

CCNU Relativistic Heavy-Ion Physics - fortnightly workshop (1)

Wednesday, 19 October 2016 - Thursday, 20 October 2016

Book of Abstracts

Contents

The Rindler coordinates and detailed description of accelerating solutions of hydrodynamics I	1
3+1 D hydrodynamic evolution	1
Longitudinal fluctuations in initial states	1
(special session) Probing transverse momentum broadening via dihadron and hadron-jet angular correlations	1
GLV formalism I	1
Review of interacting fields and Feynman diagrams	1
Review of advanced quantum theories	1
(special session) QCD phase transition	2
Tea break	2
Closing session	2
Opening session	2
Tea break	2

Wednesday / 0

The Rindler coordinates and detailed description of accelerating solutions of hydrodynamics I.

Corresponding Author: jiangzf@mails.ccnu.edu.cn

Wednesday / 1

3+1 D hydrodynamic evolution

Corresponding Author: dingchi2014@mails.ccnu.edu.cn

Wednesday / 2

Longitudinal fluctuations in initial states

Corresponding Author: xiangyuwu@mails.ccnu.edu.cn

Wednesday / 3

(special session) Probing transverse momentum broadening via di-hadron and hadron-jet angular correlations

Thursday / 4

GLV formalism I

Corresponding Author: chen.l.raymond@mails.ccnu.edu.cn

Thursday / 5

Review of interacting fields and Feynman diagrams

Corresponding Author: leiwang@mails.ccnu.edu.cn

6

Review of advanced quantum theories

Corresponding Author: kajjai@mails.ccnu.edu.cn

Thursday / 7

(special session) QCD phase transition

Thursday / 8

Tea break

Thursday / 9

Closing session

Corresponding Author: jiangzf@mails.ccnu.edu.cn

Wednesday / 10

Opening session

Corresponding Author: jiangzf@mails.ccnu.edu.cn

Wednesday / 11

Tea break
