

Derivation frame work

- We can use the HWW frame work

<https://twiki.cern.ch/twiki/bin/view/AtlasProtected/HWWxAODCode>

- Modifications:
 - Triggers: maybe better use what they have
 - Pt cut on leptons: we can try to loose the pt cut, but need to find a proper cut, considering triggers and fake leptons
 - Fake lepton study: Weimin SONG is working on that, we will discuss later.
->May give a talk on the Kick-off meeting.
 - Miss charge tool : Seems OK?
