IHEP

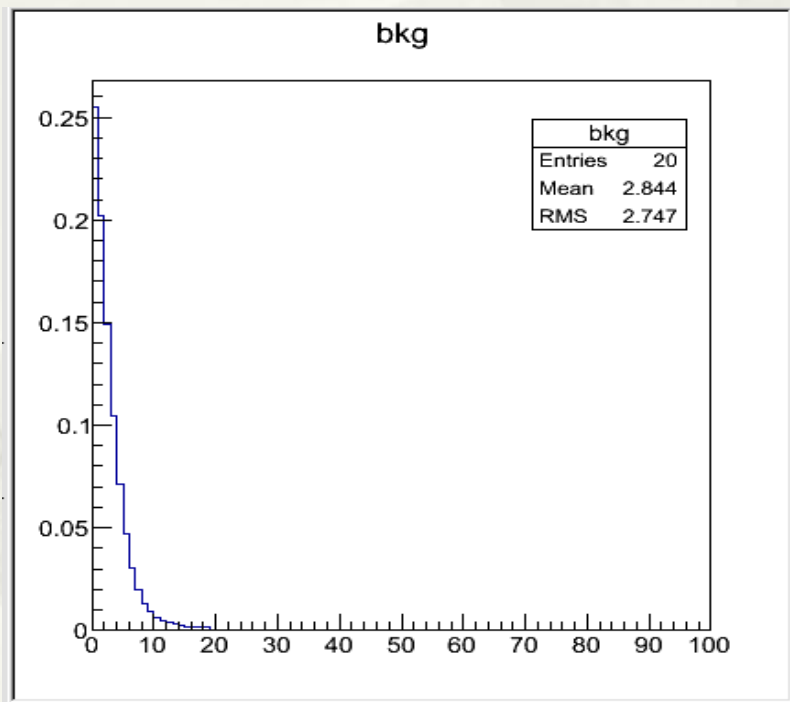

11/26/2014

Qualification task

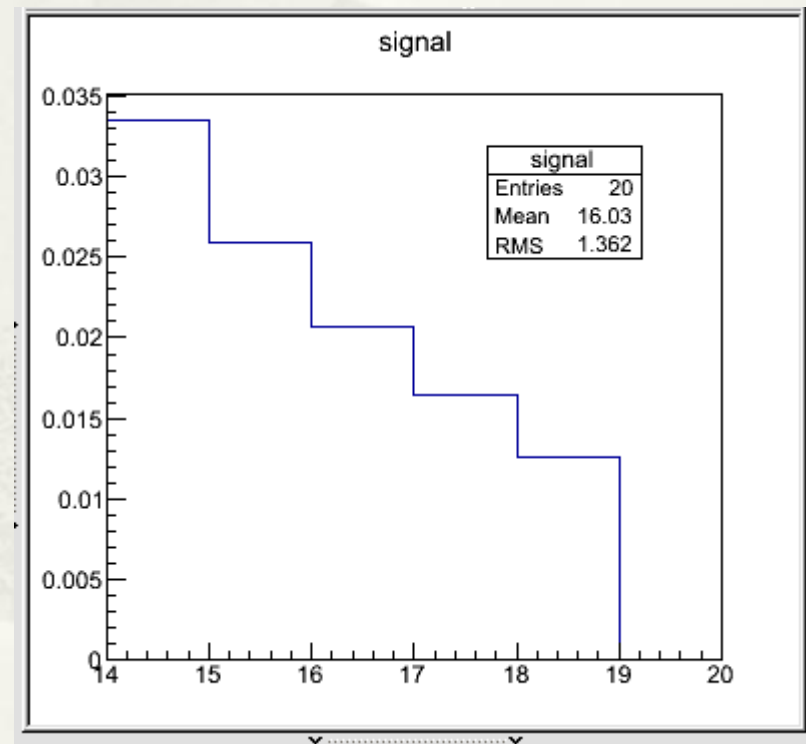

- * It needs more time to work the smearing of impact parameter d_0 and z_0 in the tool.
- * The difficulty is I am not familiar with the style of editing the code.
- * But now I have some materials

H- \rightarrow WW $\gamma\gamma$ optimization

The value of longitudinal axis present the bkg
The horizontal ordinate is bin number

The value of longitudinal axis present the signal
The horizontal ordinate is bin number

The maximum significance is 0.867478 when scanning the MET.
