Linear Collider workshops in Asia

- International linear collider community has been organizing two workshops every year, one as the global workshop and the other as a regional workshop either at NA, EU, or Asia. In 2014, the regional workshop was held at FNAL organized by NA organizers. The global workshop was LCWS2014 at Belgrade, Serbia. Spring 2015 is the turn for a Asian regional workshop.
- The last regional workshop in Asia was at Daegu, Korea, 2012, being organized jointly by the Linear Collider Physics and Detector Working Group and GDE.

Asian Linear Collider Workshop 2015

KEK, Tsukuba, Japan, April 20-24

International workshop hosted by KEK, ACFA and ILC, to study the physics and detectors and the implementation of future linear electron positron colliders.

On April 22, a special symposium "ILC Tokyo Event" will be organized as a part of the workshop at the University of Tokyo.

ILC Tokyo Event : Wednesday, April 22, 2015

- Main plenary session of ALCW2015
- Lectures and a panel discussion for ILC in Japan
- ILC48 Food Festa: enjoy the cuisine from the 48 countries of the signatories to the ILC TDR

- KEK, ACFA and LCC co-host the workshop
- Detector sessions are divided to R&D group meetings and concept group meetings.
- Physics and accelerator sessions are as usual

The workshop is held at a critical moment for ILC in Japan. Therefore, ILC Tokyo Event is organized on April 22, for a special focus on ILC in Japan. A symposium with people from various fields will be organized at Tokyo, which will be followed by ILC48 Food Festa in the night.
