Combined limits

- First combined 2LSS and 3L channels;
- All available sys. uncertainty included;
- Lumi error set 4.1%.
- Mostly driven by 2LSS, but I doubt 3L is not fully optimized.

Signal	Non-res	H260	H300	H400	H500
Expected	3.8	32.7	29.2	10.0	3.6

Combined limits

To do list

- Based on v26 NTuples, address comments on CDS from EB;
- Update note, hope to pass on v0.2.
