

Huijun's report

Upper limit

- large impacts on bands instead of median

Note status

- All the numbers that we have are included in preliminary note
- The systematic uncertainties part is being completed
- CDS Link:
- <https://cds.cern.ch/record/1967498?>
- Quite readable now and close-to-complete in one or two weeks

Higgs prospect analysis plan

Sample is available

`mc12_14TeV.147114.AlpgenPythia_Auto_P2011C_ZmumuNp1.merge.NTUP_COMMON.e3021_s1762_s1777_r5786_r5623_p1764_tid01603505_00`

Trying to get PU jet 4 momenta mv1 jvf and to understand correlations
(this week)

Write some code to insert these jets into our current sample
(would be quite fast)
