

# Jet Energy Resolution Validation

Shuo Han, Minqia Li, Kaili Zhang, Hao Zhu

1 IHEP

# ParticleGun

- Generate Single  $\mu^+$  Process Using ParticleGun.
  - 100 events.
  - One events has a extra PFO( $K^0$ ).
  - Next Step: Generate samples at different data point(2GeV, 5GeV, 10GeV, 20GeV, 50GeV, 100GeV) and compare the PFO performance.
