

# Work status

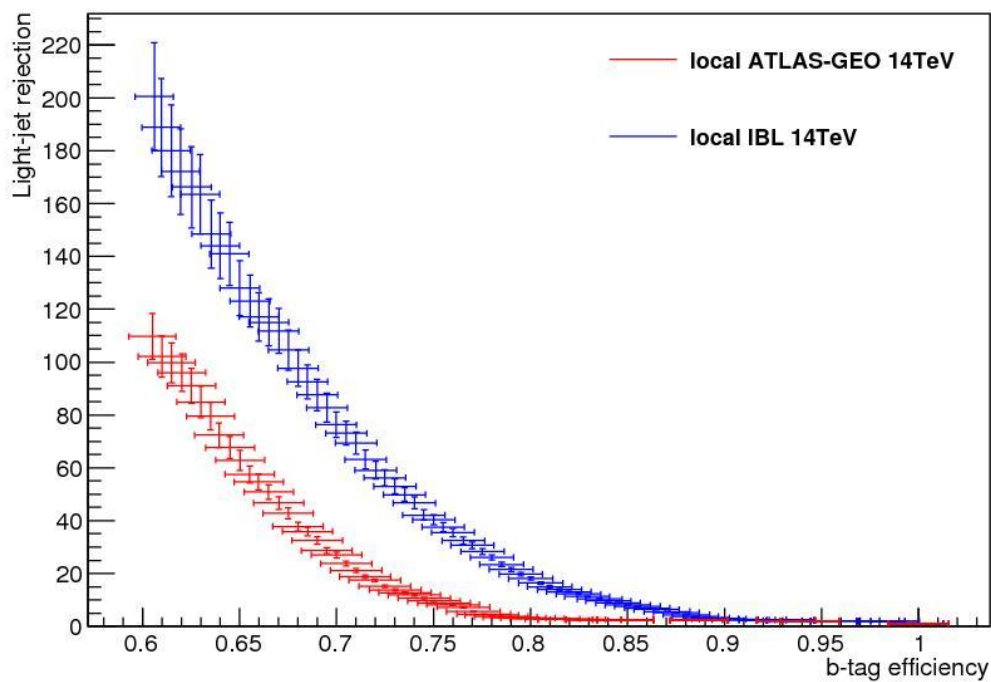

2014-2-18

# Qualification works for id-tracking

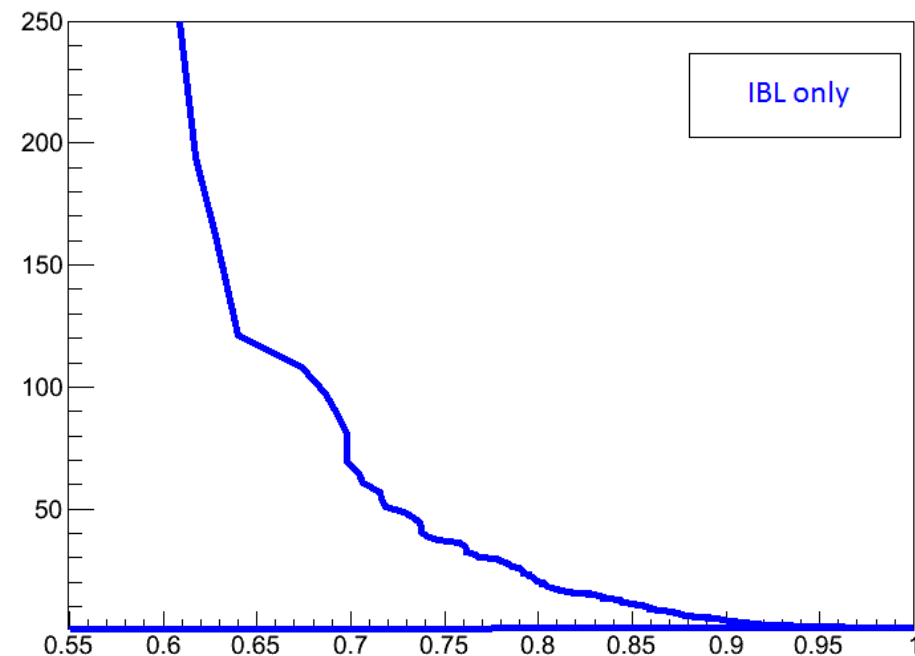

- Still have some trouble with grid jobs failure(step1)
- Already able to generate report (step2)
- I can give a report about id-tracking validation and xAOD latter

# IBL B-tagging

Efficiency v.s. Rejection with MV1

Graph

For IBL it now matches the official result both shape and number(within error bar)

Still have some problem with none IBL sample and I am trying to figure it out
