

International Symposium on Higgs Boson and Beyond Standard Model Physics

Wednesday, 17 August 2016

Wednesday afternoon - session 1 (2) - The international lecture hall, 2F of the academic exchange center
(15:40 - 17:40)

-Conveners: Junquan TAO

time	[id]	title	presenter
15:40	[41]	DBL: all $llqq/nunuqq$ with ATLAS Detector	ALKIRE, Steven Partrick
16:00	[42]	Electroweak W γ production in association with two jets at $\sqrt{s} = 8$ TeV with CMS detector	YANG, Daneng
16:20	[43]	Study on VBF $H \rightarrow \gamma\gamma$ with ATLAS detector	ZHANG, Yu
16:40	[44]	Search for heavy neutral Higgs in di-boson final state at CMS	CHENG, Tongguang
17:00	[45]	Search for displaced leptons in the e- μ channel at CMS	LIU, Bingxuan
17:20	[46]	Data driven W+Jet background estimation by fake factor method for $WW \rightarrow l\nu l\nu$ final state	SONG, Weimin
