

WW fusion, X-section Validation

Hao

2018/4/23

$$\frac{d^2\sigma}{dEd\theta} \text{ at } \sqrt{s} = 250\text{GeV}$$

Inter.

ZH

ZH

$$\frac{d\sigma}{dE} \text{ at } \sqrt{s} = 250\text{GeV}$$

Graph

$$\frac{d\sigma}{dE d\cos\theta} \text{ at } \sqrt{s} = 250\text{GeV}$$

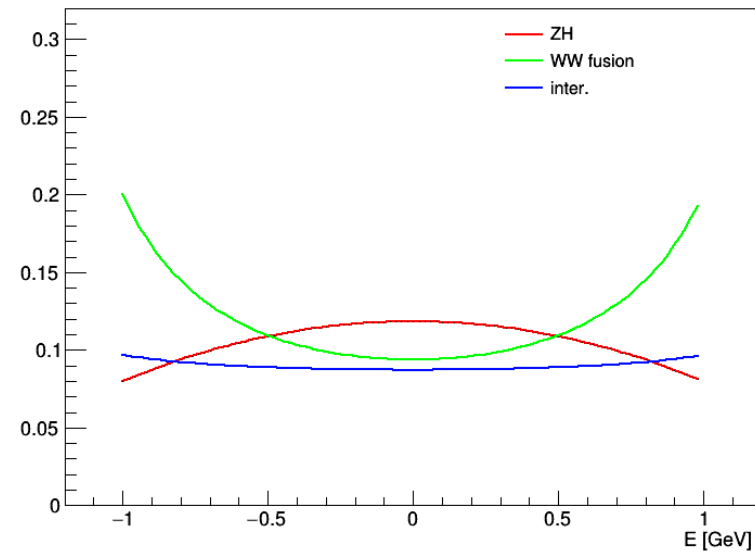

$E_h = 135.000000$

$E_h = 140.000000$

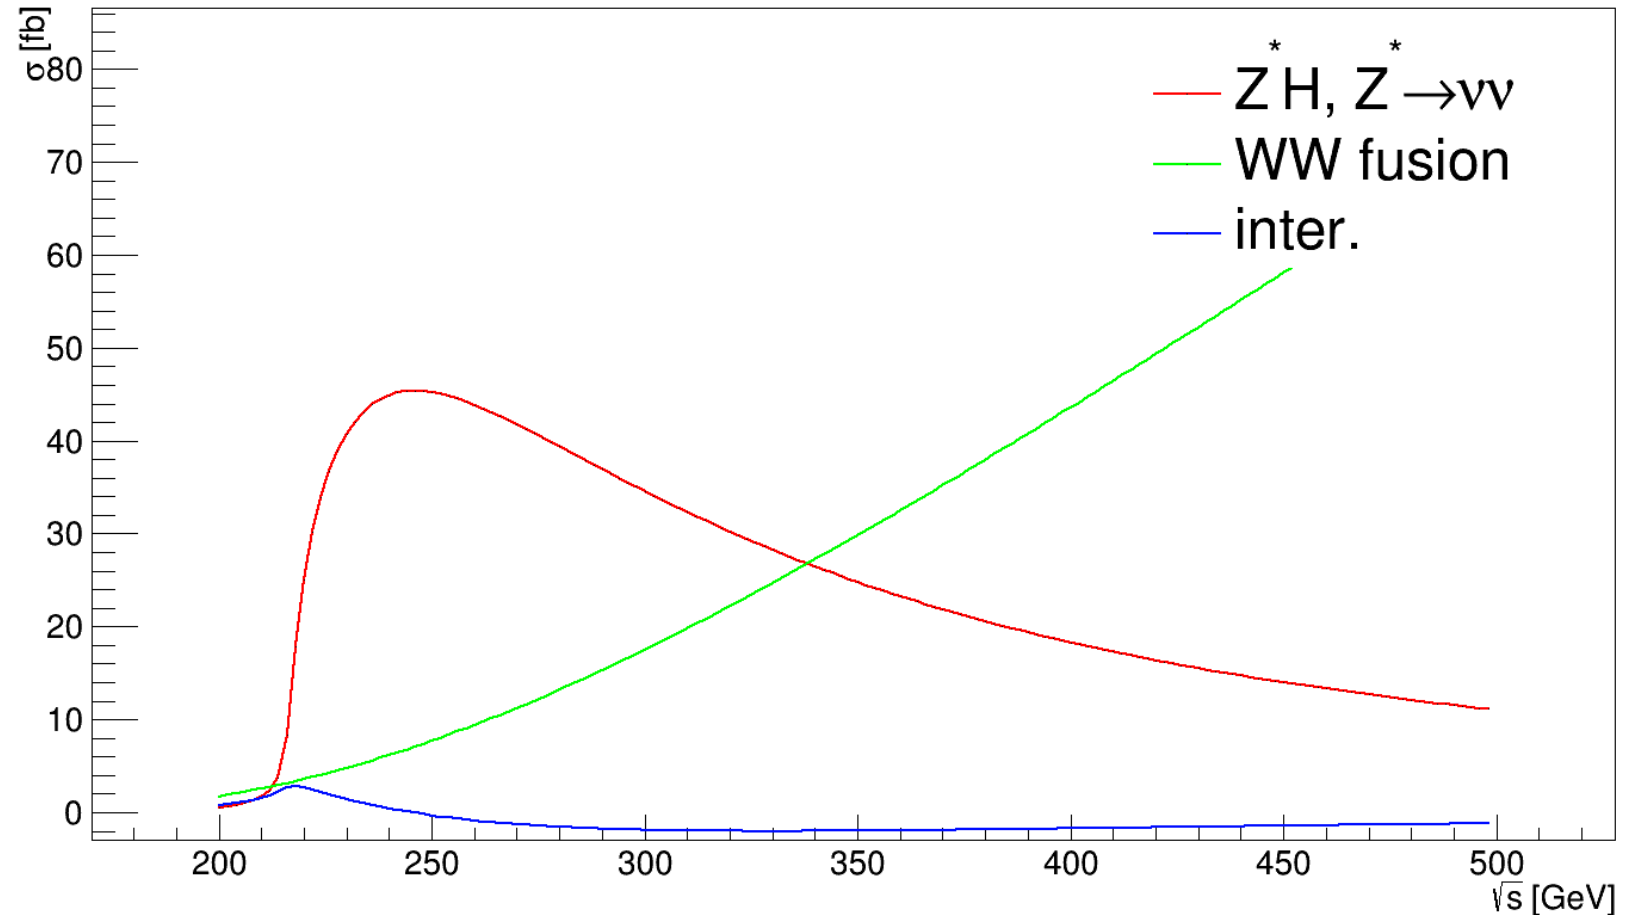

$E_h = 145.000000$

X-sections vs center of mass energy

$\sigma(\nu\nu H)$ vs. \sqrt{s}

- Total X-section by integrate out E and theta
 - $Z^*H, Z^* \rightarrow \nu\nu$
 - WW fusion
- @250GeV
 - Inter. -0.61%
 - WW fusion 14.61%
 - ZH: 86.00%

X-sections vs center of mass energy

- Total X-section by integrate out E and theta
 - $Z^*H, Z^* \rightarrow \nu\nu$
 - WW fusion
- Alternative formulas of total X-section in compact form
 - WW fusion for X-section
 - $ZH, Z \rightarrow \nu\nu$

$\sigma(\nu\nu H)$ vs. \sqrt{s}
