

Heavy flavour production measurements at LHCb

Saturday, 2 September 2017 14:25 (25 minutes)

Heavy flavour production measurements in proton-proton collisions are important tests of QCD. We report on updated production cross-section measurement of quarkonia, open-charm, and open-beauty states. Other aspects related to the quarkonium production mechanisms, such as the production of charmonium state in jets, will be discussed.

Presenter: Dr BARSUK, Sergey (LAL, Orsay)

Session Classification: Standard model physics at the TeV scale

Track Classification: 6) Standard model physics at the TeV scale
