

第十一届粒子所“青年之星”2025年度学术论坛

Friday, 28 November 2025

Friday Afternoon Second Session - 9409 (15:50 - 16:50)

| time  | [id] | title                                                                                                         | presenter  |
|-------|------|---------------------------------------------------------------------------------------------------------------|------------|
| 15:50 | [27] | Investigation of transport properties of graphene Dirac fluid by holographic two-current axion coupling model | LIU, Cai-E |
| 16:10 | [28] | Rotation effect on the deconfinement phase transition in holographic QCD                                      | 王, 嘉豪      |
| 16:30 | [25] | Aspects of holographic Langevin diffusion in the presence of anisotropic magnetic field                       | ZHOU, qi   |
