LHC CLHCP2026

Friday, 30 October 2026

Parallel 4: Heavy Ion 1 - □□□ **(14:00 - 16:00)**

-Conveners:

time	[id] title	presenter
14:00	[746] Investigating the initial- and final-state effects on higher-order fluctuations of the mean transverse momentum using the AMPT model with an improved initial condition	□□
14:15	[747] Quantum simulation of dijet production in a QCD medium	MEIJIAN LI
14:30	[749] Jpsi elliptic flow in pp and OO collisions with ALICE in run 3	□□□
14:45	[750] Jpsi global spin alignment with respect to event plane in Pb-Pb collisions with ALICE in run 3	□□□
15:00	[751] Prompt / non-prompt charmonia measurement at mid and forward rapidity in pp collision at 13.6 TeV	□□□
15:15	[752] Study of open heavy flavor hadron production with ALICE	□□□
