

# **The 7th Asian Triangle Heavy-Ion Conference (ATHIC 2018)**

Saturday, 3 November 2018 - Tuesday, 6 November 2018

East Campus of USTC

## **Book of Abstracts**

# Contents

A Report on Korean activities for the ALICE-ITS upgrade . . . . .	1
Experimental results from STAR . . . . .	1
Welcome . . . . .	1
Experimental Results from ALICE . . . . .	1
Second-order dissipative magnetohydrodynamics . . . . .	1
Tale of coherent photon products: from UPC to HHIC . . . . .	1
Review on phase transition in QCD and CEP . . . . .	2
RHIC BES-I QCD Critical Point Search . . . . .	2
Fluctuation observables around the critical point . . . . .	2
Net-particle number fluctuations measurement in Pb-Pb collisions at ALICE . . . . .	2
MAGIC - how Matter's extreme phases can be revealed in Gravitational wave observations and in relativistic heavy Ion Collision experiments . . . . .	2
Small system flow at LHC . . . . .	2
Recent development in hydrodynamic description of small colliding systems . . . . .	2
Full 3D dynamical modeling based on fluctuating hydro . . . . .	3
Machine learning for simulation of hydro evolution . . . . .	3
Charm Hadron Production and Hadronization . . . . .	3
Study heavy flavor transport in QGP with ALICE . . . . .	3
Quarkonia overview . . . . .	3
Quantum aspects of heavy quark theory . . . . .	3
Hydrodynamics with Anomaly Transport . . . . .	3
CME physics . . . . .	3
Chiral kinetic theory and magnetic effect . . . . .	3
Vorticity and Spin Polarization . . . . .	4

Global Polarization measurement in Heavy-ion collisions . . . . .	4
BES Hadron Spectra . . . . .	4
QCD phase diagram from LQCD . . . . .	4
Study QCD phase diagram from an extended AMPT model . . . . .	4
Electromagnetic probes at RHIC . . . . .	4
Measurement of Jet Substructure in Heavy Ion Experiments . . . . .	4
Jet quenching in high-energy nuclear collisions . . . . .	4
Jet shape and jet structure . . . . .	5
Nuclear astrophysics . . . . .	5
An Electron-Ion-Collider at China . . . . .	5
LAMPS in RAON . . . . .	5
Experimental summary . . . . .	5
Theoretical summary . . . . .	5
Closing Remarks . . . . .	5
Measurement of the sixth-order cumulant of net-proton and netcharge multiplicity distributions from the STAR experiment . . . . .	5
Baryon number fluctuations in the 2+1 flavor low energy effective theory” . . . . .	6
Baryon number probability distribution at finite temperature . . . . .	6
Effect of limited statistics on higher order cumulants measurement in heavy-ion collision experiments . . . . .	6
Beam energy dependence of light nuclei (d, t) productions in Au+Au collisions at RHIC . . . . .	6
Directed flow of identified hadrons using A Multi-Phase Transport Model in Au+Au collisions at 7.7 - 200 GeV . . . . .	6
Are there higher order corrections to Chiral Magnetic (Vortical) Effects? . . . . .	6
Chiral Vortical Effect and Lorentz invariance from Wigner Equations . . . . .	6
On Mass correction to Chiral Vortical Effect and Chiral Separation Effect . . . . .	7
Vorticity structure and hyperon polarization in heavy-ion collisions . . . . .	7
Rotation-induced inhomogeneous chiral condensate . . . . .	7
Fate of pion superfluidity in a rotational system with a parallel magnetic field . . . . .	7
Event-by-event jet suppression, anisotropy and hard-soft tomography . . . . .	7

Nuclear modification of full jets and jet structure in PbPb collisions at 2.76 TeV and 5.02 TeV . . . . .	7
Heavy and light flavor jet quenching in Au+Au, Pb+Pb and Xe+Xe collisions . . . . .	8
Gluon emission from heavy quarks in dense nuclear medium . . . . .	8
Parton Energy Loss in Generalized High Twist Approach . . . . .	8
Transverse Momentum Balance and Angular Distribution of $b\bar{b}$ Dijets in Pb+Pb collisions . . . . .	8
Centrality fluctuation in heavy-ion collisions . . . . .	8
Longitudinal fluctuations and decorrelations of anisotropic flows at the LHC and RHIC energies . . . . .	8
Effects of hydrodynamic fluctuations in high energy heavy ion collisions . . . . .	8
Anisotropic flow of identified particles in PbPb collisions at 5.02 TeV with ALICE . . . . .	9
Two-particle correlations with ALICE . . . . .	9
Collective flow in proton + proton system collisions . . . . .	9
Effect of off-shell fragmentation on $v_2$ in small systems . . . . .	9
Deuteron $v_2$ and synthesis . . . . .	9
Charm hadrons production with RRM . . . . .	9
Production of Ds meson in Au+Au collision at 200 GeV with the STAR experiment . . . . .	9
Measurement of single electrons from semi-leptonic decay of charm and bottom hadrons in Au+Au collisions at 200 GeV . . . . .	9
Longitudinal dependence of D mesons nuclear modification factor in ultrarelativistic heavy ion collisions . . . . .	10
Charm Flow as a Better Probe of Quark–Gluon Plasma Properties . . . . .	10
Directed flow of heavy flavor as a probe of early time physics . . . . .	10
Open charm and beauty states production in proton-lead collisions with LHCb . . . . .	10
Open heavy-flavour hadron decay lepton $v_2$ in p-Pb collisions with ALICE . . . . .	10
$V_0$ and $\Xi$ in jets and the UE in pp, p-Pb and Pb-Pb collision systems with ALICE . . . . .	10
Medium recoil and jet shape modification in quark-gluon plasma . . . . .	11
Jet Event Topology as a probe of quark gluon plasma in heavy-ion collisions . . . . .	11
Two-particle correlation via Bremsstrahlung . . . . .	11
Application of the Momentum Kick Model to high-energy heavy-ion collisions . . . . .	11
Jet-like Correlations in Au+Au at 200GeV in STAR . . . . .	11

Study of two particle correlations with high $p_T$ $\pi_0$ and direct photon triggers in ALICE . . . . .	11
Multiplicity dependence of charged jet production in pp collisions at 13 TeV . . . . .	12
Universal relations between nonGaussian fluctuations in heavy-ion collisions . . . . .	12
Current correlations and dynamics near the QCD crossover . . . . .	12
How to locate the QCD phase boundary by scanning observable in the phase plane . . . . .	12
Phase diagram of two-color QCD matter at finite baryon and axial isospin densities . . . . .	12
Kibble-Zurek scaling in diffusive dynamics . . . . .	12
Thermodynamics of a gas of hadrons with interaction using Smatrix formalism . . . . .	12
Multi-phase transport model predictions of isobaric collisions with nuclear structures from density functional theory . . . . .	13
Importance of isobar density distribution in the isobaric collisions . . . . .	13
Impact of magnetic field fluctuations on the CME measurement in isobaric collisions . . . . .	13
Complete and Consistent Chiral Transport from Wigner Function Formalism . . . . .	13
Low- $p_T$ $e+e-$ Pair Production in Au+Au collisions at 200 GeV and U+U Collisions at 193 GeV at STAR . . . . .	13
Effect of magnetic fields on pairs of particles with opposite charges in ultrarelativistic heavy-ion collisions . . . . .	13
Low mass dimuon production at forward rapidity in pp, p-Pb and Pb-Pb collisions with ALICE . . . . .	13
Prospects of dimuon measurements with Muon Forward Tracker at ALICE . . . . .	14
Testing ultra-intense magnetic field using polarization/deflection of prompt di-muons . . . . .	14
ALICE ITS upgrade and CCNU effort . . . . .	14
A Report on Korean activities for the ALICE-ITS upgrade . . . . .	14
EMCal Development for sPHENIX Experiment . . . . .	14
Rare fluctuation of the S-matrix at NLL in QCD . . . . .	14
Photon PDFs and Proton PDFs studied at an EIC . . . . .	15
Exclusive vector meson photoproduction at next-to-leading order . . . . .	15
Gravitational Wave from Phase Transition inside Neutron Stars . . . . .	15
ZMCintegral – an easy to Use Python Package for Monte Carlo Integration on Multi-GPU Devices . . . . .	15
Quarkonium measurements in heavy-ion collisions at STAR . . . . .	15
Identify the Quantum Effects of Heavy Quarkonium in QGP . . . . .	15

Heavy Quarkonium Dissociation by Thermal Gluons in the QGP . . . . .	15
Evolution of quarkonia states in rapidly varying strong magnetic field . . . . .	15
J/psi production in p-Pb collisions with the ALICE detector . . . . .	16
Quarkonium production as a function of charged particles multiplicity in pp collisions measured by ALICE at the LHC . . . . .	16
Measurements of charmonium production in p+p collisions at STAR . . . . .	16
Hadronic resonance production in pp, p-Pb and Pb-Pb collisions measured with ALICE at the LHC . . . . .	16
Charged and Strange Particle Distributions in Central Al + Au Collisions at 4.9 GeV . . . . .	16
Light flavour hadron production in Xe-Xe collisions at 5.44 TeV with ALICE at the LHC . . . . .	16
Analytical solutions of ideal hydrodynamics and viscous hydrodynamics with longitudinal accelerating flow . . . . .	17
Study of particle spectra using the modified AMPT model in pp and AA collisions . . . . .	17
New insights of soft hadron production in pp and pPb collisions at LHC . . . . .	17
Multiplicity Dependence of Charged Particle, phi Meson and Multi-strange Particle Production in p+p Collisions at 200 GeV with PYTHIA Simulation . . . . .	17
Memory of my Mentor Prof. Hongfang CHEN - Her career and life at USTC . . . . .	17
TBA . . . . .	17
TBA . . . . .	18
QCD phase structure . . . . .	18
Dilepton . . . . .	18
Open heavy flavor measurement at STAR . . . . .	18
Quarkonium . . . . .	18
The evolution of MRPC TOF technology . . . . .	18

**Corresponding Author:** minjae@hipex.phys.pusan.ac.kr

The ALICE (A Large Ion Collider Experiment), uniquely dedicated to heavy-ion collisions at the LHC, is currently preparing upgrades of its sub-detectors including the Inner Tracking System (ITS) to enhance vertexing and the tracking capabilities at low  $p_T$  under the high luminosity environment of LHC-Run3. The new ITS uses ALPIDE (ALice Pixel DEtector) chips based on MAPS (Monolithic Active Pixel Sensor) technology with 15 billion pixels, 400kHz readout speed in pp collisions, 100kHz in Pb–Pb collisions and  $0.3\%X_0$  of the effective material budget for  $<25\mu\text{m}$  precision of primary vertex in Pb–Pb collisions.

The Korean team (PNU-INHA and Yonsei Groups) is currently taking part in the mass-chip tests (MCT) and the assembly of the outer barrel (OB) HIC (Hybrid Integrated Circuit). Since June 2017, dimensional and electrical tests of 40k chips were performed at Yonsei and Pusan. Currently, these tests are ongoing mainly at Yonsei while Pusan is serving as a backup site. Furthermore, the PNU-Inha team is now producing the HIC modules with a Korean wire-bonding company, Sejung. All studies which were carried out to solve the problems occurring during the tests and procedures followed will be presented together with a status update.

Plenary I (9:00-10:50) Chair: Nu Xu / 87

## Experimental results from STAR

Plenary I (9:00-10:50) Chair: Nu Xu / 88

## Welcome

Plenary I (9:00-10:50) Chair: Nu Xu / 89

## Experimental Results from ALICE

Plenary I (9:00-10:50) Chair: Nu Xu / 90

## Second-order dissipative magnetohydrodynamics

Plenary I (9:00-10:50) Chair: Nu Xu / 91

## **Tale of coherent photon products: from UPC to HHIC**
