

# QCD Physics at the LHC

*Saturday, 22 December 2018 09:42 (24 minutes)*

In this talk, I will review the current status of the QCD physics at the LHC, ranging from the precision phenomenologies to the more recent developments in jet substructures. Available theory frameworks for achieving the first principle understanding of the related processes will also be reviewed. Connections to the other aspects of the LHC physics, e.g. LHC new physics searches, may also be discussed.

## Type

Plenary talk

**Primary author:** LIU, xiaohui (beijing normal university)

**Presenter:** LIU, xiaohui (beijing normal university)

**Session Classification:** Plenary

**Track Classification:** Plenary
