

第十八届粒子物理、核物理和宇宙学交叉学科前沿问题研讨会

Saturday, 11 April 2026

Session 3 (14:00 - 15:45)

-Conveners: 绍龙 陈

time	[id]	title	presenter
14:00	[10]	An unexpected possible extraction of α_s using EEC in the post-confinement region	刘, 晓辉
14:15	[11]	Decoherence as renormalization group flow: quantum information loss in high energy collisions	邵, 鼎煜
14:30	[12]	Testing the SM and probing new physics via QCD spin effects	岩, 斌
14:45	[13]	Search for new physics beyond the standard model with ferromagnetic spins	季, 伟
15:00	[14]	Gauge-independent gravitational waves from a minimal dark U(1) sector with viable dark matter candidates	冯, 万哲
15:15	[15]	Wess-Zumino-Witten interactions of axions: three-flavor	刘, 佳
15:30	[16]	暗物质研究的新方法	黄, 发朋
