

Status/Updates

Jin Wang

IHEP Informal Meeting 2014-02-18

Status of the Coupling Note

- The final draft is completed on this Monday
 - with full categorization finalized
 - with complete signal and background modeling
 - with all systematics except photon ID
- A few cross checks need to be done for mass unblinding
 - Give the expected distribution of the resolution nuisance parameters
 - Determine the mu bias from the ESS
- Final statistics is under validating
- Will help on finalize photon ID scale factor and uncertainties in next few weeks
