

Observation of electroweak production of a same-sign W boson pair in association with two jets in pp collisions with the ATLAS detector

Thursday, 20 December 2018 17:15 (15 minutes)

The talk will present an observation of electroweak production of a same-sign W boson pair in association with two jets using 36.1 fb⁻¹ of proton-proton collision data recorded by the ATLAS detector at a center-of-mass energy of 13 TeV. Events containing two same-sign leptons, electron or muon, and at least two jets, are selected.
