

Quasi-bound state in the antiKNNN system

Sunday, 3 September 2017 15:40 (20 minutes)

An exotic system consisting of an antikaon and three nucleons will be considered. A search of a quasi-bound state in the system will be performed using four-body Faddeev-type equations. Different K^-N potentials will be used for studying dependence of the results on the two-body input.

Presenter: SHEVCHENKO, Nina (Nuclear Physics Institute Rez)

Session Classification: Hadrons in medium - hyperons and mesons in nuclear matter

Track Classification: 10) Hadrons in medium - hyperons and mesons in nuclear matter
