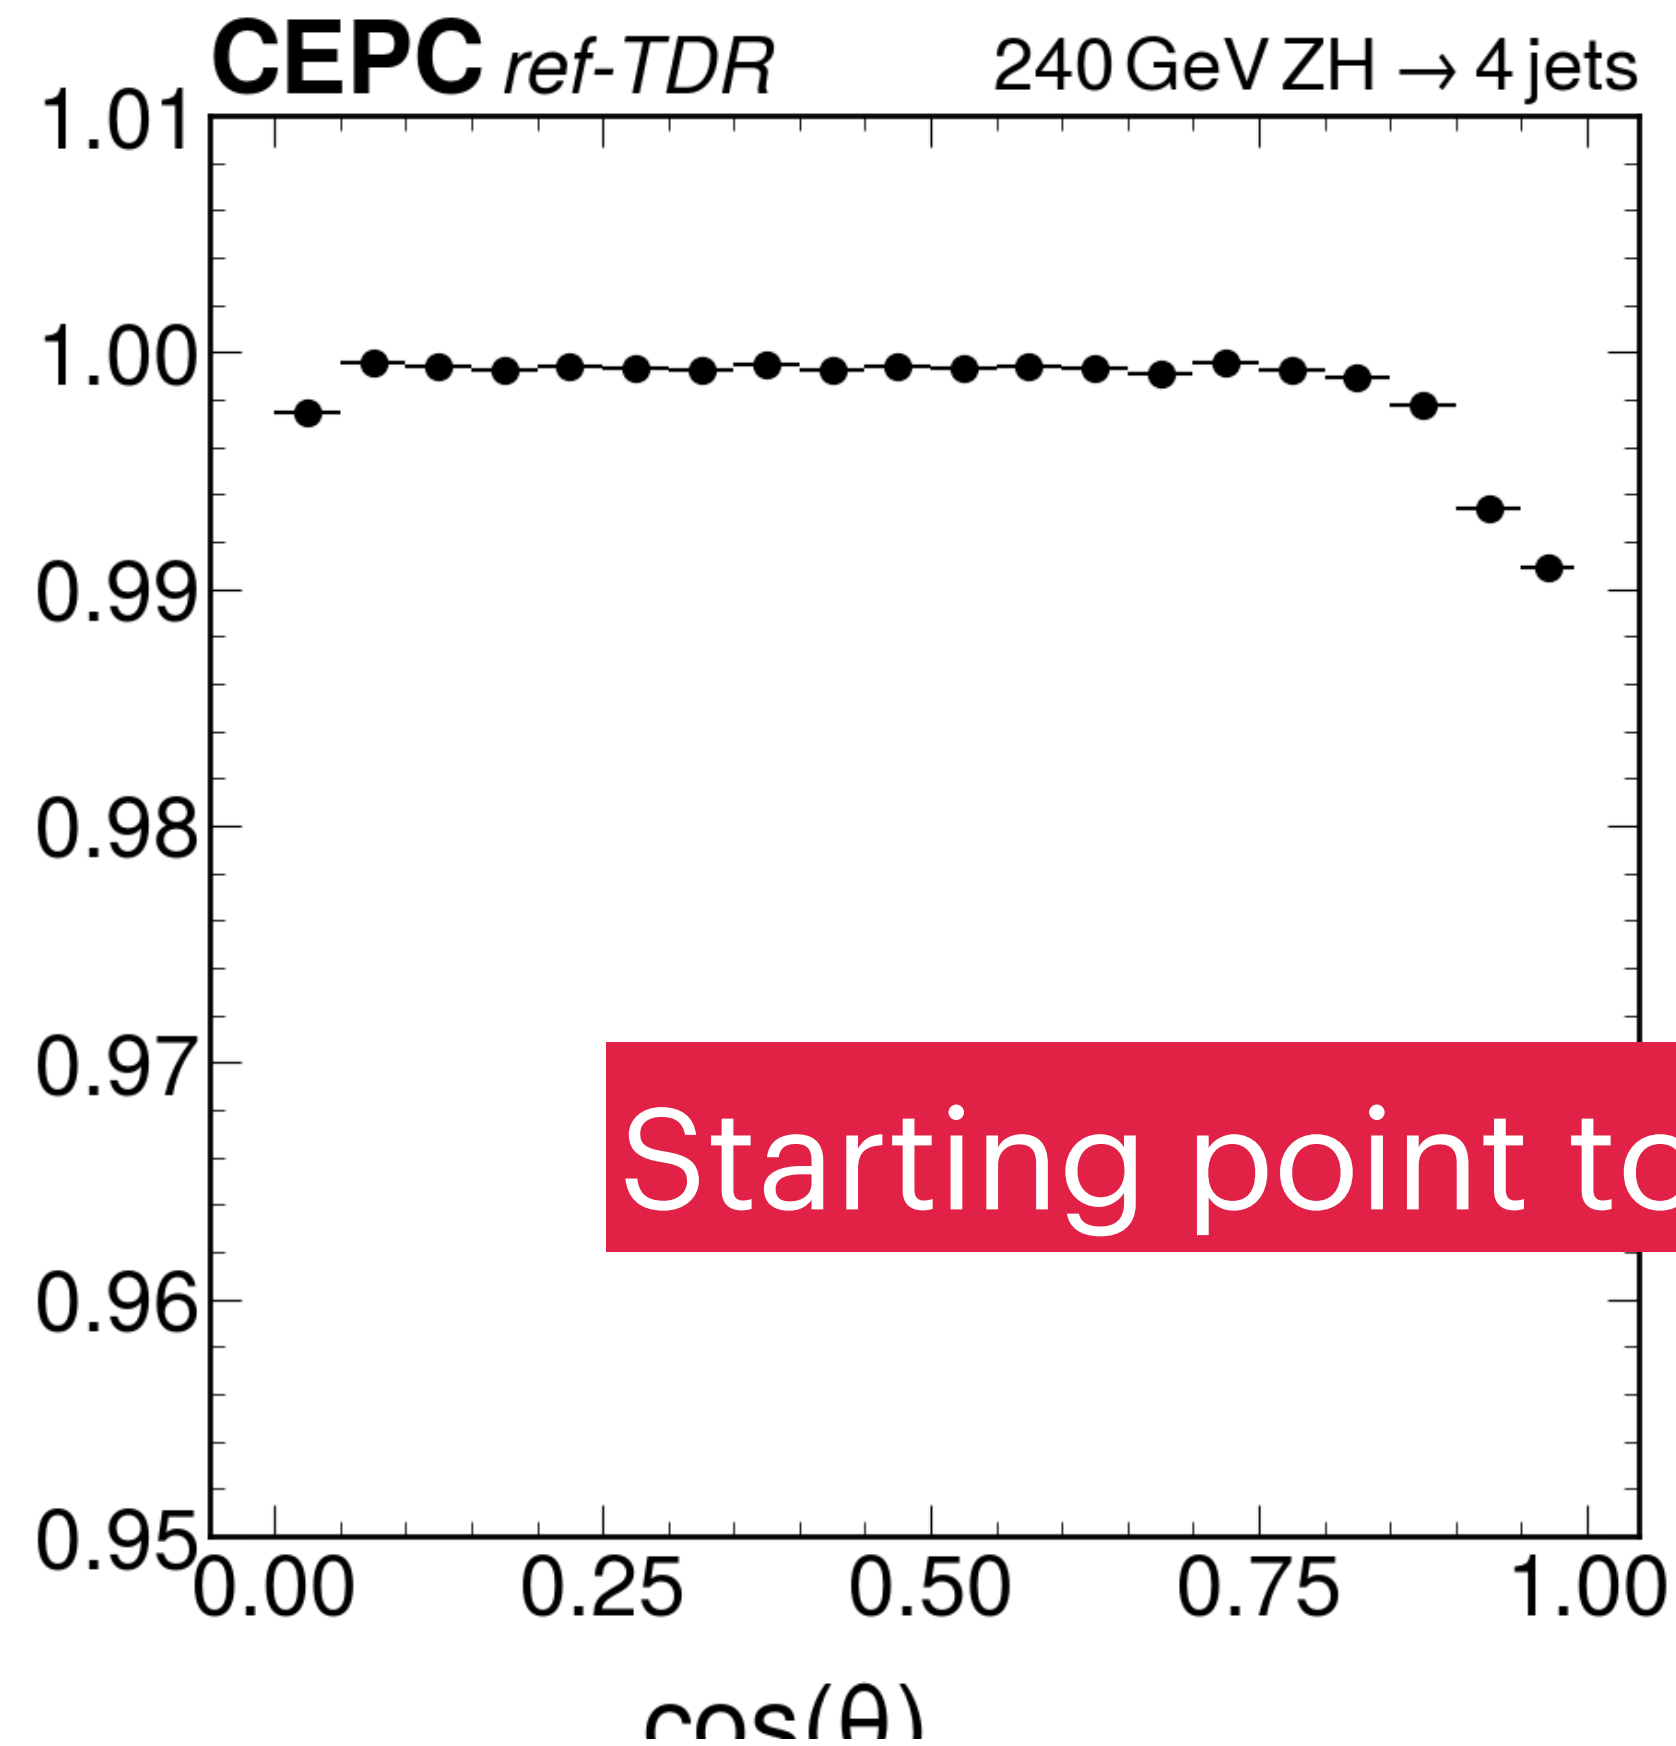

Trk Efficiency

- Global efficiency, 99.77% \rightarrow 99.52%
- A detailed synchronisation between the two releases is in progress...

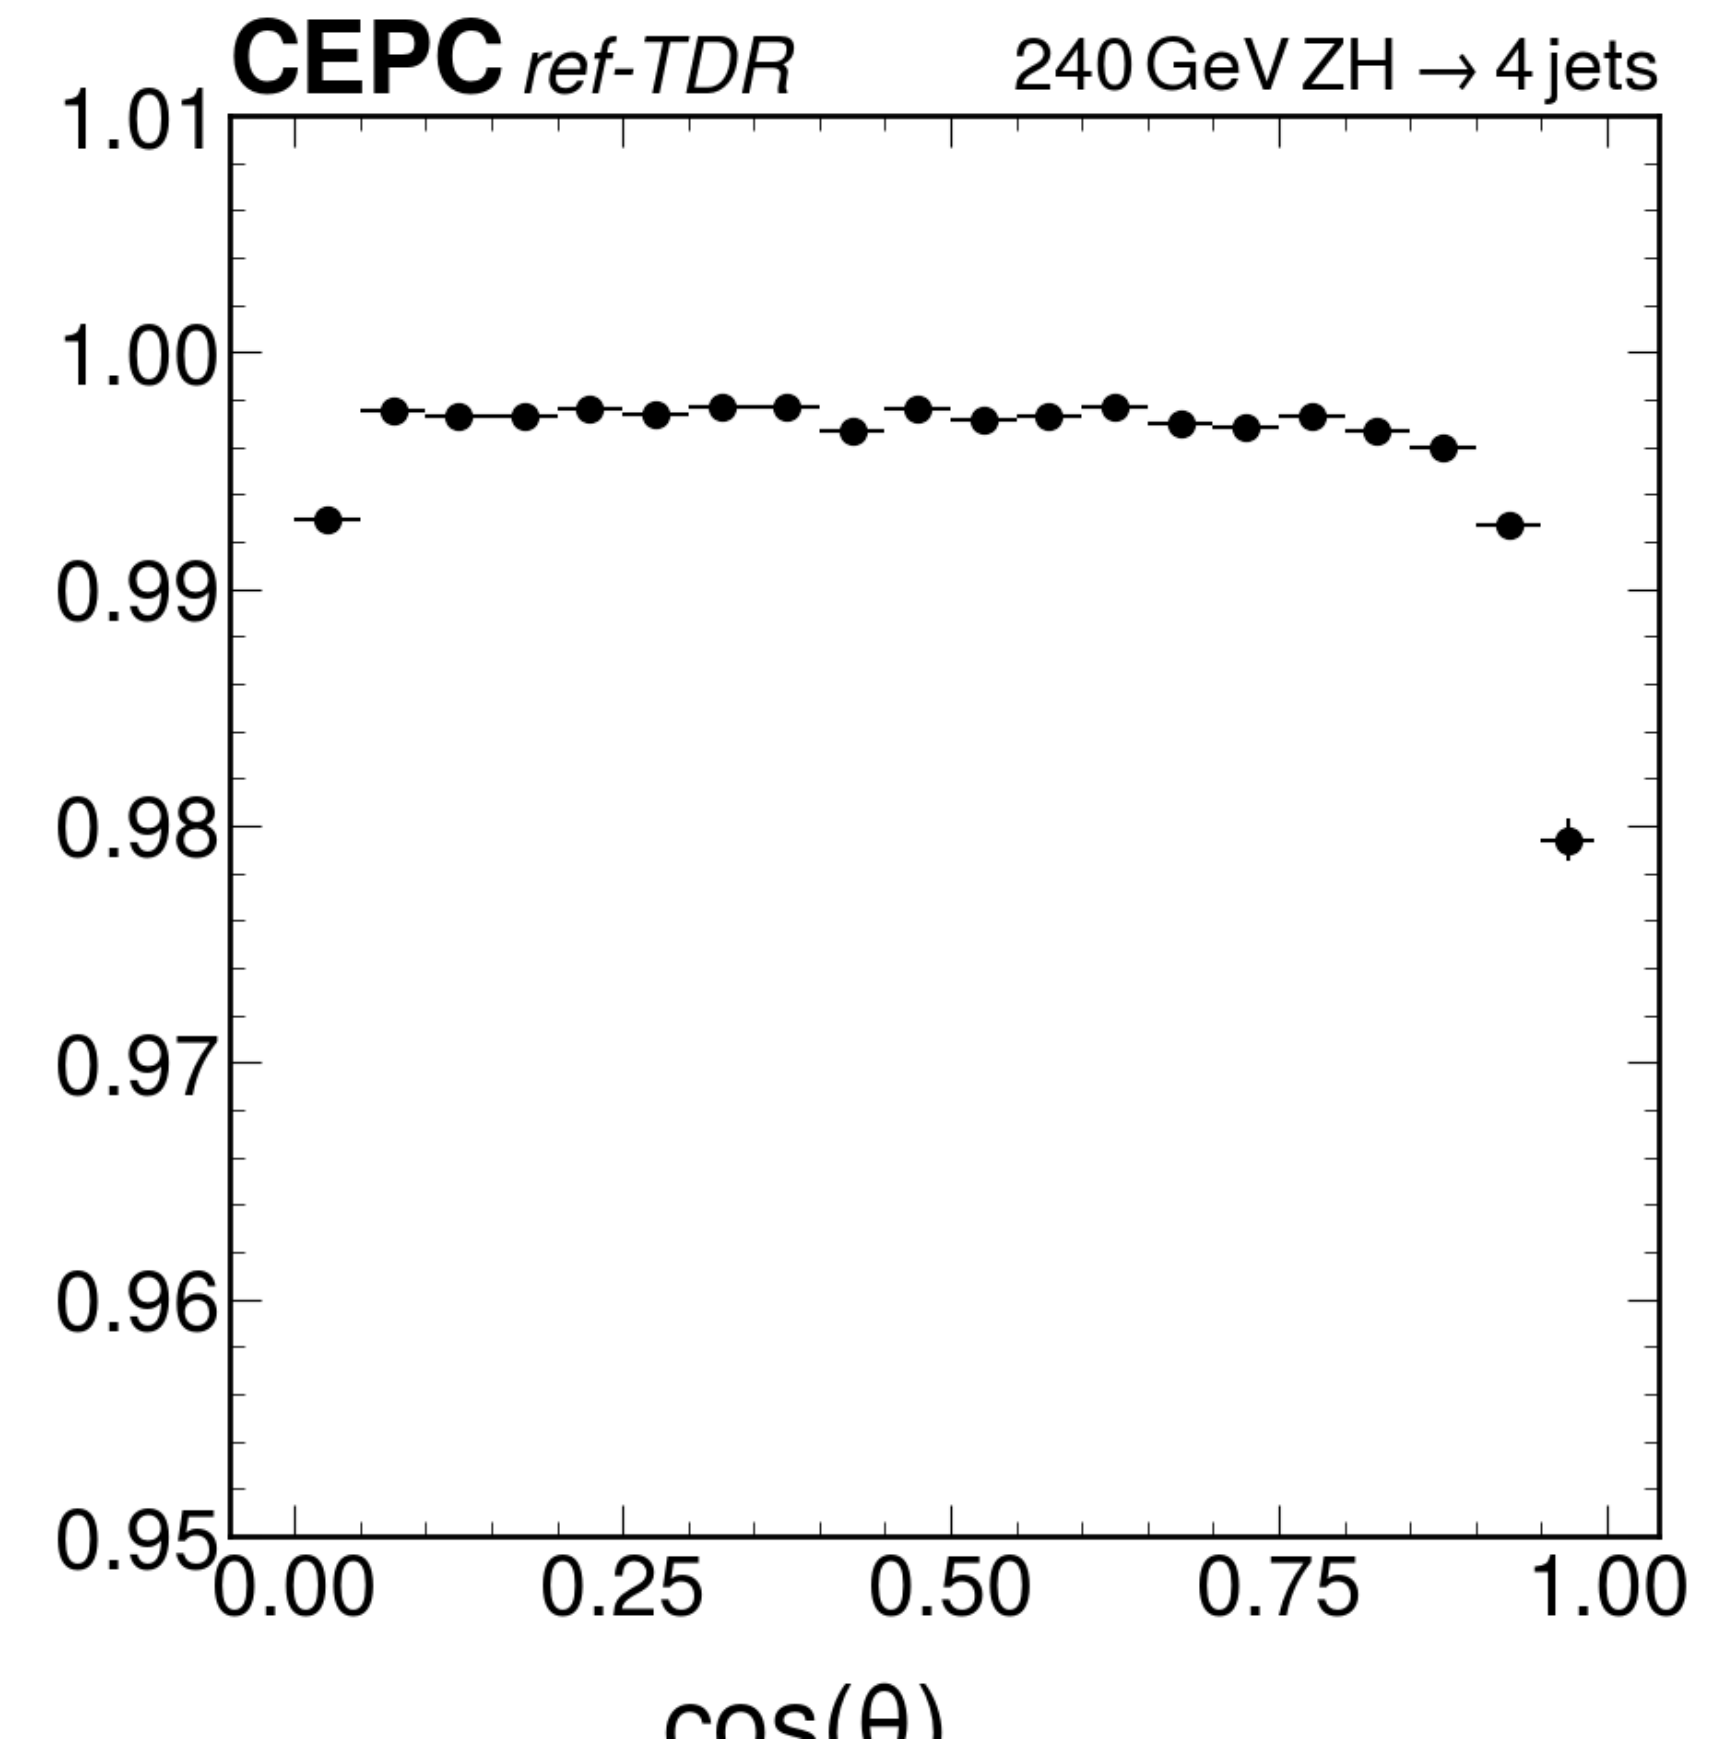

Trk Efficiency

tdr25.3.6

Starting point to IP < 1 mm

tdr25.5.0

- Global efficiency, 99.84% \rightarrow 99.61%
- A detailed synchronisation between the two releases is in progress...

Summary

- The tracking performance with tdr.25.5.0 has been validated
