## **Search for a high mass Higgs decaying into vector vector final state**

The talk will focus on the search for a high-mass Higgs boson  $H$  in the  $H \rightarrow WW$  and  $ZZ$  decay channels using  $pp$  collision data corresponding to an integrated luminosity of  $13.2 \text{ fb}^{-1}$  collected at  $\sqrt{s} = 13 \text{ TeV}$  by the ATLAS detector at the Large Hadron Collider.
